Argyll Chair Light Grey Check 265/1505

Argyll Chair Blue Yellow Check 320/0869

Argyll Chair Green Check 320/9169

Argyll Footstool Blue Charcoal Check 195/7712

Argyll Footstool Light Grey Check 197/1815

Argyll Footstool Blue Yellow Check 193/1336

Argyll Footstool Green Check 318/1988

IMPORTANT, RETAIN FOR FUTURE REFERENCE: READ CAREFULLY.

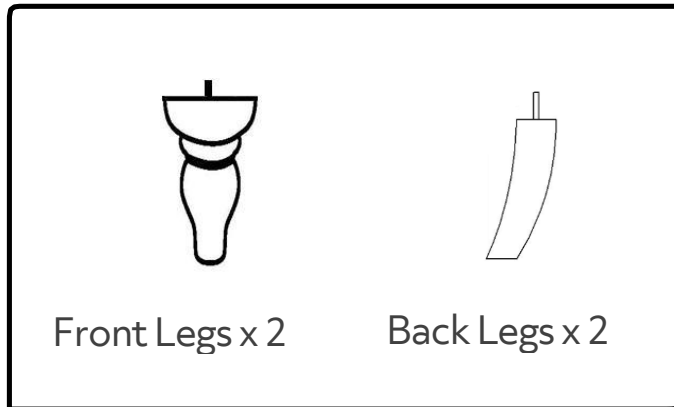

- Keep children and animals away from the work area, small parts could choke if swallowed.
- Make sure you have enough space to layout the parts before starting.
- This product has been constructed to be used in the domestic environment only and not for commercial purposes.
- Assemble the item as close to its final position (in the same room) as possible.
- Assemble on a soft level surface to avoid damaging the unit or your floor.
- Keep all plastic wrapping materials away from children to avoid danger of suffocation.
-  • We do not recommend the use of power drill/drivers for inserting screws as this could damage the unit. Only use hand screwdrivers.
- Parts of the assembly will be easier with 2 people.
- Dispose of all packaging carefully and responsibly.

Additional Guidance

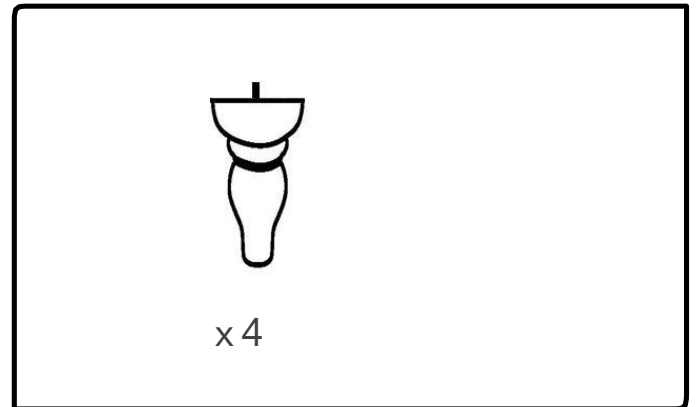

- Maximum user weight 110kg.
- This product is compliant BS5852.

Parts & Fittings for the Argyll

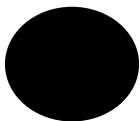

Component Legs for Chair

Component Legs for Footstool

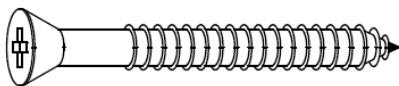

Component Fittings

Felt Pad x 4

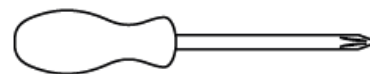

Plastic Washer x 4

70mm Screw x 4

Tools required

Phillips screwdriver (medium)

