Instructions for Use

Miracle-Gro® Thick'R Lawn is to be used on thin lawns to create a thicker, greener lawn. We recommend using Miracle-Gro® Patch Magic® to fill large bare patches.

Lawn Preparation

Cut the lawn short at lowest mowing height, rake out dead grass & debris and gently loosen the top soil.

Shake & Apply

Shake well before use to mix the pack contents.

Miracle-Gro® Thick'R Lawn is applied at 50g/m².

Miracle-Gro® Thick'R Lawn should be applied straight after the lawn preparation.

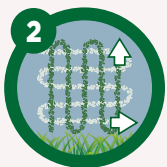

By spreader

It is recommended to apply Miracle-Gro® Thick'R Lawn by an Evergreen Spreader for an even distribution.

Spreader Settings

 50g/m ²	EVERGREEN WIZZ YEAR ROUND SPREADER	7 <i>(Then cover each area twice)</i>
	EVERGREEN HANDY SPREADER	5 <i>(Then cover each 9 times)</i>
	EVERGREEN EASY SPREADER+	7.5
	EVERGREEN DROP SPREADER	17 <i>(Then cover each area twice)</i>
	EASYGREEN ROTARY SPREADER	31.5 <i>(Then cover each area twice)</i>

For any other spreaders' settings, you can visit lovethegarden.co.uk

By hand

The product can be applied by hand at 50g/m² and should be applied evenly. Using your hand, apply half of the product in one direction and the other half in the other direction (criss cross pattern) to get an even coverage. It is recommended to wear gloves when applying by hand.

For a visual guide to the correct application rate, first spread 1 handful over a small measured area.

Aftercare

Watering

If no rain falls within 48 hours, water the product after application.

Then water twice a day or as needed during the first two weeks to keep the surface moist to support seed germination and establishment.

Mowing

Continue with mowing on a regular basis once the lawn reaches the desired mowing height. Regular mowing will help maintain a thick lawn.

Feeding

It is recommended to feed the lawn on a regular basis to maintain a great looking lawn. The first application with a suitable fertiliser can be at 10 weeks after application of Miracle-Gro® Thick'R Lawn. Regular feeding with a suitable fertiliser will help keep the lawn thick and healthy.

When to Use

From March to September. Miracle-Gro® Thick'R Lawn can be applied in spring once the grass is actively growing and frost has passed.

When will I see the results?

The lawn will get greener in 15 days and up to 50% thicker in 30 days*.

Hints & Tips

We recommend you always wear gloves when gardening. Avoid walking or allowing pets on treated areas. It's fine to use Miracle-Gro® Thick'R Lawn in gardens with children and pets, but little feet can damage developing seedlings, so it's best to keep them off the treated areas until the grass has established. Do not exceed the maximum recommended application rate as over-application can damage your lawn.

ALWAYS USE GLOVES

EVERGREEN RESEARCH STATION, UK

2000m² LAWN TESTING FACILITY

Evergreen Research Station is our officially recognised Research and Development Centre in Levington, Suffolk. This unique centre is responsible for driving new product development through process & formulation, physical analysis and field biology. In addition, the team of scientists ensure we maintain our renowned quality through ongoing raw material assessment, formulation preparation and product trials.

On the 2000m² areas of turf, we trial and develop grass seed products, lawn fertilisers and weed and moss control products all year round. Every product is tested in a spectrum of situations where our products can be used, which secures the high quality and performance of our Lawn Products.
