## Instruction manual

Combi Fridge-Freezer

BFFWX60185B

BFFWX60185G

BFFWX60185W

You'll soon be enjoying your new Combi Fridge-Freezer. It all begins here, with your instructions. Don't worry, there's nothing too technical coming up. Just simple, step-by-step guidance to get you up and running quickly. Sound good? Then let's get started.

## Help and Guidance

We're here to help you get the most from your Combi Fridge-Freezer. Should you require any guidance, a simple solution can often be found online at:

**[www.bush-support.com](http://www.bush-support.com)**

If you still require further assistance, call one of our experts on 0345 257 7271.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the Troubleshooting section of these instructions.

# Safety Information

1

## Safety information

Important - Please read these instructions fully before installing or operating

### Safety Instructions

#### General Safety Warnings

Read this user manual carefully.

**! WARNING:** Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.

**! WARNING:** Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

**! WARNING:** Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.

**! WARNING:** Do not damage the refrigerant circuit.

**! WARNING:** When positioning the appliance, ensure the supply cord is not trapped or damaged.

**! WARNING:** Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.

**! WARNING:** In order to avoid any hazards resulting from the instability of the appliance, it must be fixed in accordance with the following instructions:

**! WARNING:** If your appliance uses R600a as a refrigerant (this information will be provided on the label of the cooler) you should take care during transportation and installation to prevent the cooler elements from being damaged. R600a is an environmentally friendly and natural gas, but it is explosive. In the event of a leak due to damage of the cooler elements, move your fridge away from open flames or heat sources and ventilate the room where the appliance is located for a few minutes.

- While carrying and positioning the fridge, do not damage the cooler gas circuit.

- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- This appliance is intended to be used in household and domestic applications such as:
  - staff kitchen areas in shops, offices and other working environments.
  - farm houses and by clients in hotels, motels and other residential type environments.
  - bed and breakfast type environments;
  - catering and similar non-retail applications.
- If the socket does not match the refrigerator plug, it must be replaced by the manufacturer, a service agent or similarly qualified persons in order to avoid a hazard.
- A specially grounded plug has been connected to the power cable of your refrigerator. This plug should be used with a specially grounded socket of 13 amperes. If there is no such socket in your house, please have one installed by an authorised electrician.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- If the supply cord is damaged, it must be replaced by the manufacturer, an authorised service agent or similar qualified persons, in order to avoid a hazard.
- This appliance is not intended for use at altitudes exceeding 2000 m.

## Getting to know your Combi Fridge - Freezer

# Getting to know your Combi Fridge-Freezer

You'll be up and running in no time

## Ready? Let's begin...

Please read these instructions carefully. They contain important information which will help you get the best from your Combi Fridge Freezer and ensure safe

and correct installation and operation.

If you require any further assistance, our technical experts are happy to help. For full details, refer to the product support section at the end of these instructions.

# Getting to know your Combi Fridge-Freezer

You'll be up and running in no time

This presentation is only for information about the parts of the appliance. Parts may vary according to the appliance model.

# Installing your Combi Fridge - Freezer

3

# Installing your Combi Fridge - Freezer

## Bringing it all together

### Installation warnings

Before using your fridge freezer for the first time, please pay attention to the following points:

- The operating voltage for your fridge freezer is 220-240 V at 50Hz.
- The plug must be accessible after installation.
- Your fridge freezer may have an odour when it is operated for the first time. This is normal and the odour will fade when your fridge freezer starts to cool.
- Before connecting your fridge freezer, ensure that the information on the data plate (voltage and connected load) matches that of the mains electricity supply. If in doubt, consult a qualified electrician.
- Insert the plug into a socket with an efficient ground connection. If the socket has no ground contact or the plug does not match, we recommend you consult a qualified electrician for assistance.
- The appliance must be connected with a properly installed fused socket. The power supply (AC) and voltage at the operating point must match with the details on the name plate of the appliance (the name plate is located on the inside left of the appliance).
- We do not accept responsibility for any damages that occur due to ungrounded usage.
- Place your fridge freezer where it will not be exposed to direct sunlight.
- Your fridge freezer must never be used outdoors or exposed to rain.
- Your appliance must be at least 50 cm away from stoves, gas ovens and heater cores, and at least 5 cm away from electrical ovens.
- If your fridge freezer is placed next to a deep freezer, there must be at least 2 cm between them to prevent humidity forming on the outer surface.
- Do not cover the body or top of fridge freezer with lace. This will affect the performance of your fridge freezer.
- Clearance of at least 150 mm is required at the top of your appliance. Do not place anything on top of your appliance.
- Do not place heavy items on the appliance.
- Clean the appliance thoroughly before use (see Cleaning and Maintenance).
- The installation procedure into a kitchen unit is given in the installation manual. This product is intended to be used in proper kitchen units only.
- Before using your fridge freezer, wipe all parts with a solution of warm water and a teaspoon of sodium bicarbonate. Then, rinse with clean water and dry. Return all parts to the fridge freezer after cleaning.
- Use the adjustable front legs to make sure your appliance is level and stable. You can adjust the legs by turning them in either direction. This must be done before placing food in the appliance.
- Install the two plastic distance guides (the parts on the black vanes -condenser- at the rear) by turning it 90° (as shown in the figure) to prevent the condenser from touching the wall.
- The distance between the appliance and back wall must be a minimum of 75 mm.

### During Usage

- Do not connect your fridge freezer to the mains electricity supply using an extension lead.
- Do not use damaged, torn or old plugs.
- Do not pull, bend or damage the cord.
- Do not use plug adapter.
- This appliance is designed for use by adults. Do not allow children to play with the appliance or hang off the door.
- Never touch the power cord/plug with wet hands. This may cause a short circuit or electric shock.

# Installing your Combi Fridge - Freezer

## Bringing it all together

- Do not place glass bottles or cans in the ice-making compartment as they will burst when the contents freeze.
- Do not place explosive or flammable material in your fridge. Place drinks with high alcohol content vertically in the fridge compartment and make sure their tops are tightly closed.
- When removing ice from the ice-making compartment, do not touch it. Ice may cause frost burns and/or cuts.
- Do not touch frozen goods with wet hands. Do not eat ice-cream or ice cubes immediately after they are removed from the ice-making compartment.
- Do not re-freeze thawed frozen food. This may cause health issues such as food poisoning.

### Old and Out-of-order Fridges

- If your old fridge or freezer has a lock, break or remove the lock before discarding it, because children may get trapped inside it and may cause an accident.
- Old fridges and freezers contain isolation material and refrigerant with CFC. Therefore, take care not to harm environment when you are discarding your old fridges.

### CE Declaration of conformity

We declare that our products meet the applicable European Directives, Decisions and Regulations and the requirements listed in the standards referenced.

### Disposal of your old appliance

The symbol on the product or on its packaging indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about recycling of this product, please

contact your local city office, your household waste disposal service or the shop where you purchased the product.

### Packaging and the Environment

Packaging materials protect your machine from damage that may occur during transportation. The packaging materials are environmentally friendly as they are recyclable. The use of recycled material reduces raw material consumption and therefore decreases waste production.

### Notes:

- Please read the instruction manual carefully before installing and using your appliance. We are not responsible for the damage occurred due to misuse.
- Follow all instructions on your appliance and instruction manual, and keep this manual in a safe place to resolve the problems that may occur in the future.
- This appliance is produced to be used in homes and it can only be used in domestic environments and for the specified purposes. It is not suitable for commercial or common use. Such use will cause the guarantee of the appliance to be cancelled and our company will not be responsible for the losses to be occurred.
- This appliance is produced to be used in houses and it is only suitable for cooling / storing foods. It is not suitable for commercial or common use and/or for storing substances except for food. Our company is not responsible for the losses to be occurred in the contrary case.

