Troubleshooting Guide

PROBLEMS	POSSIBLE REASONS & SOLUTIONS
Unit doesn't turn on	Make sure the unit is plugged in. Insert and rotate cup clockwise in the base until it "clicks". Display should turn on.
Unit doesn't turn off	Remove cup from base by rotating cup anticlockwise and lifting out. Display should turn off. Unplug the power cord from the outlet.
Lid/blade assembly hard to assemble	Set the cup on a level surface. Place the lid or blade assembly on the top of the cup and align the threads so that the lid/blades sit flat on the cup. Twist clockwise so that the lid/blades evenly align to the cup until you have a tight seal.
Food is not evenly chopped	For best results when chopping, make sure all ingredients are as dry as possible. Cut pieces down to even sizes, and reduce the amount of food in the cup. Use very short pulses by quickly pressing the "PULSE" button.
Doesn't mix well, food gets stuck	Using the Auto-iQ® programs is the easiest way to achieve great results. The pulses and pauses allow the food to settle towards the blade. If food is routinely getting stuck adding some liquid will usually help. When packing the cups, start with fresh fruit and vegetables, then add leafy greens and herbs, then add liquids, next add powders/nuts, finally add frozen fruit and ice.
Unit moves on counter while blending	Make sure the surface as well as the feet of the unit are clean and dry.
Unit is difficult to remove from counter for storage	Tip unit forward from the back to easily disengage the suction feet.