Before you start

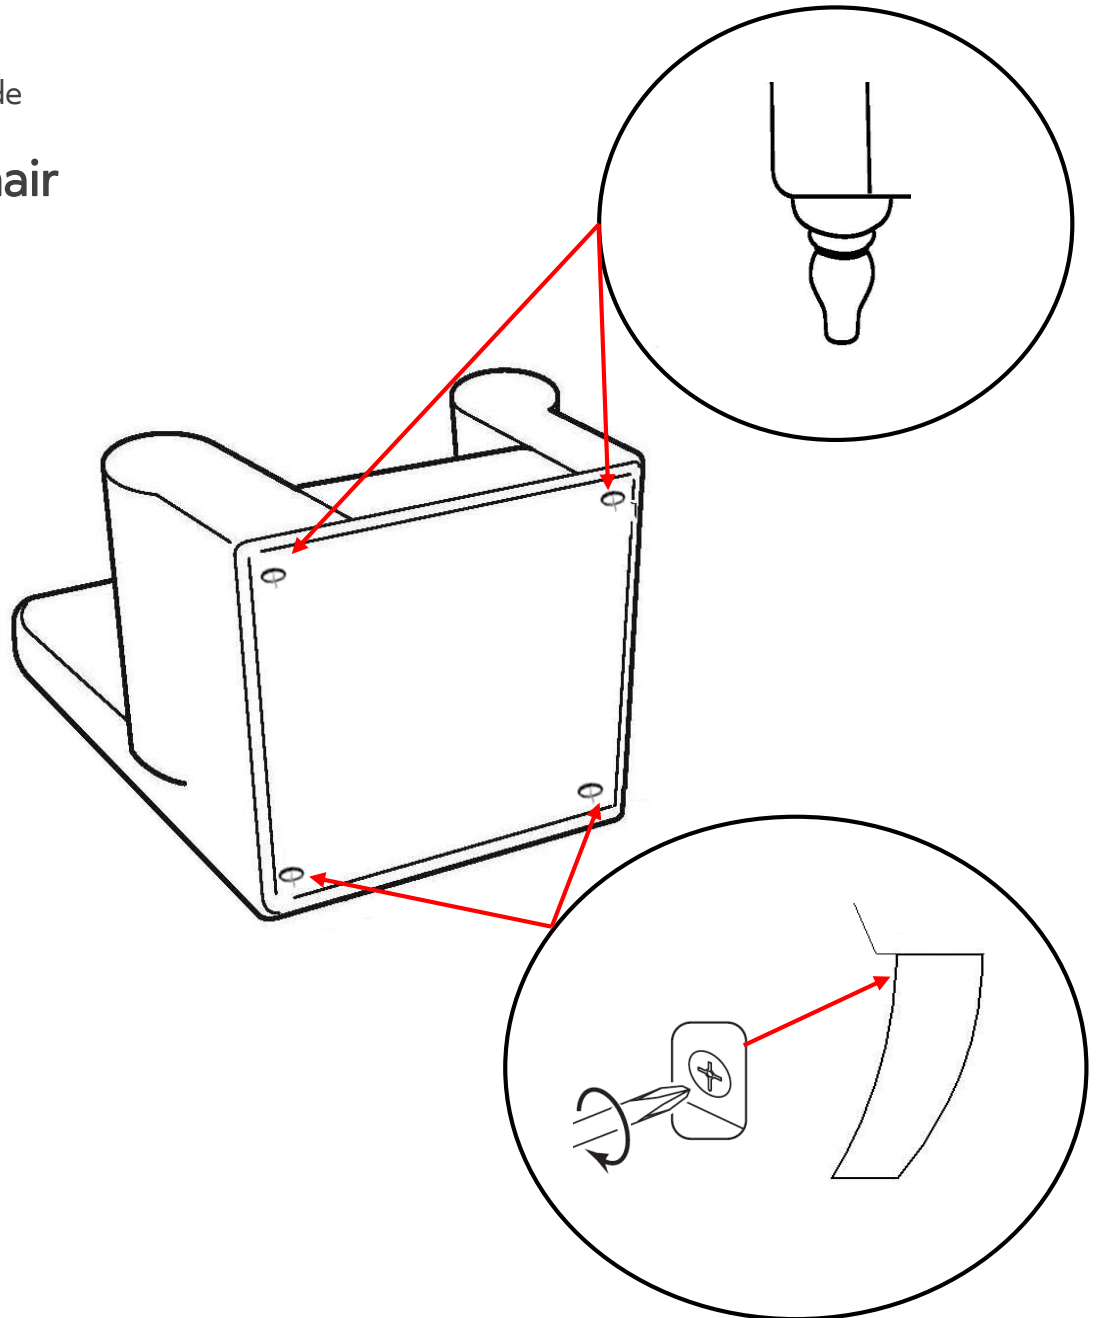

Check the pack and make sure you have all the parts listed above. If not, contact Click Spares or Customer Support using the contact details provided on the front of the Assembly Instructions.

