

Getting to know your Echo Studio

Also included: Power cord

Alexa is designed to protect your privacy

Wake word and indicators

Alexa doesn't begin listening until your Echo device detects the wake word (for example, "Alexa"). A blue light or audible tone lets you know when audio is being sent to Amazon's secure cloud.

Microphone controls

You can electronically disconnect the microphones with one press of a button.

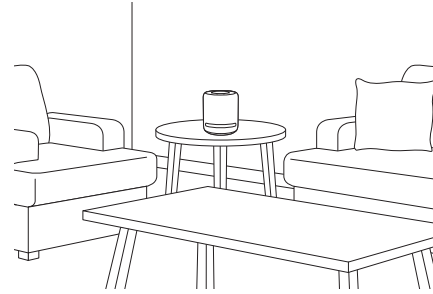

Voice History

Want to know exactly what Alexa heard? You can view and delete your voice recordings in the Alexa app at any time.

These are just a few of the ways that you have transparency and control over your Alexa experience. Explore more at amazon.com/alexaprivacy.

1. Choose a location for your Echo Studio

Echo Studio will automatically tune its speakers based on where it is placed in the room. For optimal performance we recommend placing Echo Studio at your preferred listening height, at least 6' from the wall with clearance above and on both sides of the speaker.

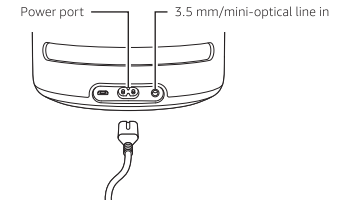

2. Download the Amazon Alexa app

On your phone or tablet, download and install the latest version of the Alexa app from the app store.

3. Plug in your Echo Studio

Plug your Echo Studio into an outlet using the included power cord. A blue light ring will spin around the top. In about a minute, Alexa will greet you and let you know to complete setup in the Alexa app.

To connect an audio component such as a CD player or MP3 player, use the combination 3.5 mm/mini-optical line in on the back of your Echo Studio.

4. Set up your Echo Studio in the Alexa app

Open the Alexa app to set up your Echo. Log in with an existing Amazon account username and password, or create a new account. If you aren't prompted to set up your device after opening the Alexa app, tap the More icon to add your device manually.

The app helps you get more out of your Echo Studio. It's where you set up calling and messaging, and manage music, lists, settings, and news.

Optional: Set up your compatible Zigbee smart home devices

You can easily connect and control compatible Zigbee devices with the built-in smart home hub. When ready to get started, open the Alexa app to add your device, or say, "Alexa, discover devices."

To manage and rename smart home devices in the Alexa app, tap the Devices icon.

Give us your feedback

Alexa is always getting smarter and adding new skills. To send us feedback about your experiences with Alexa, use the Alexa app, visit www.amazon.com/devicesupport, or simply say, "Alexa, I have feedback."

Things to try with your Echo Studio

Enjoy your favorite music and audiobooks

Alexa, play a rock music playlist.
Alexa, resume my audiobook.

Get answers to your questions

Alexa, how many grams are in 16 ounces?
Alexa, what can you do?

Get news, podcasts, weather, and sports

Alexa, tell me the news.
Alexa, what is the weekend weather forecast.

Voice control your smart home

Alexa, turn off the lamp.
Alexa, set the temperature to 72 degrees.

Stay connected

Alexa, call Mom.
Alexa, drop in on the family room.

Stay organized and manage your home

Alexa, reorder paper towels.
Alexa, set an egg timer for 5 minutes.

Some features may require customization in the Alexa app, a separate subscription, or an additional compatible smart home device.

You can find more examples and tips in the Alexa app.
