ATTACHING THE HANDLE

(Fig. 2a)

- Remove the bolts and bracket from the front handle.
 - Place the handle bar.
- NOTE:** The throttle trigger must be mounted to the operator's right side.
- Replace the bolts and bracket.
 - Adjust the handle bar for best operator control and comfort.
 - Tighten the two bolts securely with the combination wrench supplied.

ATTACHING THE BLADE GUARD AND GRASS DEFLECTOR

Blade guard

(Fig. 2b)

- To attach the blade deflector to the mounting bracket, align the screw holes on the blade deflector to the bolts on the mounting bracket.
- Using the combination wrench supplied, tighten the two bolts securely.

WARNING:

- The blade deflector should remain fitted to the product at all times.
- When using the line trimmer bump head, the grass deflector must be attached to the blade guard.
- When using the brushcutter blade, the grass deflector must be removed from the blade guard.

Grass deflector

(Fig. 2b)

- To attach the grass deflector to the blade deflector, align the 3 screws on the grass deflector to the screw holes on the blade deflector.
- Using the combination wrench supplied, tighten the two bolts securely.

NOTE: When using the line trimmer bump head, the grass deflector must be attached to the blade guard.

INSTALLING THE RELEASY™ LINE TRIMMER HEAD

(Fig. 2c)

- Stop the engine and disconnect the spark plug wire.
- Remove the bump head from the drive connector.
- Open the ReelEasy™ Line Trimmer Head by depressing the latches on each side.

NOTE: The contents of the line trimmer head are spring loaded, so keep your other hand over the line trimmer head cover while depressing the latches.

- Remove the line trimmer head cover, bump knob, and line spool and set aside.
- Place the cutting head housing on the drive shaft.
- Make sure the housing is fully seated.

- Install the hex bolt to secure the line trimmer head to the drive shaft.
- Tighten by using the hex-shaped opening on the inside of the bump knob.

NOTE: Only use the bump knob to tighten the bolt. The use of other tools may allow over tightening of the bolt, which could damage the line trimmer head.

- Reinstall the bump head spring into the line trimmer head and push down to seat.
- Reinstall the line spool.
- For the curved shaft attachment with the ReelEasy™ cutting head the spool should be placed so "For curved shaft" is visible on the line spool.
- Replace the bump knob by inserting it into the centre of the line spool.
- Replace the line trimmer head cover, aligning latches with openings in the line trimmer head.
- Press cover and line trimmer head together until both latches snap into openings securely.
- Install line as described in the next section of this manual.

INSTALLING LINE IN RELEASY™ LINE TRIMMER HEAD

(Fig. 2c)

- Use a 2.4 mm diameter monofilament string.
- Stop the engine and disconnect the spark plug wire.
- Cut one piece of string approximately 6 m in length.
- Rotate the knob on the string head until the line on knob aligns with the arrows on the top of string head.
- Insert one end of the string into the eyelet located on the side of the string head and push until string comes out through eyelet on the other side.
- Continue to push string through the string head until the middle section of the string is inside the string head and string outside the string head is evenly divided on each side.
- Rotate the knob on the line trimmer head to wind the line.
- If using a curved shaft attachment, the knob should be rotated counterclockwise.
- Wind the string until approximately 20 cm remains protruding from the string head.
- Replace the spark plug boot.

ATTACHING THE SHOULDER STRAP

(Fig. 2d)

- Connect the latch on the shoulder strap to the strap hanger.
- Adjust the strap hanger to a comfortable position.

NOTE: Always use the shoulder strap/harness with your unit.

CONVERTING FROM STRING TRIMMER TO BRUSHCUTTER

(Fig. 2e)

WARNING: Always stop the engine and disconnect the spark plug wire from the spark plug.

Removing the bump head

- Place the holding pin through the slot in the upper flange washer and the hole in the gear head.
- Unlock the spool retainer as shown and remove the spool.
- Remove the bump head from the drive connector.
- Place the holding pin through the slot in the upper flange washer and the hole in the gear head.
- Turn the connector clockwise to remove.
- Remove the washer.

WARNING: When using the brushcutter blade, the grass deflector must be removed from the blade guard.

Installing the blade

- Place the upper flange washer over the gear shaft with the hollow side towards the gear head.
- Centre the blade on the upper flange, making sure the blade sits flat.
- Install the cupped washer with the raised centre away from the blade.
- Place the holding pin through the slot in the upper flange washer and the hole in the gear head.
- Replace the blade nut and tighten securely by turning clockwise.

CONVERTING FROM BRUSHCUTTER TO STRING TRIMMER

WARNING: Always stop the engine and disconnect the spark plug wire from the spark plug.

Removing the blade

- Place the holding pin through the slot in the upper flange washer and the hole in the gear head.
- Remove the blade nut, washers, and blade.
- Attach the grass deflector to the blade deflector; align the 3 screws on the grass deflector to the screw holes on the blade deflector.
- Using the combination wrench supplied, tighten the two bolts securely.

WARNING: When using the line trimmer bump head, the grass deflector must be attached to the blade guard.

Installing the bump head

- Place the upper flange washer over the gear shaft with the hollow side towards the gear head.
- Place the holding pin through the slot in the upper flange washer and the hole in the gear head.
- Place the bump head on the drive connector.
- Tighten securely with wrench.

English (Original instructions)

SYMBOLS

Important: Some of the following symbols may be used on your tool. Please study them and learn their meaning. Proper interpretation of these symbols will allow you to operate the tool better and more safely.

