I How to use this controller on Xbox

Connect the USB cable to an unused port on your Xbox console. Take care not to touch the sticks or triggers when switching on the controller. If your console is off, press the Xbox button on your controller to turn on the console or press the X button on your Xbox.

Once the status LED (no. 2) is solid White. You're ready to play!
The controller will switch off as soon as the USB cable is unplugged.

NOTE: from time to time we may update the software, of our products, to enhance the gaming experience. Please check our website www.nacongaming.com regularly for any updates.

I How to use this controller on PC

The Evol-X PRO controller is a Plug-n-Play device. The necessary driver software will be automatically installed when the controller is first connected to your computer. Here is the detailed procedure to follow:

- Turn on your computer, wait for it to start, and go to your Windows desktop.
- Find an unused USB port on your PC and plug the USB cable of your Evol-X PRO controller into it.
- Windows will detect the new device and, after a few seconds, start installing the appropriate drivers. The process will be indicated by a small icon in the task bar.
- The installation takes more or less time depending on the speed of your system. At the end of the process, the following message will appear: «You can now use your Evol-X PRO. »

I How to change the LED effects

The controller includes 20 preset light effects and to switch between them you just have to do a short press on the multifunction button.

Keep pressing the button to cycle through the different effects. When you find the one you want stop pressing the button. Note that when you reach the end of the LED effects the LEDs will turn off. Just press the button again to turn them back on.

I How to map the shortcuts

Press and hold the multi-function button for 3 seconds.

The status LED will flash.

Then press the shortcut button that you want to map, followed by the button that you want to assign to that shortcut.

Repeat the process for each shortcut.

To reset the mapping on the shortcut double press it.

To finish the mapping, press and hold the multi-function button for 3 seconds.

Recycling

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it should be taken to an applicable collection point for the recycling of electrical and electronic equipment. By ensuring that this equipment is disposed of correctly you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. For more information please contact your local council or waste disposal service EU, UK and Turkey only.

I FCC: Declaration of Conformity

United states

This product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
