

INTERPRETOR®, the translator based on artificial intelligence for accurate and instantaneous translations in 45 languages!

Thanks to the voice recognition technology, the device recognises your sentence and translates it into a large amount of languages from all around the world. Each language can be either source or target language for your translation.

This speaking translator with written transcription offers an instantaneous and accurate translation, covering a large range of areas and subjects. It is perfectly adapted for professionals during business trips or meetings.

Designed for business conversations, professional trips and travelers, for an easy and practical use!

Interpreter® provides many additional features to facilitate your communication.

- Its large LCD touch-sensitive screen makes the navigation very easy and pleasant.
- The headphones jack allows to listen to the translation and learn in private (headphones not included).
- A neck strap is included to carry it easily
- You can also use the Dictaphone function to keep important information from meetings or trips.
- It works with a built-in rechargeable battery (USB cable included) for an extended use (up to 10h of continuous use, 7 to 10 days in standby mode!)

This translator will be ideal for a professional usage but also for holidays to help you out when you arrive at the airport, at the restaurant, at hotels or just to ask for your way!

List of languages included: Arabic, Arabic (Egypt), Bulgarian, Cantonese, Catalan, Chinese (China, Taiwan), Croatian, Czech, Danish, Dutch, English (US, GB, CA, AU, IE, IN), Finnish, French (France, Canada), German, Greek, Hebrew, Hindi, Hungarian, Icelandic, Italian, Japanese, Korean, Norwegian, Polish, Portuguese (Portugal, Brazil), Rumanian, Russian, Serbian, Sinhala (Tamil), Slovakian, Slovenian, Spanish, Spanish (Mexico), Swedish, Thai, Turkish, Ukrainian.

Two different modes to facilitate communication between people from different countries!

Interpreter® includes 2 modes to be understood in all circumstances:

- Voice translator feature: It translates directly in speaking and written form from one selected language to another. Works via Wi-Fi or offline* for a quick and simple use.
- Group interpreter mode: Connect your translator to several other devices using the "Conference" mode to translate your conversation to several persons and into several languages!

* Offline mode available for a selection of 7 languages
