

Shelving Assembly Instructions

700-0814

COMPONENTS

Please read your instructions before assembly.
Assembly details of 4 and 5 shelf units are different.

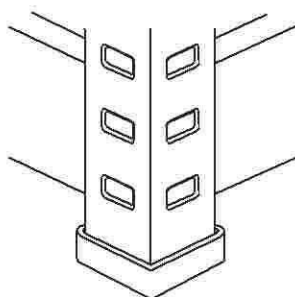

TOOLS REQUIRED

- Mallet

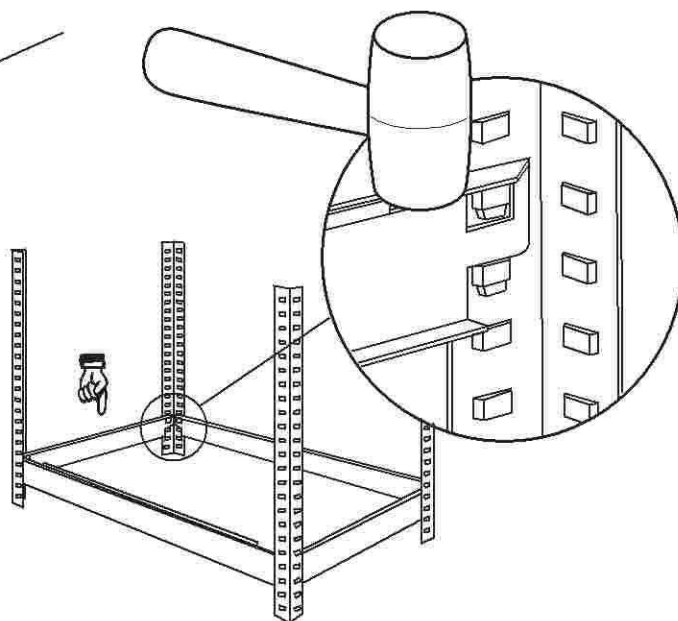

SAFETY INFORMATION

- Sharp Corners, Please handle with care.
- Shelving should be fastened to the wall where possible (fasteners not included).
- Always place heavier items on the lower shelves.
- Always evenly distribute your loads across the shelves where possible.

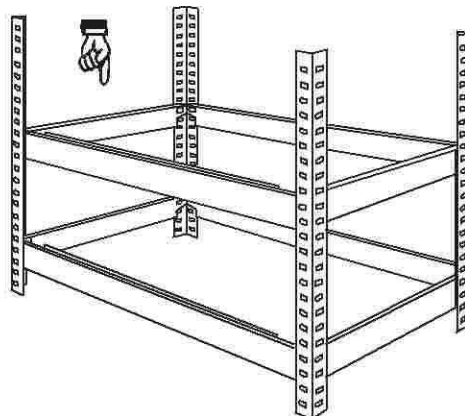

- 1 Fit the floor protectors provided on the end of each leg.

- 2 Decide on the position you require the bottom shelf to be. **Fit 1 short shelf support** between the 2 leg angles. Repeat this again making sure the same short shelf support is at the same height. **Now fit the 2 long shelf supports** matching the 2 short shelf supports. **Always hammer gently**, being sure the shelf support tabs are in line with the leg angle shots. **If the tabs are out of line**, simply bend them to line up either way to suit. Do not use force and damage the tabs. **When hammering the shelf supports**, do not hit upturned flange, always hammer the leg surface closest to the angle.

