

# 4 Tier 12 Bin Storage Unit

Assembly Instructions - please keep for future reference

600/7320

## Dimensions

Width - 85cm

Depth - 30cm

Height - 80cm

**Important** – Please read these instructions fully before starting assembly

If you need help or have damaged or missing parts, call the Customer Helpline: 0345 640 0800

# Safety and Care Advice

**Important – Please read these instructions fully before starting assembly**

Check you have all the components and tools listed on pages 3 and 4.

- Remove all fittings from the plastic bags and separate them into their groups.
- Keep children and animals away from the work area, small parts could choke if swallowed.
- Make sure you have enough space to layout the parts before starting.

• Do not stand or put weight on the product, this could cause damage.

• Assemble the item as close to its final position (in the same room) as possible.

• Assemble on a soft level surface to avoid damaging the unit or your floor.

• Parts of the assembly will be easier with 2 people.

• We do not recommend the use of power drill/drivers for inserting screws as this could damage the unit. Only use hand screwdrivers.

• Dispose of all packaging carefully and responsibly.

## Care and maintenance

• Only clean using a damp cloth and mild detergent, do not use bleach or abrasive cleaners.

• From time to time check that there are no loose screws on this unit.

• This product should not be discarded with household waste. Take to your local authority waste disposal centre.

# Components - Panels

Please check you have all the panels listed below

**1** Left side x 1  
(78.5(h)cm x 30(d)cm)

**2** Right side x 1  
(78.5(h)cm x 30(d)cm)

**3** Rail x 12  
(83.5(w)cm x 1.6(dia)cm)

**4** Small box x 8  
(20(w)cm x 25(d)cm)

**5** Small box base x 8  
(19.5(w)cm x 24.5(d)cm)

**6** Large box x 4  
(40(w)cm x 25(d)cm)

**7** Large box base x 4  
(39.5(w)cm x 24.5(d)cm)

# Components - Fittings

If you have damaged or missing components, call the Customer Helpline: 0345 640 0800

Please check you have all the fittings listed below

Note: The quantities below are the correct amount to complete the assembly. In some cases more fittings may be supplied than are required.

## Tools required

Ruler – Use this ruler to help correctly identify the screws and parts

# Assembly Instructions

## Step 1

Connect the rails **3** to the left side **1** using 12 x screw **A** as shown.

# Assembly Instructions

## Step 2

Connect the right side **2** using 12 x screw **A**.

**The unit is floor standing, but it is recommended that the unit is secured to the wall.**

On reverse attach 2 x wall bracket **C** using 2 x screws **D** per bracket

Move the units into desired position.

Mark the wall with a suitable scribe the position of the fixing hole.

**Warning:** Before drilling, check wall for hidden pipes and cables.

Drill holes and insert 2 x wall plug **B**

Secure the brackets to the wall using 2 x screw **E**

## Step 3

Expand the small boxes **4** and insert a small box base **5** in each.

## Step 4

Expand the large boxes **6** and insert a large box base **7** in each.

# Assembly Instructions

## Step 5

Set the storage boxes onto the rails as shown.

Assembly Complete

# A Guide to Wall Mounting & Fixings

## Important note:

If plastic wall plugs (rawl plugs) are supplied with your product, e.g.:

- these are only suitable for use in masonry walls.

If you are in any doubt about the correct wall plugs for your wall, seek professional advice.

Failure of the product due to using the incorrect fixings is the responsibility of the installer.

**Important:** when drilling into walls always check that there are no hidden wires or pipes etc.

Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a qualified tradesperson if you are unsure.

Hints:

- 1: General rule:  always use a larger screw and wall plug if you are not sure.
- 2: Ensure you use the recommended drill bit to match the wall plug and hole size.
- 3: Ensure you drill the hole horizontally; do not force the drill or enlarge the hole.
- 4: Take extra care when drilling high walls, ceilings and ceramic tiles. Ensure wall plugs are inserted beyond the thickness of the ceramic tiles to avoid the tiles splitting or cracking.
- 5: Ensure wall plugs are well fitted and are a tight fit in the drilled hole.

## Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone or wood.

No.1 "General Purpose" wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general purpose wall plugs can be used.

No.3 "Cavity Fixing" wall plug

For use with plasterboard partitions or hollow wooden doors.

No.5 "Hammer Fixing" wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

No.2 "Plasterboard" wall plug

For use when attaching light loads onto plasterboard partitions.

No.4 "Cavity Fixing - Heavy Duty" wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

No.4 "Shield Anchor" wall plug - heavy loads

For use with heavier loads such as TV and HiFi speakers and satellite dishes etc.

## Care & Maintenance

**Safety:** always check the fitting and location to ensure your safety in and around the home.

**Fitting:** from time to time check the fitting: to ensure the wall plugs or screws do not become loose.