# Installing your Combi Fridge - Freezer

Bringing it all together

## Shipment and Repositioning

### Transportation and Changing Positioning

- The original packaging and foam may be kept for re-transportation (optional).
- Fasten your appliance with thick packaging, bands or strong cords and follow the instructions for transportation on the packaging.
- Remove all movable parts (shelves, accessories, vegetable bins, and so on) or fix them into the appliance against shocks using bands when re-positioning or transporting.

 Always carry your appliance in the upright position.

### Repositioning the Door

- It is not possible to change the opening direction of your appliance door if door handles are installed on the front surface of the appliance door.
- It is possible to change the opening direction of the door on models without handles.
- If the door-opening direction of your appliance can be changed, contact the nearest Authorised Service Centre to change the opening direction.

# Functions 4

## Functions

Simple everyday use

### Information on No-Frost Technology

No-frost refrigerators have a different operating system to static refrigerators.

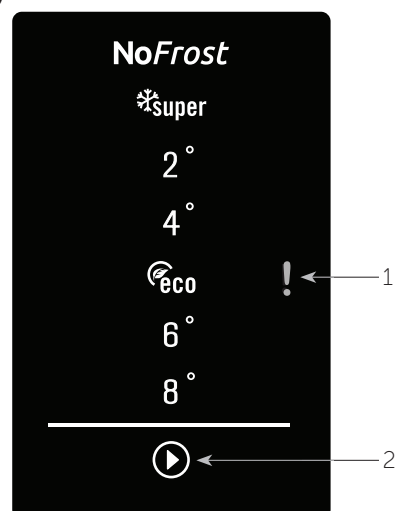

In normal (static) fridges, the humidity entering the fridge due to opening the door and the humidity inherent in the food causes ice to form in the freezer compartment. To remove the frost and ice from the freezer compartment, it is required to periodically switch the fridge off and place frozen food in a separate cooled container.

The situation is completely different in No-frost fridges. A built-in fan blows dry and cold air evenly into the cooler and freezer compartments. The cold air disperses uniformly between the shelves, ensuring all your food is cooled evenly, thus preventing humidity and icing to occur.

Therefore, your No-frost fridge allows ease of use, in addition to its huge capacity and stylish appearance.

### Display and Control Panel

1. Sr alarm indicator.

2. Cooler set button.

### Using the Control Panel

#### Cooler Set Button

The cooler set button allows changes to be made to the temperature of the cooler compartment. Super cool and economy mode can also be activated using this button.

#### Sr Alarm

Sr alarm will change to red and an alarm will sound if any problems occur.

### Operating Your Fridge Freezer

#### Super Cool Mode

##### Activating Super Cool Mode

Push the cooler set button until the super cool symbol illuminates. The buzzer will sound twice and the mode will be set.

##### During Super Cool Mode

Super cool mode can be cancelled in the same way it is selected.

Super cool mode will automatically cancel after 6 hours, depending on the environmental temperature or when the refrigerator sensor reaches a sufficiently low temperature.

## Functions

### Simple everyday use

#### Economy Mode

##### Activating Economy Mode

- Press the cooler set button until the economy symbol illuminates.
- If no button is pressed for 1 second the mode will be set and the buzzer will sound twice as confirmation.
- To cancel, press the cooler set button.

#### Cooler Temperature Settings

- The initial temperature value for the cooler setting indicator is +4 °C.
- Press the cooler set button once
- When you first press the button, the previous value will appear on the setting indicator of the cooler.
- Whenever you press this button, a lower temperature will be set (+8°C, +6°C, economy, +4°C, +2°C, or super cool).
- If you press the cooler set button until the super cool symbol appears on the cooler setting indicator, and do not press any buttons for 1 second, super cool will flash.
- If you continue to press the same button, it will restart from +8°C.

#### Door Open Alarm Function

If cooler or freezer door is opened more than 2 minutes, appliance sounds 'beep beep'.