When you are ready and sure that you have the right tools to hand, you will need plenty of space and a clean dry area for assembly.

Ready?

Follow this step-by-step guide

Feet Assembly Chair

TOP TIP

It is recommended that two people lift and tilt the chair in the correct position to assemble the legs.

Step 1: Lift the chair and lay it gently on its back onto a clean surface.

Step 2: Feet and Hardware are located inside the bottom of the chair, open the zipper to access the package.

Step 3: Place the plastic washer on the thread of the front feet and then insert into the base of the chair by turning the leg clockwise by hand until tight.

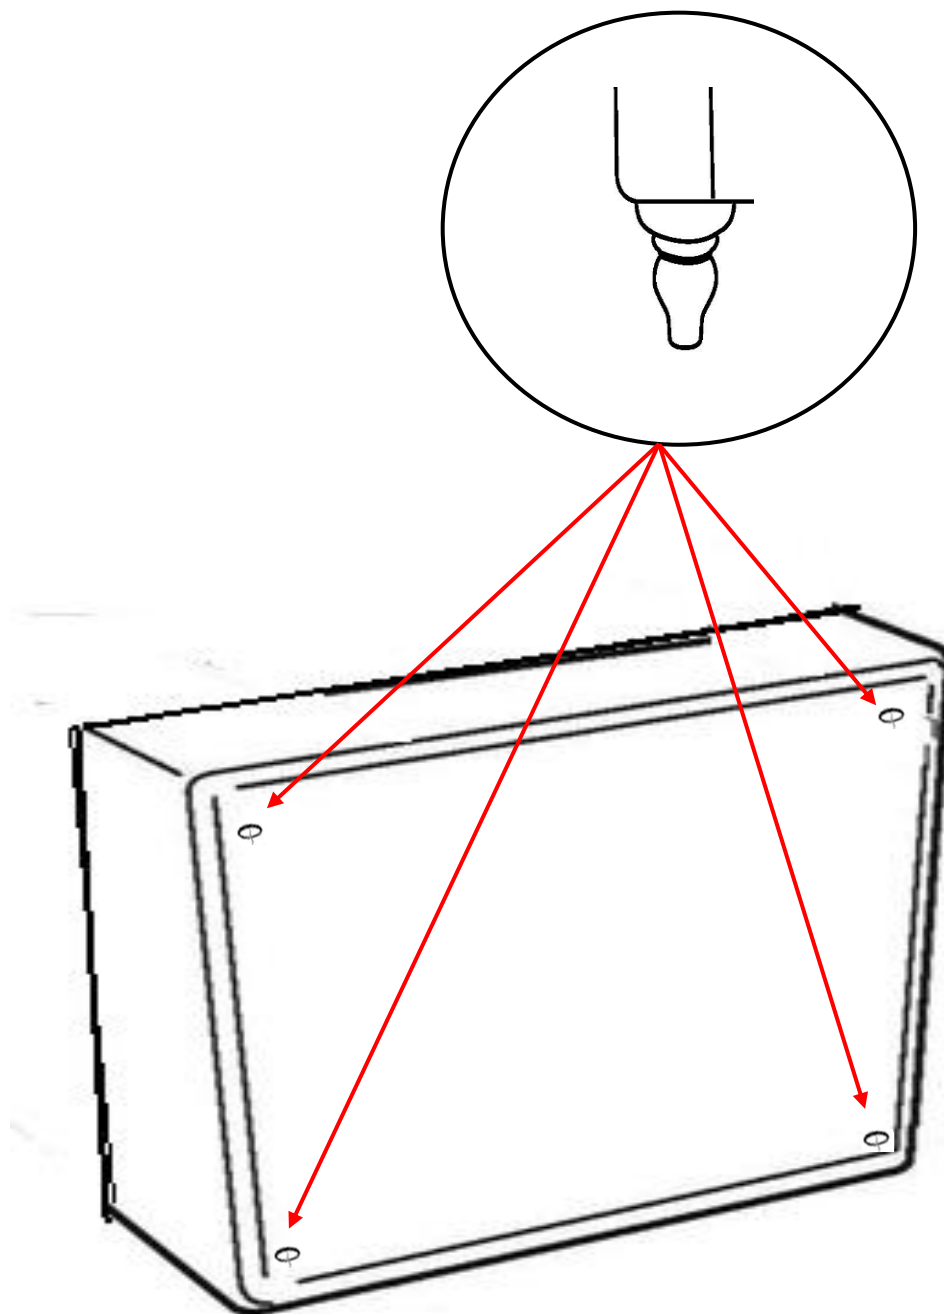

Step 4: Apply self-adhesive felt pads to the bottom of each leg.

Step 5: Place the plastic washer on the thread of the back feet and then insert into the base of the chair by turning the leg clockwise by hand until tight.

Step 6: To secure the back feet insert a screw in the hole at the back of the foot and screw into the frame using a phillips screwdriver.

Step 7: Lift the sofa upright and place in desired location, avoid using the feet as a lever to prevent breaking them.

Feet Assembly Footstool

- Step 1: Lift the chair and lay it gently on its back onto a clean surface.
- Step 2: Feet and Hardware are located inside the storage compartment of the footstool, open the footstool lid to access the package.
- Step 3: Place the plastic washer on the thread of the feet and then insert into the base of the footstool by turning the leg clockwise by hand until tight.
- Step 4: Apply self-adhesive felt pads to the bottom of each leg.
- Step 5: Lift the footstool upright and place in desired location, avoid using the feet as a lever to prevent breaking them.

Care and maintenance

Before your furniture leaves the factory, it is given a final inspection prior to secure wrapping for distribution. Due to tight and secure wrapping to minimise movement during transit, when unwrapped, the sofa may appear a little "distressed". This is entirely normal, and the illustrations below show how to rectify this to restore its original vigor and beauty.

Care and maintenance