SYMBOLS	EXPLANATION
	Indicates danger, warning or caution. It means attention!!! Your safety is involved.
	Your manual contains special messages to bring attention to potential safety concerns as well as operating and servicing information. Please read all the information carefully to ensure satisfaction and safe use.
	Wear eye, hearing and head protection when operating this equipment.
	Danger of Ricochet. Keep all bystanders, especially children and pets, at least 15m from the operating area.
	Tri-Arc blade is appropriate for this unit and is suited for cutting pulpy weeds and vines.
	This unit is not intended for use with a toothed saw type blade.
	Rotational direction and maximum speed of the shaft for the cutting attachment.
	Wear non-slip safety footwear when using this equipment.
	Wear non-slip, heavy-duty gloves.
	Do not smoke when mixing fuel or filling fuel tank.
	Use unleaded petrol intended for motor vehicle use with an octane rating of 91([R+M]/2) or higher.
	Use 2-stroke lubricant for air cooled engines.
	Mix the fuel mix thoroughly and also each time before refuelling.
	CE Conformity s to all regulatory standards in the country in the EU where the product is purchased.

English (Original instructions)

Thank you for buying a Ryobi trimmer/brushcutter.

Your new trimmer/brushcutter has been engineered and manufactured to Ryobi's high standard for dependability, ease of operation, and operator safety. Properly cared for, it will give you years of rugged, trouble-free performance.

INTENDED USE

This product is only intended for use outdoors in a well ventilated area.

The product is intended for cutting long grass, pulpy weed, or brush and similar vegetation at or about ground level. The cutting plane should be approximately parallel to the ground surface. The product should not be used to trim hedges, bushes or other vegetation where the cutting plane is not parallel to the ground surface.

WARNING

To reduce the risk of injury, the user must read and understand the operator's manual.

WARNING

Do not attempt to operate this trimmer/brushcutter until you have read thoroughly and understood completely all instructions, safety rules etc contained in this manual. Failure to comply may result in accidents involving fire, electric shock or serious personal injury. Save operator's manual and review frequently for continuing safe operation, and instructing others who may use this tool.

READ ALL INSTRUCTIONS.

GENERAL SAFETY RULES

- For safe operation, read and understand all instructions before using the trimmer/brushcutter. Follow all safety instructions. Failure to follow all safety instructions listed below, can result in serious personal injury.
- Do not allow children or untrained individuals to use this unit.
- Never start or run the engine in a closed or poorly ventilated area; breathing exhaust fumes can kill.
- Clear the work area before each use. Remove all objects such as rocks, broken glass, nails, wire, or string which can be thrown or become entangled in the string head or blade.
- Wear full eye and hearing protection while operating this unit.
- Wear heavy long pants, boots, and gloves. Do not wear loose fitting clothing, short pants, jewellery of any kind, or use with bare feet.
- Secure long hair so it is above shoulder level to prevent entanglement in any moving parts.
- Keep all bystanders, children, and pets at least 15 m away.
- Do not operate this unit when you are tired, ill, or under the influence of alcohol, drugs, or medication.
- Do not operate in poor lighting.
- Keep firm footing and balance. Do not overreach. Overreaching can result in loss of balance or exposure to hot surfaces.
- Keep all parts of your body away from any moving part.
- Do not touch area around the muffler or cylinder of the trimmer/brushcutter, these parts get hot from operation.
- Always stop the engine and remove the spark plug wire before making any adjustments or repairs except for carburetor adjustments.
- Inspect the unit before each use for loose fasteners, fuel leaks, etc. Replace any damaged parts before use.
- The string head or blade will rotate during carburetor adjustments.
- It has been reported that vibrations from hand-held tools may contribute to a condition called Raynaud's Syndrome in certain individuals. Symptoms may include tingling, numbness and blanching of the fingers, usually apparent upon exposure to cold. Hereditary factors, exposure to cold and dampness, diet, smoking and work practices are all thought to contribute to the development of these symptoms. It is presently unknown what, if any, vibrations or extent of exposure may contribute to the condition. There are measures that can be taken by the operator to possibly reduce the effects of vibration:
 - a) Keep your body warm in cold weather. When operating the unit wear gloves to keep the hands and wrists warm. It is reported that cold weather is a major factor contributing to Raynaud's Syndrome.
 - b) After each period of operation, exercise to increase blood circulation.
 - c) Take frequent work breaks. Limit the amount of exposure per day.

If you experience any of the symptoms of this condition, immediately discontinue use and see your physician about these symptoms.
- Keep the tool well maintained, fasteners tightened and worn parts replaced.
- Mix and store fuel in a container approved for fuel.
- Mix fuel outdoors where there are no sparks or flames. Wipe up any fuel spillage. Move 9 m away from refueling site before starting engine.

English (Original instructions)

- Stop the engine and allow to cool before refueling or storing the unit.
- Allow the engine to cool; empty the fuel tank and secure the unit from moving before transporting in a vehicle.

SPECIFIC SAFETY RULES FOR TRIMMER USE

- Replace string head if cracked, chipped, or damaged in any way. Be sure the string head or blade is properly installed and securely fastened. Failure to do so can cause serious injury.
- Make sure all guards, straps, deflectors and handles are properly and securely attached.
- Use only the manufacturer's replacement line in the cutting head. Do not use any other cutting attachment.
- Never operate unit without the grass deflector in place and in good condition.
- Maintain a firm grip on both handles while trimming. Keep string head below waist level. Never cut with the string head located over 76 cm or more above the ground.