#### Temperature Adjustment Warnings

- It is not recommended that you operate your fridge in environments colder than 10°C in terms of its efficiency.
- Do not start another adjustment while you are already making an adjustment.
- Temperature adjustments should be made according to the frequency of door openings, the quantity of food kept inside the fridge and the ambient temperature in the location of your fridge.
- In order to allow your fridge to reach the operating temperature after being connected to mains, do not open the doors frequently or place large quantities of food in the fridge. Please note that, depending on the ambient temperature, it may take 24 hours for your fridge to reach the operating temperature.
- A 5 minute delay function is applied to prevent damage to the compressor of your fridge when connecting or disconnecting to mains, or when an energy breakdown occurs. Your fridge will begin to operate normally after 5 minutes.
- Your appliance is designed to operate in the ambient temperature (T/N = 16°C - 43°C) intervals stated in the standards, according to the climate class displayed on the information label. We do not recommend operating your appliance out of the stated temperature limits in terms of cooling effectiveness.

Climate Class	Ambient Temperature °C
T	Between 16 and 43 (°C)
ST	Between 16 and 38 (°C)
N	Between 16 and 32 (°C)
SN	Between 10 and 32 (°C)

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the Troubleshooting section of these instructions.

# Using your Combi Fridge - Freezer

5

# Using your Combi Fridge-Freezer

## Getting the most from your appliance

### Food Storage

#### Refrigerator Compartment

- To reduce humidity and avoid the consequent formation of frost, always store liquids in sealed containers in the refrigerator. Frost tends to concentrate in the coldest parts of the evaporating liquid and, in time, your appliance will require more frequent defrosting.
- Never place warm food in the refrigerator. Warm food should be allowed to cool at room temperature and should be arranged to ensure adequate air circulation in the refrigerator compartment.
- Make sure no items are in direct contact with the rear wall of the appliance as frost will develop and packaging will stick to it. Do not open the refrigerator door frequently.
- We recommend that meat and clean fish are loosely wrapped and stored on the glass shelf just above the vegetable bin where the air is cooler, as this provides the best storage conditions.
- Store loose fruit and vegetable items in the crisper containers.
- Store loose fruit and vegetables in the crisper.
- Storing fruit and vegetables separately helps prevent ethylene-sensitive vegetables (green leaves, broccoli, carrot, etc.) being affected by ethylene-releaser fruits (banana, peach, apricot, fig etc.).
- Do not put wet vegetables into the refrigerator.
- Storage time for all food products depends on the initial quality of the food and an uninterrupted refrigeration cycle before refrigerator storage.
- To avoid cross-contamination do not store meat products with fruit and vegetables. Water leaking from meat may contaminate other products in the refrigerator. You should package meat products and clean any leakages on the shelves.

- Do not put food in front of the air flow passage.
- Consume packaged foods before the recommended expiry date.

**NOTE:** Potatoes, onions and garlic should not be stored in the refrigerator.

#### Freezer Compartment

- The freezer is used for storing frozen food, freezing fresh food, and making ice cubes.
- To freeze fresh food, ensure that as much of the surface of the food as possible is in contact with the cooling surface.
- Do not store fresh food next to frozen food as it can thaw the frozen food.
- Before freezing fresh food, divide it into portions that can be consumed in one sitting.
- Consume thawed frozen food within a short period of time after defrosting.
- Never place warm food in the freezer compartment as it will thaw the frozen food.
- Always follow the manufacturer's instructions on food packaging when storing frozen food. If no information is provided food, should not be stored for more than 3 months from the date of purchase.
- When purchasing frozen food, make sure that it has been stored under appropriate conditions and that the packaging is not damaged.
- Frozen food should be transported in appropriate containers and placed in the freezer as soon as possible.
- Do not purchase frozen food if the packaging shows signs of humidity and abnormal swelling. It is probable that it has been stored at an unsuitable temperature and that the contents have deteriorated.
- The storage life of frozen food depends on the room temperature, the thermostat setting, how often the door is opened, the type of food, and the length of time required to transport the product from the shop to your home. Always follow the instructions printed

## Using your Combi Fridge-Freezer

### Getting the most from your appliance

on the packaging and never exceed the maximum storage life indicated.