- Keep a minimum distance of 20-30 cm between your furniture and any source of heat i.e. fires or radiators.
- Avoid exposing the sofa to direct sunlight or to powerful lamps to as this may result in the leather fading. Protect it by drawing curtains or blinds.
- Vacuum or use a soft brush weekly as accumulated dust and dirt will wear and dull the material.
- **Zips** are fitted to assist in the ease of manufacture and do not necessarily mean the cover is removable for washing or cleaning.
- **Loose Threads** should be cut carefully not pulled as this may unravel the stitching.
- **Biro:** - Remove any Biro marks immediately.
- **Beware of sharp or hot objects:** - Buckles, keys, toys and jewellery can easily snag on the upholstery and cause tears and pulls. Hot objects, such as heat from mugs or cups can permanently disfigure upholstery.
- **Do not** move the sofa by pushing or pulling it by the arms on smooth or rough surfaces. If the sofa has to be moved the correct way to do so, is by lifting it from the base with two persons. Improper handling may lead to the feet or stitching to be damaged.
- **Excessive Force:** - Use your sofa responsibly. Do not jump on the sofa and avoid sitting on the edges of cushions and arms as this may cause distortion and permanent damage.
- Restrain children from climbing or jumping on the furniture, especially in shoes.
- Do not allow domestic pets to claw or climb on the sofa, they have sharp claws which can damage the upholstery. Their saliva is very harmful to leather as are their body fluids and oils.
- The product is designed for interior use only. When the time comes to discard it, do not dispose of the sofa improperly but make use of public waste disposal systems.

Cleaning Information

Thorough Cleaning

Thorough cleaning is recommended at least every 6 months to remove the gradual accumulation of body oils, perspiration, skin acids and general soiling (this includes the oils/hair from pets) Use a specialist cleaning kit, taking into account any advice supplied by the manufacturer.

BEFORE USING ANY CLEANING AIDS, PLEASE READ THE INSTRUCTIONS CAREFULLY AND TEST ON A HIDDEN AREA FIRST.