SPECIFIC SAFETY RULES FOR BRUSHCUTTER AND BLADE USE

- After engine stops, keep rotating blade in heavy grass or pulpy weeds until it stops.
- Do not operate the brushcutter unless the blade guard is firmly secured in place and in good condition.
- Use heavy gloves while installing or removing blades.
- Always stop the engine and remove the spark plug wire before attempting to remove any obstruction caught or jammed in the blade or before removing and installing the blade.
- Do not attempt to touch or stop the blade when it is rotating.
- A coasting blade can cause injury while it continues to spin after the engine is stopped or throttle trigger released. Maintain proper control until the blade has completely stopped rotating.
- Replace any blade that has been damaged. Always make sure blade is installed correctly and securely fastened before each use. Failure to do so can cause serious injury.
- Use only the manufacturer's replacement TRI-ARC blade intended for use on this brushcutter. Do not use any other blade.
- The TRI-ARC blade is suited for cutting pulpy weeds and vines only. Do not use for any other purpose. Never use the TRI-ARC blade to cut woody brush.

- Exercise extreme caution when using the blade with this unit. Blade thrust is the reaction that may occur when the spinning blade contacts anything it cannot cut. This contact may cause the blade to stop for an instant, and suddenly "thrust" the unit away from the object that was hit. This reaction can be violent enough to cause the operator to lose control of the unit. Blade thrust can occur without warning if the blade snags, stalls, or binds. This is more likely to occur in areas where it is difficult to see the material being cut. For cutting ease and safety, approach the weeds being cut from the right to the left. In the event an unexpected object or woody stock is encountered, this could minimize the blade thrust reaction.
- Never cut any material over 13 mm diameter.
- Always wear the shoulder strap when using the brushcutter and adjust to a comfortable operating position. Maintain a firm grip on both handles while cutting with a blade. Keep the blade away from body and below waist. Never use the brushcutter with the blade located 76 cm or more above the ground level.
- Cover the blade with the blade protector before storing the unit, or during transportation. Always remove the blade protector before using the unit. If not removed, the blade protector could become a thrown object as the blade begins to turn.

English (Original instructions)

SPECIFICATIONS

	RBC30SESB	RBC30SBSB
Weight (kg)		
- Without fuel, cutting attachment and harness	5.69	6.03
- Without fuel with bump head	5.97	7.13
- Without fuel with blade	5.97	7.13
Fuel tank volume [cm ³ or (L)]	415 or (0.415)	415 or (0.415)
Cutting swath (mm)		
- Bump head	457	457
- Blade	260	260
Recommended torque for blade (Nm)	>=13	>=13
Engine displacement (cm ³ / cc)	30	30
Line diameter for ReelEasy™ Head (mm)	2.4	2.4
Maximum engine performance (in accordance with ISO 8893) (kW)	0.75	0.75
Maximum rotational frequency of the the spindle (min ⁻¹)	10,000	10,000

22. ReelEasy™
23. Latch
24. Bolt (RBC30SBSB only)
25. Clamp (RBC30SBSB only)
26. Combination wrench (RBC30SBSB only)
27. Bracket (RBC30SBSB only)
28. Bike handle (RBC30SBSB only)
29. Wrench
30. Clamp
31. Screw
32. Bracket (RBC30SESB only)
33. Securing bolt (RBC30SESB only)
34. Pin (RBC30SESB only)

ASSEMBLY

Please refer to Fig. 2a - 2d.

Unpacking

This product requires assembly.

- Carefully remove the tool and any accessories from the box. Make sure that all items listed in the packing list are included.
- Inspect the tool carefully to make sure no breakage or damage occurred during shipping.
- Do not discard the packing material until you have carefully inspected and satisfactorily operated the tool.

WARNING

If any parts are damaged or missing, do not operate this tool until the parts are replaced.

Failure to heed this warning could result in serious personal injury.

WARNING

Do not attempt to modify this product or create accessories not recommended for use with this product. Any such alteration or modification is misuse and could result in a hazardous condition leading to possible serious personal injury.

WARNING

To prevent accidental starting that could cause serious personal injury, always disconnect the engine spark plug wire from the spark plug when assembling parts.

WARNING

Never attach or adjust any attachment while power head is running. Failure to stop the engine may cause serious personal injury.

WARNING

Be certain the knob is fully tightened before operating equipment; check it periodically for tightness during use to avoid serious injury.

OPERATION

FUEL AND REFUELING

HANDLING THE FUEL SAFELY

WARNING

Check for fuel leaks. If any are found, correct them before using the product to prevent fire or burn injury.

- Always handle fuel with care, it is highly flammable.
- Always refuel outdoors where there are no sparks and flames. Do not inhale fuel vapors.
- Do not let petrol or lubricant come in contact with your skin.
- Keep petrol and lubricant away from the eyes. If petrol or lubricant comes in contact with the eyes, wash them immediately with clean water. If irritation is still present, see a doctor immediately.
- Clean up spilled petrol immediately.
- Always transport and store fuel in a container approved for petroleum.

MIXING THE FUEL (Fig. 3)

- This product is powered by a 2-stroke engine and requires pre-mixing petrol and 2-stroke lubricant. Pre-mix unleaded petrol and 2-stroke engine lubricant in a clean container approved for petrol.
- This engine is certified to operate on unleaded petrol intended for automotive use with an octane rating

English (Original instructions)

of 91 ((R + M) / 2) or higher.