- The maximum amount of fresh food (in kg) that can be frozen in 24 hours is indicated on the appliance label.
- If you are going to use the refrigerator with maximum freezing capacity:
  - To use the maximum capacity of the freezer compartment, use the glass shelves for the upper and middle section, and use the lower basket for the bottom section.

**NOTE:** If you attempt to open the freezer door immediately after closing it, you will find that it will not open easily. This is normal. Once equilibrium has been reached, the door will open easily.

#### Important note:

- Never refreeze thawed frozen food.
- The taste of some spices found in cooked dishes (anise, basilica, watercress, vinegar, assorted spices, ginger, garlic, onion, mustard, thyme, marjoram, black pepper, etc.) changes and they assume a strong taste when they are stored for a long period of time. Therefore, add small amounts of spices to food to be frozen, or the desired spice should be added after the food has thawed.
- The storage time of food is dependent on the type of oil used. Suitable oils are margarine, calf fat, olive oil and butter. Unsuitable oils are peanut oil and pig fat.
- Food in liquid form should be frozen in plastic cups and other food should be frozen in plastic folios or bags.

# Using your Combi Fridge-Freezer

## Getting the most from your appliance

### Accessories

#### The Freezer Box

The freezer box allows food to be accessed more easily.

Removing the freezer box:

- Pull the box out as far as possible
- Pull the front of the box up and out

 Carry out the opposite of this operation when refitting the sliding compartment.

 Always keep hold of the handle of the box while removing it.

#### Ice Tray

- To remove the icebox, pull the upper freezer box out as far as possible, then pull the icebox out.
- Fill it 3/4 full with water and place it in the freezer.

 **NOTE:** While placing the ice box in the freezer, make sure it is in a horizontal position, otherwise the water in the ice box will spill.

- After the water has completely frozen, you can twist the tray as shown below to remove the ice cubes.

### The Water Dispenser

#### Mounting the Water Tank

1. Place the water tank in the plastic holder on the door, pitched in the direction of the arrow on the diagram.

2. After you have mounted the water tank, push it down to firmly secure it in the holder.

3. Add drinkable water with the help of the water tank top cover.

4. Release the side locking covers to detach the water tank cover.

# Using your Combi Fridge-Freezer

## Getting the most from your appliance

5. To serve your drinks, gently press the valve lever.

### Filling the Water Tank

- Remove the top cover of the water tank.
- Fill the tank up with water.
- Mount the top cover back on the water tank.

**!** Important: Do not use the water dispenser for anything except water.

**!** Important: If you leave water in the tank for a long time, it will cause an odour. In this case, clean the tank and keep using it.

**!** Important: Clean the water tank before using it for the first time.

### Cleaning the Water Tank

- Lift the water tank.
- Remove the tank cover by releasing the side locking covers.
- Clean the tank with warm water and reassemble the pieces that you have removed.

### Stowing the Water Tank

- Install the water tank as shown.
- Make sure that the tap and the hole match each other while installing.
- Water flow may not be as expected if the tank has not been installed properly. Also check that the gaskets have been assembled properly.

### Drip Tray

Use of the dispenser may cause water to collect in the drip tray. Remove the tray to empty the water, then re-fit the tray.

### Filter detail

There is a filter, with a filter cover, at the back of the top cover. Do not use this cover.

Please contact an authorised service agent about exchanging the cover.

Please contact an authorised service centre about opening the cover and exchanging the filter.

**!** Please hold the glass momentarily after distribution to avoid drips.

### Cleaning The Water Dispenser

1. Move the corrugated outer gasket to the right, in the direction of the arrow on the diagram, and remove it from the tank group.