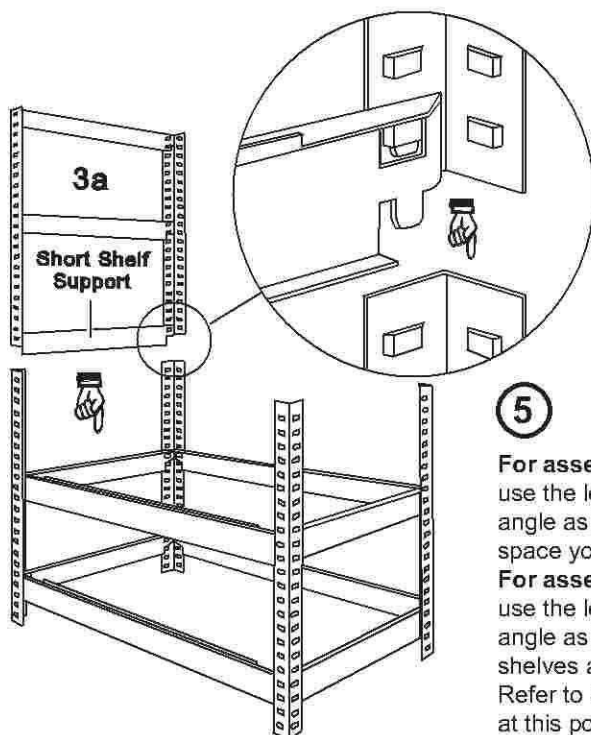

- 3 Fit another 2 short shelf supports at the desired height then fit the 2 long shelf supports to match the short shelf supports.

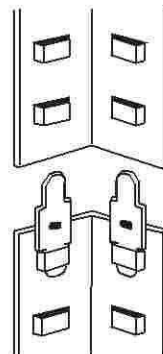

4

For assembly as a 5 shelf unit, fit the short shelf support between the top leg angles using the bottom support to join the top and bottom leg angles in the center unit as illustrated (3a). Now repeat this at the other end and fit the 2 long shelf supports again matching the short shelf supports.

5

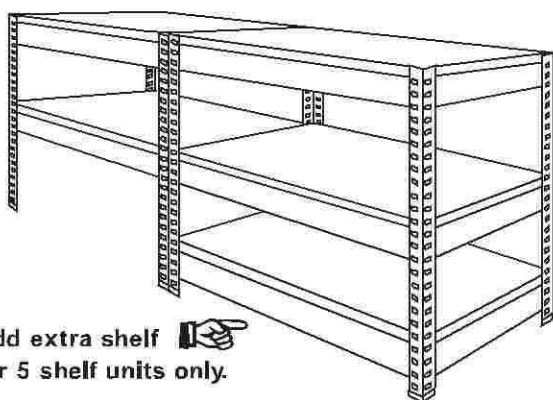

For assembly as a 4 shelf unit, use the leg joiners in each leg angle as illustrated if you want to space your shelves equally apart. For assembly as a 5-shelf unit, use the leg joiners in each leg angle as illustrated if none of your shelves are positioned at this point. Refer to Step 3. for putting a shelf at this point.

7

Assembling as a standard bench

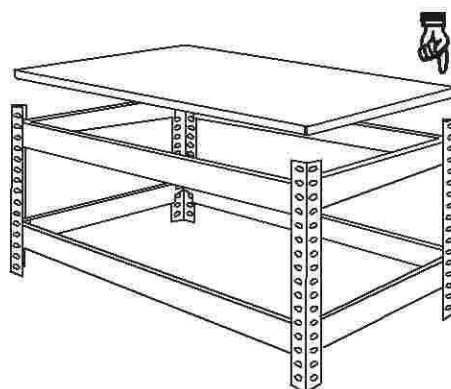

Refer to Step 1 and Step 2, except in Step 2, the center 4 shelf supports go to the top of 4 leg angles and move the bottom 4 midway to suit your needs. Repeat this again and bolt the two frames together with the nuts and bolts supplied, then place the 4 MDF shelves as in step 5. If you have a 5 shelf unit, add the extra shelf as illustrated.

Add extra shelf for 5 shelf units only.

6

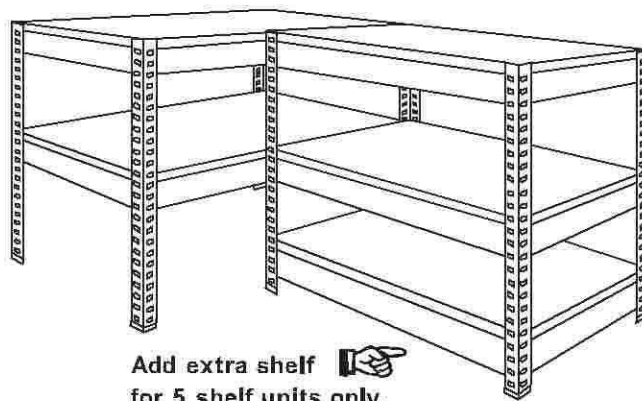

Fit the MDF shelves onto the shelf supports after full assembly. The corners of the shelves will fit into the corners of the leg angles.

8

Assembling as a corner bench

The same assembly instructions apply as Step 7 except you bolt the bench together at right angles as illustrated.

Add extra shelf for 5 shelf units only.