- Do not use any type of pre-mixed petrol / lubricant from fuel service stations, this includes the pre-mixed petrol / lubricant intended for use in mopeds, motorcycles, etc.
- Use full synthetic 2-stroke lubricant only. Do not use automotive lubricant or 2-stroke outboard lubricant.
- Mix 2% full synthetic 2-stroke lubricant into the petrol. This is a 50:1 ratio.
- Mix the fuel thoroughly and also each time before fueling.
- Mix in small quantities. Do not mix quantities larger than usable in a 30 day period. Full synthetic 2-stroke lubricant containing a fuel stabilizer is recommended.

FILLING THE TANK

WARNING

Check for fuel leaks. If any are found, correct them before using the product to prevent fire or burn injury.

- Clean surface around fuel cap to prevent contamination.
- Loosen fuel cap slowly to release pressure and to keep fuel from escaping around the cap.
- Carefully pour fuel mixture into the tank. Avoid spillage.
- Prior to replacing the fuel cap, clean and inspect the gasket.
- Immediately replace fuel cap and hand tighten. Wipe up any fuel spillage. Move 9 m away from refueling site before starting engine.

Note: It is normal for smoke to be emitted from a new engine during and after first use.

WARNING

Always shut off engine before fueling. Never add fuel to a machine with a running or hot engine. Move at least 9 m from refueling site before starting engine. Do not smoke.

1 Litre	+	20 ml	=	} 50:1 (2%)
2 Litres	+	40 ml	=	
3 Litres	+	60 ml	=	
4 Litres	+	80 ml	=	
5 Litres	+	100 ml	=	

STARTING AND STOPPING (Fig. 4a - 4b)

WARNING

Never start or run the engine inside a closed or poorly ventilated area; breathing exhaust fumes can kill.

- Set the switch (6) to the "I" position before trying to start unit.

TO START A COLD ENGINE:

1. Lay the trimmer on a flat, bare surface.
2. Press the primer bulb (1) 10 times.
NOTE: After the 7th press, the fuel should be visible in the primer bulb. If not, continue pressing until the fuel is visible.
3. Set the choke lever (2) to choke position.
4. Hold down the throttle lock (5) and then squeeze the throttle trigger (7).
NOTE: Lock the throttle in position by depressing the throttle interlock button (21) for RBC30SBSB.
5. Hold the foam handle tightly with left hand and pull the starter grip (4) upwards with right hand in a quick, firm and consistent motion until the engine attempts to start. Do not pull the starter grip more than 4 times.
6. Set the choke lever to choke position.
7. Pull the starter grip until the engine starts. Do not pull the starter grip more than 6 times.
NOTE: If the engine does not start, repeat the procedure from step 3.
8. Allow the engine to run for 10 seconds, then set the choke lever to position.

TO START A WARM ENGINE:

1. Press the primer bulb 10 times.
2. Set the choke lever to choke position.
3. Hold down the throttle lock and then squeeze the throttle trigger.
NOTE: Lock the throttle in position by depressing the throttle interlock button for RBC30SBSB.
4. Hold the foam handle tightly with left hand and pull the starter grip upwards with right hand in a quick, firm and consistent motion until the engine starts.

TO STOP THE ENGINE:

- Press and hold the switch in the stop "O" position until the engine stops.

OPERATING THE TRIMMER (Fig. 5)

RBC30SESB : Hold the trimmer with the right hand on the

English (Original instructions)

rear handle and the left hand on the front handle.

RBC30SBSB: Hold the trimmer with the right hand on the trigger handle and the left hand on the left handle.

Keep a firm grip with both hands while in operation. Trimmer should be held at a comfortable position with the trigger handle about hip height.

Always operate trimmer at full throttle. Cut tall grass from the top down. This will prevent grass from wrapping around the shaft housing and string head which may cause damage from overheating. If grass becomes wrapped around the string head, stop the engine, disconnect the spark plug wire, and remove the grass. Prolonged cutting at partial throttle will result in lubricant dripping from the silencer.

CUTTING TIPS (Fig. 6)

When cutting, make sure the cutter head is at a slight angle as shown while still approximately parallel to the ground surface. In tall grass, cut from the top down to ensure the moving parts do not get tangled with the long grass / brush.

Move the head in steady strokes from left to right as you work through the grass / brush.

ADVANCING THE LINE (Fig. 7)

FOR REELEASY™ ONLY

If the line becomes short, tap the head on the ground as shown to extend more line. Take care not to 'crash' it against a hard surface.

OPERATING THE BRUSHCUTTER (Fig. 5)

RBC30SESB: Hold the brushcutter with the right hand on the rear handle and the left hand on the front handle.

RBC30SBSB: Hold the brushcutter with the right hand on the trigger handle and the left hand on the left handle.

Keep a firm grip with both hands while in operation. Brushcutter should be held at a comfortable position with the trigger handle about hip height. Maintain your grip and balance on both feet. Position yourself so that you will not be drawn off balance by the kick-back reaction of the cutting blade.

Adjust the shoulder strap to position the brushcutter at a comfortable operating position and to assure that the shoulder strap will reduce the risk of operator contact with the blade.

Exercise extreme caution when using the blade with this unit. Blade thrust is the reaction which may occur when the spinning blade contacts anything it cannot cut. This contact may cause

the blade to stop for an instant, and suddenly "thrust" the unit away from the object that was hit. This reaction can be violent enough to cause the operator to lose control of the unit. Blade thrust may occur without warning if the blade snags, stalls or binds. This is more likely to occur in areas where it is difficult to see the material being cut. For cutting ease and safety, approach the weeds being cut from the right to the left. In the event that an unexpected object or woody stock is encountered, this could minimise the blade thrust reaction.

