b: Place the back **11** onto the unit.

Nail **c** around the outside edges of the back **11** and into the back edge of the right divider **4**, as shown.

Secure each hinge with 2 screws **H**.

Note: Before securing with the screws, make sure that the hinges are positioned at 90 degrees with the edge of the door.

Assembly Instructions

Step 19

Fit doors and handles

Note: The easiest way to attach each door **9** and **10** is to fit the top hinge first, then align and fit the other hinge.

a: Push the hinge **K** onto the front part of the hinge plate **J**. The recess at the bottom of screw B goes into the slot in the hinge plate.

b: Keep the hinge **K** FLAT against the hinge plate **J** as you slide it across as far as it will go. Tighten screw A.

c: The hinge **K** must be flat against the hinge plate **J** prior to any adjustment.

d: The hinge **K** must NOT be AT AN ANGLE to the hinge plate **J** when assembled. This would indicate that the recess at the bottom of screw B had not located in the slot in the hinge plate and the hinge would not be secure. Remove the hinge from the hinge plate and then re-assemble being careful to follow instructions a-c.

e: Attach a handle **L** to each door **9** and **10** using screws **G**.

Assembly Instructions

Step 20

Adjust the doors if needed

a: Before adjusting the doors, use a spirit level to check the base (or top) of the unit is level, front-to-back and side-to-side in the 3 positions shown. Use suitable packing pieces (not supplied) to make the unit level BEFORE making any adjustment to the hinges, as shown.

b: Height adjustment.

Loosen screws A on hinge plates and move door up or down as required. Retighten screw A.

c: Forward and Back adjustment.

Loosen screw B on hinge plate and move door in or out as required. Retighten screw B.

d: Sideways adjustment.

To move door 'out' loosen screw C. To move door 'in' tighten screw C.
