

SWITCH ACTIVATION CONTROL

IMPORTANT! This straightener features delayed activation control to give consistent results and ease of use whilst straightening. Immediately after switching on the straightener you are able to adjust the temperature and activate the 'Sensor Protect' mode. After 5 seconds of the straightener being turned on, the controls will automatically lock. To make any adjustments after the controls have locked, hold down the button of the required setting for 1-2 seconds, this will deactivate the lock mode and allow the settings to be changed. To turn off the straightener whilst in lock mode, hold down the  button for 1-2 seconds until the unit switches off.