CUTTING TECHNIQUE - BLADE (Fig. 8)

WARNING

Extreme care must be taken when using blades to ensure safe operation. Read the safety information for safe operation using the blade, refer to "Specific Safety Rules for Brushcutter and Blade Use" earlier in this manual.

MAINTENANCE

WARNING

Use only original manufacturer's replacement parts, accessories and attachments. Failure to do so can cause possible injury, poor performance and may void your warranty.

- The cutting attachment must not work in idle mode. If this requirement is not satisfied, the clutch has to be adjusted or the machine needs an urgent maintenance by a qualified technician.
- You may make adjustments and repairs described here. For other repairs, have the trimmer serviced by an authorized service agent.
- Consequences of improper maintenance may include excess carbon deposits resulting in loss of performance and discharge of black lubricant residue dripping from the muffler.
- Make sure all guards, straps, deflectors and handles are properly and securely attached to avoid the risk of personal injury.

STRING REPLACEMENT (Fig. 9)

FOR REELEASY™ ONLY

- Ensure the unit is in the off position
- Remove the spark plug lead to prevent accidental starting.
- Use a 2.4mm diameter monofilament string.
- Cut one piece of string approximately 6 m in length.
- Rotate the knob on the string head until the line on knob aligns with the arrows on the top of string head.

English (Original instructions)

- Insert one end of the string into the eyelet located on the side of the string head and push until string comes out through eyelet on the other side. Continue to push string through the string head until the middle section of the string is inside the string head and string outside the string head is evenly divided on each side.
- Rotate the knob on the string head clockwise to wind the string.
- Wind the string until approximately 20cm remains protruding from the string head.

BLADE PROTECTOR (Fig. 10)

Always place the blade protector on the blade when the unit is not in use. The blade protector has clips round the edges to snap over the blade and keep it in place. Wear gloves and be cautious when handling the blade.

NOTE: Always remove the blade protector before using the unit. If not removed, the blade protector could become a thrown object as the blade begins to turn.

CLEANING THE EXHAUST PORT AND SILENCER

Depending on the type of fuel used, the type and amount of lubricant used, and/or your operating conditions, the exhaust port and silencer may become blocked with carbon deposits. If you notice a power loss with your petrol powered tool, a qualified service technician will need to remove these deposits to restore performance.

SPARK ARRESTOR

It is recommended to clean or replace the spark arrestor every 25 hours to ensure proper performance of your product. Spark arrestors may be in different locations depending on the model purchased. Please contact your nearest service dealer for the location of the spark arrestor for your model.

ATTACHING THE HANGER CAP (Fig. 11)

To use the hanger cap, push in the button and place the hanger cap over the lower end of the attachment. Slightly rotate the cap from side to side until the button locks into place.

NOTE: The secondary hole in the attachment shaft can be used for hanging purposes as well.

CLEANING THE AIR FILTER SCREEN (Fig. 12)

For proper performance and longer life, keep the air filter screen clean.

- Remove the air filter cover by pushing down the latch while gently pulling out the cover.
- Brush the air filter screen lightly.

- Replace the air filter cover by inserting the tabs of the cover into the slots on the air filter base, then push the cover up until it latches securely in place.

FUEL CAP

WARNING

A leaking fuel cap is a fire hazard and must be replaced immediately.

SPARK PLUG (Fig. 13)

This engine uses a Champion RCJ-6Y or equivalent spark plug with 0.63 mm electrode gap. Use an exact replacement.

STORAGE (1 MONTH OR LONGER)

- Drain all fuel from tank into a container approved for fuel. Run engine until it stops.
- Clean all foreign material from the trimmer. Store it in a well-ventilated place that is inaccessible to children. Keep away from corrosive agents such as garden chemicals and de-icing salts.
- Abide by all ISO and local regulations for the safe storage and handling of fuel. Excess fuel should be used up in other 2-stroke engine powered equipment.

English (Original instructions)

TROUBLESHOOTING

IF THESE SOLUTIONS DO NOT SOLVE THE PROBLEM, CONTACT YOUR AUTHORISED SERVICE DEALER.

PROBLEM	POSSIBLE CAUSE	SOLUTION
Engine will not start.	No spark. No fuel. Engine is flooded. Starter rope now harder to pull than when new. Old fuel.	The spark plug may be damaged, remove it and check for dirt and cracks. Replace with a new spark plug. Push primer bulb until bulb is full of fuel. If bulb does not fill, primary fuel delivery system is blocked. Contact a servicing dealer. If primer bulb fills, engine may be flooded, proceed to next item. Remove spark plug, turn unit so spark plug hole is aimed at the ground. Rotate the choke dial to "⚡" position and pull starter cord 10 to 15 times. This will clear excess fuel from engine. Remove any fuel which splashed on the product. Clean and reinstall spark plug. Clean up any spilled fuel and move at least 9m away before restarting. Pull starter three times with choke dial at "⚡". If engine does not start, rotate choke dial to "I-I" position and repeat normal starting procedure. If engine still fails to start, repeat procedure with a new spark plug. Contact a servicing dealer. Only use fresh fuel mixed with recommended oil. Fuel over 30 days old may prevent the unit from starting.
Engine starts but will not accelerate.	Engine requires approximately three minutes to warm up.	Allow engine to completely warm up. If engine does not accelerate after three minutes, contact a servicing dealer.
Engine starts but will only run at high speed at half choke.	Carburetor requires adjustment.	Contact a servicing dealer.
Engine does not reach full speed and emits excessive smoke.	Check lubricant fuel mixture. Air filter is dirty. Spark arrestor screen is dirty.	Use fresh fuel and the correct 2-stroke lubricant mix. Clean air filter. Refer to Cleaning the Air Filter Screen earlier in this manual. Contact a servicing dealer.
Engine starts, runs, and accelerates but will not idle.	Idle speed screw on carburetor requires adjustment	Contact a servicing dealer.
Blade continues to rotate at idle speed.	Carburetor requires adjustment.	Contact a servicing dealer.
Line will not advance.	1. Line welded to itself. 2. Not enough line on spool. 3. Line worn too short. 4. Line tangled on spool. 5. Engine speed too slow.	1. Lubricate with silicone spray. 2. Install more line. Refer to "Line Replacement" earlier in this manual. 3. Pull lines while alternately pressing down on and releasing bump head. 4. Remove line from spool and rewind. Refer to "Line Replacement" earlier in this manual. 5. Advance line at full throttle.