2. Turn the tap group anticlockwise, unlock the locking mechanism and move in the direction of the arrow on the diagram.

3. Remove the cover group by lifting the locking covers in the direction of the arrow on the diagram. Wipe the cover group clean with a moist cloth.

4. Dampen the tap group while fitting it to the water tank and mount it by moving it left and right in the direction of the arrow. After this process, make sure that the relevant gaskets do not come out of the groove.

5. The gaskets on the tap group must be mounted on the water tank. Be careful not to deform the gaskets.

6. While mounting the tap group, move it left and right on the tank and lock.

7. Move the corrugated outer gasket in the locking direction and mount it on the water tank.

## Care and Maintenance

6

## Care and maintenance

### Looking after your appliance

#### Cleaning and Maintenance

- ⚡ Disconnect the unit from the power supply before cleaning.
- ⚠ Do not wash your appliance by pouring water on it.
- ⚠ Do not use abrasive products, detergents or soaps for cleaning the appliance. After washing, rinse with clean water and dry carefully. When you have finished cleaning, reconnect the plug to the mains supply with dry hands.
  - Make sure that no water enters the lamp housing and other electrical components.
  - The appliance should be cleaned regularly using a solution of bicarbonate of soda and lukewarm water.
  - Clean the accessories separately by hand with soap and water. Do not wash accessories in a dish washer.
  - Clean the condenser with a brush at least twice a year. This will help you to save on energy costs and increase productivity.

🚫⚡ The power supply must be disconnected during cleaning.

- Remove the vaporisation container from its position by removing the screws as indicated. Clean it with soapy water at specific time intervals. This will prevent odours from forming.

#### Replacing LED Lighting

🚫 If your fridge has LED lighting contact the Bush helpline as this should be changed by authorized personnel only.

#### Defrosting

- Your appliance performs automatic defrosting. The water formed as a result of defrosting passes through the water collection spout, flows into the vaporisation container behind your appliance and evaporates there.
- Make sure you have disconnected the plug of your appliance before cleaning the vaporisation container.

## Care and maintenance

## Product support

Help is always at hand

### Before Calling After-Sales Service

#### Errors

Your fridge will warn you if the temperatures for the cooler and freezer are at improper levels or if a problem occurs with the appliance. SR alarm indicator is displayed in the controlpanel.

<b>ERROR TYPE</b>	(!) SR alarm indicator
<b>MEANING</b>	"Failure" Warning
<b>WHY</b>	There is/are some part(s) out of order or there is a failure in the cooling process.
<b>WHAT TO DO</b>	Call a service agent for assistance as soon as possible.

If you are experiencing a problem with your refrigerator, please check the following before contacting the after-sales service.

#### Your refrigerator does not operate

##### Check if:

- Your fridge is plugged in and switched on
- The fuse has blown
- Is the temperature adjustment right?
- The socket is faulty. To check this, plug another working appliance into the same socket.

#### Your refrigerator is performing poorly

##### Check if:

- The appliance is overloaded
- The doors are closed properly
- There is any dust on the condenser
- There is an adequate distance between the appliance and surrounding walls

#### Your refrigerator is operating noisily

The following noises can be heard during normal operation of the appliance.

##### Cracking (ice cracking) noise occurs:

- During automatic defrosting.
- When the appliance is cooled or warmed (due to expansion of appliance material).

**Clicking noise occurs:** When the thermostat switches the compressor on/off.

**Motor noise:** Indicates the compressor is operating normally. The compressor may

cause more noise for a short time when it is first activated.

**Bubbling noise and splashing occurs:** Due to the flow of the refrigerant in the tubes of the system.

**Water flowing noise occurs:** Due to water flowing to the evaporation container. This noise is normal during defrosting.

