Connecting to an external sound system

Should you wish to connect the turntable to an external amplifier follow the below steps.

1. Connect an RCA audio cable (not supplied) to the AUDIO LINE OUT sockets on the rear of the turntable.

Take care to match the RED/WHITE plugs to the corresponding RED/WHITE sockets.

2. Connect the other end of the cable to an AUDIO INPUT on the amplifier (check your amplifier user manual if you are not sure).
3. The volume control on the turntable will have no effect on the volume level when connected this way. All volume controls should be operated from the amplifier.

Turn the volume on the turntable all the way down, so it does not interfere with the external sound system.

Listening to an external source

Connect other audio sources such as a smartphone to the turntable to allow playback through the built-in speakers. Follow the below steps to get connected.

1. Connect a 3.5mm audio cable (not supplied) to the AUX IN socket on the rear of the turntable. The platter will stop spinning if playing a record.
2. Connect the other end to the earphone/Line out socket on the smartphone.
3. Begin playback on the smartphone.
4. Adjust the volume.
5. When connecting via the headphone output the volume of the built-in speakers is affected by the volume control on the smartphone. Ensure that the smartphone volume is set to about 70-80% to avoid distortion.

Handling vinyl

Vinyl records can get dusty. This will cause a build-up of dust on the stylus during playback.

Keeping your vinyl collection clean and cleaning before use will reduce noisy crackles during playback and increase your listening experience.

Should you get a dust build-up on the stylus, gently dust off with a soft brush from back to front as shown.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting**

Fitting the dust cover

Refer to the diagram below to attached the plastic dust cover.

Take care when fitting, and do not press down too hard. Remove the dust cover in the same manner, but pull the cover upwards.

Using your Turntable

Let's get started

Getting started

1. Remove all packaging from the turntable including the security wire around the tone-arm rest/lock (2) and the white plastic cartridge protector.
2. Place the turntable on a stable surface.

Connecting the power

Fig 1.

1. Insert the USB plug end of the supplied cable into mains adapter socket. Then insert the other end into the DC mains input socket (9) on the rear of the turntable. (Fig 1)

Fig 2.

2. Extend the central earth pin upwards on the adapter, then connect to a wall socket and switch on. (Fig 2)

Turn the power On/Off

1. Rotate the ON/OFF/Volume control knob (12) clockwise until you hear a click and the POWER LED (13) illuminates.
2. To power off the turntable rotate the ON/OFF/Volume control knob (12) anti-clockwise until you hear a click and the POWER LED goes off.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting**

Using your Turntable

Let's get started

Play a record

1. Before use, ensure the security wire (tone-arm rest/lock) and the cartridge protector (stylus/cartridge) have been removed. And the tonearm lock is released.
2. Place a record on the turntable platter (1).
3. Select the speed required using the speed selector switch (6).
4. Raise the tone-arm (5) using the tone-arm lift lever (7). As you move the tonearm towards the record the turntable begins spinning. Lower the needle gently onto the outer edge of the record using the tone-arm lift lever (7).
5. Rotate the ON/OFF/Volume control knob (12) to increase or decrease the volume level.
6. When the record has finished playing the tone-arm will raise and return to the rest position.

Replacing the turntable stylus/needle

NOTE Please replace the stylus/needle with extreme care to avoid damage to the tone-arm and cartridge.

1. Carefully separate the red plastic section from the bottom of the cartridge.

2. Connect the new stylus/needle to the cartridge.