- PL Sprawdzanie po upuszczeniu lub innych uderzeniach:** Należy dokładnie sprawdzić produkt w celu stwierdzenia wszelkich uszkodzeń.
- CS Prohlídka po pádu či jiných úderech:** Výrobek řádně prohlédněte a zjistěte vady či poškození. Jakýkoliv poškozený díl je nutné správně opravit nebo nechat vyměnit v autorizovaném servisním středisku.
- HU Leesés vagy más ütés utáni átvizsgálás:** Alaposan vizsgálja át a terméket, és keresse meg az esetleges behatásokat vagy sérüléseket. A sérült alkatrészeket egy hivatalos szervizközpontban kell megjavíttatni vagy kicseréltetni.
- RO Inspectia după cădere sau alte impacturi:** Inspectați amănunțit produsul și identificați orice defecțiuni sau pagube ale acestuia. Orice piesă deteriorată trebuie să fie reparată în mod corespunzător sau înlocuită de un service autorizat.
- LV Pārbaude pēc nosvievšanas vai citiem triecieniem:** Rūpīgi pārbaudiet produktu un nosakiet jebkādas radušās vainas vai bojājumus. Jebkura bojāta detaļa jānodod remontam vai nomainītai pilnvarotā apkopes centrā.
- LT Patikrinimas įrankiui nukritus ar po kitų smūgių:** Atidžiai patikrinkite prietaisą, ar jis nepažeistas. Bet kurią apgadintą detalę leidžiama remontuoti arba keisti tik autorizuotame aptarnavimo centre.
- ET Kontrollige pärast mahakukkumist või saadud lööki:** Kontrollige saag hoolikalt üle ja tehke kindlaks võimalikud rikked ja vigastused. Vigastatud osad tuleb lasta pädeval hooldajal parandada või asendada.
- HR Proverite nakon pada ili drugih udara:** Temeljito proverite proizvod i identifikirajte sve utjecaje ili oštećenja. Svaki oštećeni dio treba o pravilno popraviti ili zamijeniti ovlaštenu servisnu centar.
- SL Pregled, če naprava pade ali prejme drug udarec:** Temeljito preglejte izdelek in opazujte, ali je morda poškodovan. Vsak poškodovani del mora ustrezno popraviti ali zamenjati pooblaščenim servisnim centrom.
- SK Kontrola po páde či iných nárazoch:** Dôkladne skontrolujte produkt a zistite na ňom prípadné poruchy, či poškodenia. Akýkoľvek poškodený diel sa musí náležite opraviť alebo vymeniť v autorizovanom servisnom centre.
- BG Проверка след изпускане или други удари:** Внимателно проверете продукта и установете дали е засенат, или има повреда по него. Всяка повредена част трябва да бъде поправена или заменена от упълномощен сервисен център.

EN CLEAN AND REPLACE THE FOAM FILTER (FIG. 14)

- Remove the air box cover from the engine.
- Remove the air filter.
- Clean the foam filter. If damaged, replace immediately.
- Reinstall the foam filter.
- Reinstall the air filter.

FR NETTOYEZ ET REMPLACEZ LE FILTRE EN MOUSSE (FIG. 14)

- Retirez le couvercle de la boîte à air du moteur.
- Retirez le filtre à air.
- Nettoyez en place le filtre en mousse. Si elles sont endommagées, faites-les remplacer immédiatement.
- Remettez en place le filtre en mousse.
- Remettez le filtre à air.

DE REINIGUNG DES LUFTFILTERSIEBES (ABB. 14)

- Entfernen Sie den Deckel des Luftfilterkastens von dem Motor.
- Entfernen Sie die den Luftfilter
- Reinigen sie den Schaumstofffilter. Ersetzen Sie es unverzüglich, falls es beschädigt sein sollte.
- installieren Sie den Schaumstofffilter.
- Den Luftfilter wieder einbauen.

ES LIMPIE Y SUSTITUYA EL FILTRO DE ESPUMA (FIG. 14)

- Retire la tapa de la caja de aire del motor.
- Retire el filtro de aire
- Limpie el filtro de espuma. Si están dañadas, sustitúyalas cuanto antes.
- Vuelva a instalar el filtro de espuma.
- Vuelva a instalar el filtro de aire.

IT PULIRE E SOSTITUIRE IL FILTRO PER LA SCHIUMA (FIG. 14)

- Rimuovere il coperchio della scatola dell'aria dal motore.
- Rimuovere il filtro dell'aria
- Pulire il filtro in poliuretano. Se appaiono danneggiate, richiederne l'immediata sostituzione.
- Reinstallare il filtro in poliuretano.
- Reinstallare il filtro dell'aria.

