# A Guide to - Wall Mounting & Fixing

### Important note:

If plastic wall plugs are supplied with your product:

- these are only suitable for use in masonry walls.

If you are in any doubt about the correct wall plugs for your wall, seek professional advice.

Failure of the product due to using incorrect fixings is the responsibility of the installer

**Important:** When drilling into walls always check that there are no hidden wires or pipes etc.

Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a qualifed tradesperson if you are unsure.

### Hints:

- **1: General rule:** Always use a larger screw and wall plug if you are not sure.
- **2:**Ensure you use the recommended drill bit to match the wall plug and hole size.
- **3:**Ensure you drill the hole horizontally do not force the drill or enlarge the hole.
- **4:**Take extra care when drilling high walls, ceilings and ceramic tiles. Ensure wall plugs are inserted beyond the thickness of the ceramic tiles to avoid the tiles splitting or cracking.
- **5:**Ensure wall plugs are well fitted and are a tight fit in the drilled hole.

You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone or wood.

### Types of walls

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general purpose wall plugs can be used.

#### No.2 "Plasterboard" wall plug

For use when attaching light loads on to plasterboard partitions.

No.3 "Cavity Fixing" wall plug

For use with plasterboard partitions or hollow wooden doors.

#### No.4 "Cavity Fixing-Heavy Duty" wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

**Safety:** Always check the fitting and location to ensure your safety in and around the home.

#### No.5 "Hammer Fixing" wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

#### No.6 "Shield Anchor" wall plug Heavy loads

For use with heavier loads such as TV & HiFi speakers and satelite dishes etc.

**Fitting:** From time to time check the fitting to ensure the wall plugs or screws do not become loose.
