SIMBA[®]

The Quick Guide

(to a long night's sleep)

A New Home

Choose where you're going to sleep, carry the mattress through and then unbox it.

Location, Location

Position the rolled up Simba mattress where you want it.

Ribbon Cutting

Use the cutter to free the mattress from its plastic cover (but please be very careful you don't cut the mattress itself).

Rise and Shine

Let your mattress get a chance to feel at home. It needs to rest for 3-5 hours to make sure it's risen properly. The mattress can take up to 48 hours to completely settle - but you can sleep on it before then.

Rest Easy

Job done. Now it's time to relax - and enjoy a well-deserved sleep...It'll be the best you've ever had.