NL MAAK DE SCHUIMFILTER SCHOON EN VERVANG DEZE (AFB. 14)

- Verwijder het omstelklepdeksel van de motor.
- Verwijder de luchtfilter.
- Reinig de schuimfilter. Bij beschadiging, moeten zij onmiddellijk worden
- vervangen.
- Herbevestig de schuimfilter.
- Plaats het luchtfilter terug.

PT LIMPE E SUBSTITUA O FILTRO DE ESPUMA (FIG. 14)

- Retire a tampa da caixa de ar do motor.
- Retire o filtro de ar.
- Limpe o filtro de espuma. Se estiverem danificadas, mande substituí-las imediatamente.
- Volte a instalar o filtro de espuma.
- Reinstale o filtro de ar.

DA RENS OG UDSKIFT SKUMFILTRET (FIG. 14)

- Fjern luftdækslet fra motoren.
- Fjern luftfilteret.
- Rens skumfilteret. Beskadigede skumfilteret skal udskiftes omgående.
- Genmonter skumfilteret.
- Montér luftfilteret igen.

SV RENGÖR OCH SÄTT TILLBAKA SKUMFILTRET (FIG. 14)

- Ta bort luftlädeskyddet från motorn.
- Ta bort luftfiltret.
- Rengör skumgummifiltret. Byt omedelbart ut om den är skadad.
- Sätt tillbaka skumgummifiltret.
- Sätt tillbaka filtret.

FI PUHDISTA JA VAIHDA VAAHTOSUODATIN (KUVA 14)

- Poista imukotelon kansi moottorista.
- Irrota ilmansuodatin
- Puhdista vaahtomuovisuodatin. Mikäli ne ovat vialliset, vaihda ne välittömästi.
- Asenna vaahtomuovisuodatin.
- Asenna ilmansuodatin uudelleen.

NO RENGJØR OG SETT TILBAKE SKUMFILTERET (FIG. 14)

- Fjern luftboksdekslet fra motoren.
- Fjern luftfilteret.
- Rengjør skumfilteret. Hvis skadet må den øyeblikkelig skiftes ut.
- Reinstaller skumfilteret.
- Sett på plass filteret igjen.

RU ОЧИСТИТЕ И УСТАНОВИТЕ НА МЕСТО ПЕНОПЛАСТОВЫЙ ФИЛЬТР (РИС. 14)

- Снимите крышку воздушной камеры с двигателя.
- Снимите воздушный фильтр.
- Очистите на пенопластовый фильтр. В случае повреждения сразу же замените его.
- Установите на пенопластовый фильтр.
- Установите воздушный фильтр.

EN GUARANTEE

In addition to any statutory rights resulting from the purchase, this product is covered by a guarantee as stated below.

1. The guarantee period is 24 months for consumers and commences on the date when the product was purchased. This date has to be documented by an invoice or other proof of purchase. The product is designed and dedicated to consumer and private use only. So there is no guarantee provided in case of professional or commercial use.
2. There is, in some cases (i.e. promotion, range of tools), a possibility to extend the warranty period over the period described above using the registration on the www.ryobitools.eu website. The eligibility of the tool is clearly displayed in stores and/or on packaging. The end user needs to register his/her newly-acquired tools online within 8 days of the date of purchase. The end user may register for the extended warranty in his country of residence if listed on the online registration form where this option is valid. Furthermore, end users must give their consent to the storage of the data which are required to enter online and they have to accept the terms and conditions. The registration confirmation receipt, which is sent out by e-mail, and the original invoice showing the date of purchase will serve as proof of the extended warranty. Your statutory rights remain unaffected.
3. The guarantee covers all defects of the product during the warranty period due to defaults in workmanship or material at the purchase date. The guarantee is limited to repair and/or replacement and does not include any other obligations including but not limited to incidental or consequential damages. The warranty is not valid if the product has been misused, used contrary to the instruction manual, or being incorrectly connected. This guarantee does not apply to
 - any damage to the product that is the result of improper maintenance
 - any product that has been altered or modified
 - any product where original identification (trade mark, serial number) markings have been defaced, altered or removed
 - any damage caused by non-observance of the instruction manual
 - any non CE product
 - any product which has been attempted to be repaired by a non-qualified professional or without prior authorization by Techtronic Industries
 - any product connected to improper power supply (amps, voltage, frequency)
 - any product used with inappropriate fuel mixture (fuel, oil, percentage of oil)
 - any damage caused by external influences (chemical, physical, shocks) or foreign substances
 - normal wear and tear of spare parts
 - inappropriate use, overloading of the tool
 - use of non-approved accessories or parts
 - carburettor after 6 months, carburettor adjustments after 6 months
 - components (parts and accessories) subject to natural wear and tear, including but not limited to bump knobs, drive belts, clutch, blades of hedge trimmers or lawn mowers, harness, cable throttle, carbon brushes, power cord, lines, felt washers, hitch pins, blower fans, blower and vacuum tubes, vacuum bag and straps, guide bars, saw chains, hoses, connector fittings, spray nozzles, wheels, spray wands, inner reels, outer spools, cutting lines, spark plugs, air filters, gas filters, mulching blades, etc.
4. For servicing, the product must be sent or presented to an RYOBI authorized service station listed for each country in the following list of service station addresses. In some countries your local RYOBI dealer undertakes to send the product to the RYOBI service organisation. When sending a product to an RYOBI service station, the product should be safely packed without any dangerous contents such as petrol, marked with sender's address and accompanied by a short description of the fault.
5. A repair/replacement under this guarantee is free of charge. It does not constitute an extension or a new start of the guarantee period. Exchanged parts or tools become our property. In some countries delivery charges or postage will have to be paid by the sender.
6. This guarantee is valid in the European Community, Switzerland, Iceland, Norway, Liechtenstein, Turkey and Russia. Outside these areas, please contact your authorized RYOBI dealer to determine if another warranty applies.