**Air blowing noise occurs:** During normal operation of the system due to the circulation of air.

**There is a build-up of humidity inside the fridge**  
Check if:

- All food is packed properly. Containers must be dry before being placed in the fridge.
- The fridge doors are opened frequently. Humidity of the room will enter the fridge each time the doors are opened. Humidity increases faster if the doors are opened frequently, especially if the humidity of the room is high.
- There is a build-up of water droplets on the rear wall. This is normal after automatic defrosting (in Static Models).

**The doors are not opening or closing properly**  
Check if:

- There is food or packaging preventing the door from closing
- The door compartments, shelves and drawers are placed properly
- The door gaskets are broken or torn
- Your fridge is level.

**The edges of the fridge in contact with the door joint are warm**

Especially during summer (warm weather), the surfaces in contact with the door joint may become warmer during operation of the compressor. This is normal.

**Important Notes:**

## Product support

Help is always at hand

- In the case of a power failure, or if the appliance is unplugged and plugged in again, the gas in the cooling system of your refrigerator will destabilise, causing the compressor protective thermal element to open. Your refrigerator will start to operate normally after 5 minutes.
- If the appliance will not be used for a long period of time (such as during holidays), disconnect the plug. Defrost and clean the refrigerator, leaving the door open to prevent the formation of mildew and odour.
- If the problem persists after you have followed all the instructions above, please consult the nearest Authorised Service Centre.
- This appliance is designed for domestic use and for the stated purposes only. It is not suitable for commercial or common use. If the consumer uses the appliance in a way that does not comply with these instructions, we emphasise that the manufacturer and the dealer will not be responsible for any repair or failure within the guarantee period.

## Tips for Saving Energy

1. Install the appliance in a cool, well-ventilated room, but not in direct sunlight and not near a heat source (such as a radiator or oven) otherwise an insulating plate should be used.
2. Allow warm food and drinks to cool before placing them inside the appliance.
3. Place thawing food in the refrigerator compartment. The low temperature of the frozen food will help cool the refrigerator compartment while the food is thawing. This will save energy. Frozen food left to thaw outside of the appliance will result in a waste of energy.
4. Drinks or other liquides should be covered when inside the appliance. If left uncovered, the humidity inside the appliance will increase, therefore the appliance uses more energy. Keeping drinks and other liquids covered helps preserve their smell and taste.
5. Avoid keeping the doors open for long periods and opening the doors too frequently as warm air will enter the appliance and cause the compressor to switch on unnecessarily often.
6. Keep the covers of the different temperature compartments ( such as the crisper and chiller) closed.
7. The door gasket must be clean and pliable. Replace gaskets if worn.

### Your Bush Guarantee

This product is guaranteed for twelve months from the date of original purchase. Any defect that arises due to faulty materials or workmanship will be repaired free of charge (or if applicable the product will be replaced or the purchase price refunded) where possible during this period by the dealer from who your purchased the unit.

The guarantee is subject to the following provisions:

- The guarantee does not cover accidental damage, misuse, cabinet parts, knobs or consumable items.
- The product must be correctly installed and operated in accordance with the instructions contained in the manual.
- It must be used solely for domestic purposes. The guarantee will be rendered invalid if the product is re-sold or has been damaged by inexperienced repair.
- Specifications are subject to change without notice.
- Bush disclaim any liability for loss or damage arising from the breakdown of the product.
- This guarantee is in addition to and does not diminish your statutory or legal rights.

### Important Data Protection Information

If you provide us with information about another person, you confirm that they have appointed you to act for them, to consent to the processing of their personal data including sensitive personal data and that you have informed them of our identity and the purposes (as set out in the Important Data Privacy notice displayed overleaf) for which their personal data will be processed.

You are entitled to ask for a copy of the information we hold about you (for which we may charge a small fee) and to have any inaccuracies in your information corrected.

For quality control and training purposes, we may monitor or record your communications with us.

If your personal details change, if you change your mind about any of your marketing preferences or if you have any queries about how we use your information, please let us know by contacting our Data Protection Officer, Domestic & General, Leicester House 17 Leicester Street, Bedworth, Warwickshire CV12 8JP.