EMERGENCY CLEANING

If a major spill has occurred requiring immediate attention, please do the following:

- Use a mild unscented soap with distilled water
- Dab the spot carefully with the solution
- Avoid soaking the leather/fabric
- Allow to air dry

IF UNSURE SEEK THE ADVICE OF A PROFESSIONAL

DO NOT USE

- Harsh chemicals like acetone (nail polish remover), bleach, house-hold cleaners or stain removers
- Coloured shoe polish as it will run onto clothes
- Spray polishes, saddle soaps, waxes, "Hide foods"

These create a sticky surface attracting dirt and causing irreversible damage, which can over time, build up layers which will eventually crack, damaging the leather underneath.

Accidental spillage

Where possible:

- Blot excess liquid with a clean lint free absorbent cloth.
- If necessary, sponge the area but do not over wet as water can shrink fabrics or their backing fibres.
- Remember to damp a complete panel to avoid marking
- Always remove stains in the direction of the pile, if any. **BE GENTLE** – do not rub or scrub as this will only spread the stain and can damage fabrics

General dirt and stains

- Use a clean damp lint free cloth (not wet)
- Never use hot water as this can set the stain into the fabric
- Do not use detergents as these can cause colour loss and leave sticky residues

Grease or oil based stains

- Use a propriety spot cleaner working from the edge of the stain inward to avoid spreading

Water based stains

- Use a specialist upholstery cleaner/shampoo. Test in an inconspicuous area first.
- Use the mixture sparingly
- Dab gently from the outer edge, inward
- Dab out shampoo afterwards using warm water

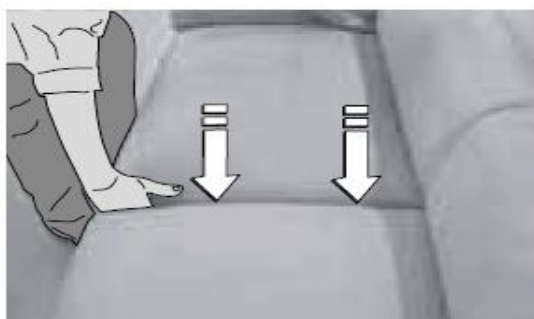

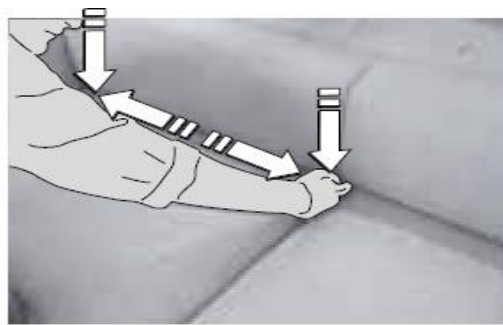

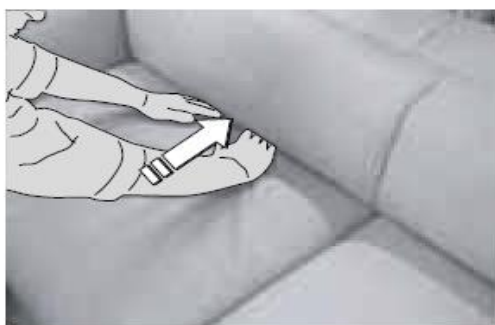

DO NOT SOAK

Cleaners are available from most supermarkets and hardware stores

BEFORE USING ANY CLEANING AIDS, PLEASE READ THE INSTRUCTIONS CAREFULLY AND TEST ON A HIDDEN AREA FIRST IF UNSURE SEEK THE ADVICE OF A PROFESSIONAL

Attention:

- During the first three months of use the polyurethane foam padding used in the seats tends to become softer and then finally stabilizes itself. This process is absolutely natural as when pressure is applied on the seating the micro-cells that comprise the polyurethane break down. This process is perfectly normal for this kind of material and produces a slight softening effect. As above, it is absolutely normal that the softness of a seat / back padding is found to be different from the one adjacent, depending on its usage. Light creases may form on the covering following the above-mentioned natural setting of the padding, which are to be considered absolutely normal and depend on the settling of the upholstery. A correct care and regular maintenance will help to reduce the creases. After you have used the product, dress the covering back into place as shown in the images below. Avoid collecting the creases in the middle of the seat cushions.

Finally, we hope you enjoy your furniture for many years to come and thanks again for your purchase.