AUTHORISED SERVICE CENTRE

FR GARANTIE

En plus des droits statutaires liés à l'achat, ce produit est couvert par une garantie telle que décrite ci-dessous.

1. La durée de la garantie accordée au consommateur est de 24 mois à partir de la date d'achat. Cette date doit être authentifiée par une facture ou tout autre preuve d'achat. Le produit a été conçu en vue d'une utilisation strictement privée. Aucune garantie ne s'applique donc en cas d'utilisation professionnelle ou commerciale.
2. Il existe, dans certains cas (par exemple promotion, gamme d'outils), une possibilité d'étendre la période de garantie au-delà de la période précédemment décrite en utilisant le formulaire d'enregistrement présent sur le site Internet www.ryobitools.eu. L'éligibilité d'un outil est clairement affichée dans les points de vente et/ou sur l'emballage. L'utilisateur final doit enregistrer son/ses outil(s) nouvellement acheté(s) en ligne dans les 8 jours qui suivent la date d'achat. L'utilisateur a la possibilité de s'enregistrer pour l'extension de garantie dans son pays de résidence si celui-ci est listé dans le formulaire d'enregistrement en ligne ou cette option est valide. L'utilisateur final doit donner son consentement pour l'enregistrement des données requises pour accéder au site et doit accepter les termes et conditions. La confirmation d'enregistrement, envoyée par courrier électronique, ainsi que la facture originale mentionnant la date d'achat serviront de preuve de l'extension de garantie. Vos droits statutaires restent inchangés.
3. La garantie couvre les défauts des pièces et de main d'oeuvre du produit pendant la période de garantie à partir de la date d'achat. La garantie n'inclut aucune autre obligation, tel que, mais sans s'y limiter, les dommages accessoires ou indirects. La garantie est non valable en cas de mauvaise utilisation du produit, d'utilisation contraire aux instructions du mode d'emploi, ou en cas de branchement incorrect. Cette garantie ne s'applique pas pour :
 - tout dommage au produit résultant d'un mauvais entretien
 - tout produit ayant été altéré ou modifié
 - tout produit dont les marquages originaux d'identification (marque, numéro de série) ont été dégradés, altérés ou retirés
 - tout dommage causé par le non-respect des instructions du mode d'emploi
 - tout produit non CE
 - tout produit ayant subi une tentative de réparation par du personnel non qualifié ou sans autorisation préalable de Techtronic Industries
 - tout produit raccordé à une alimentation secteur non conforme (ampérage, voltage, fréquence)
 - tout produit utilisé avec un mélange inapproprié (essence, huile, pourcentage d'huile)
 - tout dommage causé par des influences extérieures (chimiques, physiques, chocs) ou par des substances étrangères
 - l'usure normale des pièces consommables
 - une utilisation inappropriée, une surcharge de l'outil
 - l'utilisation de pièces ou accessoires non agréés
 - les carburateurs après plus de 6 mois à compter de la date d'achat, également les réglages du carburateur après plus de 6 mois à compter de la date d'achat
 - les composants (pièces et accessoires) sujets à une usure naturelle, incluant de façon non exhaustive les têtes de fil à frapper, les courroies de transmission, les embrayages, les lames des taille-haies ou des tondeuses à gazon, les hamais, les câbles d'accélérateur, les charbons, les cordons d'alimentation, les fraises de cultivateurs, les rondelles feutre, les gouilles de fraise, les turbines et lame de broyage des souffleurs, les tubes de soufflage et d'aspiration des souffleurs, les sacs de souffleurs et leurs lanières, les guides-chaîne, les chaînes de tronçonneuses, les tuyaux et raccords, les buses et lances de nettoyeurs haute pression, les roues, les recharges de fil des têtes de coupe, les têtes de coupe, le fil de coupe, les bougies d'allumage, les filtres à air, les filtres à essence, etc.
4. Si le produit doit être réparé, envoyez-le à un service après-vente agréé RYOBI dont vous trouverez ci-dessous la liste pour chaque pays. Dans certains pays, votre revendeur RYOBI se chargera d'envoyer le produit à un centre de réparation RYOBI. Lorsque vous envoyez un produit à un service après-vente RYOBI, celui-ci doit être correctement emballé, sans contenir aucun produit dangereux tel que de l'essence, et vous devez indiquer votre adresse ainsi qu'une courte description du problème.
5. Une réparation / un remplacement sous garantie est gratuit(e). Ceci ne constituera pas une extension de garantie ni un nouveau départ de la période de garantie. Les pièces ou les outils remplacés deviennent notre propriété. Dans certains pays, les frais de port devront être assumés par l'expéditeur.
6. Cette garantie est valable au sein de l'Europe, de la Suisse, de l'Islande, de la Norvège, du Liechtenstein, de la Turquie, de la Russie. En dehors de ces zones, veuillez contacter votre distributeur agréé RYOBI pour déterminer si une autre garantie s'applique.
