CONCENTRATED TOMATO FOOD

Tomorite® is a concentrated liquid feed enriched with seaweed which encourages high yields of top quality full-flavoured tomatoes. It is also ideal for other special food crops such as sweet peppers and aubergines.

INSTRUCTIONS FOR USE

1. Shake before use.
2. Add required amount to water and stir well.
3. Apply diluted feed to base of plant, avoiding foliage.

HOW TO USE

DOSING RATE: Tomato 20ml for 4.5 litres (1 gallon) of water.

Start feeding when the second truss (stem with flowers and fruits) has pea-sized fruits.

GREENHOUSE: Start feeding when first truss of tomatoes (stem with small green fruits) has pea sized fruits. In soil, feed weekly and use 1.5 litres per plant. Plants in pots feed weekly by soaking the soil around the base of the plants. Grow bags feed weekly, use 1.5 litres per plant. Increase feeding to twice a week when second truss has pea sized fruits, but always water plants with clear water in between two feedings.

OUTDOORS: Start feeding when second truss of tomatoes (stem with small green fruits) has pea sized fruits. In soil, feed every 7-14 days, use 4.5 litres per two plants. Plants in pots feed every 7-14 days by soaking the soil around the base of the plants. Grow bags feed every 7-14 days, use 1.5 litres per plant. Can also be used for courgette, potato, pepper & aubergine. For pepper and aubergine, reduce rates to 10ml in 4.5 litres of water. Only feed when plants are actively growing, and first feeding not before two weeks after planting.

STORAGE & ADVICE

- Wash hands after use and wash splashes from skin.
- Do not keep diluted feed.
- We recommend using gloves when gardening.
- Store out of direct sunlight, in a cool dry place between 5°C and 35°C out of the reach of children.
- Avoid over watering or allowing plants to dry out as this can cause damage to the roots.

**ALWAYS USE
GLOVES**
