Betting Started.....

Check that you have noted all the following instructions:

Safety

 \checkmark

We advise the use of non slip protective gloves throughout the assembly process.

We advise the use of steel capped protective footwear throughout the assembly process.

We advise that you use a helper to hold the glass in position whilst you nail the beading in place.

We advise the use of protective headwear and safety

goggles throughout the assembly process.

Where a ladder is in use another person must hold the ladder.

Do not attempt to work in windy conditions.

We advise the use of a scaffold tower when fitting the roof, for felting or if you cannot reach from the ground.

Do not allow children near the tools and work area.

Follow any safety precautions quoted by the manufacturer for any equipment you use.

Check all parts before assembly.

Only use child and animal safe wood preservative.

Do not use creosote.

Allow the wood preservative to fully dry before use.

Regularly check the building for wear and tear.

Important!

EVERY PRECAUTION IS TAKEN TO ENSURE THAT YOUR BUILDING HAS NO ELEMENT INCORRECTLY PLACED OR POSSIBLY HAZARDOUS, HOWEVER PRIOR TO USE PLEASE CHECK ALL SURFACES FOR THE FOLLOWING:

- (1) RAISED GRAIN, SPLINTERS: Sand down timber to smooth finish
- (2) NAIL/SCREW/PIN HEADS PROUD: Tap home to be flush with surface of timber
- (3) DAMAGED SCREW HEADS RESULTING IN SHARP SPLINTERS OF METAL: Replace
- (4) SHARP ENDS OF NAILS/ SCREWS/ PINS PROTRUDING THROUGH THE PANEL: Remove and reposition
- (5) ENSURE ALL PARTS ARE SECURED AGAINST REASONABLE FORCE: Remove and refit
- (6) ENSURE THERE ARE NO LOOSE PARTS: Remove and refit/discard

Preparation of base...

We recommend that the base onto which your building will stand should be at least 75mm larger in each direction than the total floor size of the building.

- Actual floor area of the building: 2048mm x 2970mm
- Total height clearance: 2160mm
- Roof size: 2200mm wide x3348mm long

The chosen position in your garden for your building should be excavated to a depth of 75mm to allow a base of sand, on to which paving slabs can be evenly laid. You may also use an adjustable timber base or a concrete base. Whatever base you decide upon IT MUST BE LEVEL AND FIRM.

Warranty...

10 Year anti rot warranty subject to the following:

- The building must be raised so it is not in contact with any water retaining base surface (for example grass)
- This can be achieved using a timber, concrete or slab base
- When using a concrete or slab base use damp proofing strips under the bearers
- The building must have been completely treated and sealed immediately prior to or after assembly
- The building must have been re-treated and re-sealed annually

NOTE: Wood is a natural product, and therefore the following are excluded from the warranty:

- Colour change
- Warping
- Splitting.

The following are also excluded:

- · Damage resulting from poor assembly
- Poor treatment application
- · Poor care and maintenance
- Changes to the design
- Misuse
- General wear and tear.

The 5 golden rules of care:

(1) Ensure your base is level and firm.

Care, Maintenance and Recycling

- (2) Ensure the building is not sitting directly on the ground using damp proof membrane or the optional timber base.
- (3) Ensure every piece of timber and surface, especially that is hidden upon assembly is treated with a top quality wood preservative at least twice (before assembly). Turn the panels upside down whilst painting so the treatment runs into the seams.
- (4) Garden buildings are not waterproof, therefore we recommend you seal between all the panels with a silicone based sealant.
- (5) Regularly check your roofing felt for weather damage and leaks.

The 6 golden rules of maintenance:

- (1) Visually check for weather damage.
- (2) Check and replace if necessary any Silicone sealant if used on your building.
- (3) Check the roofing material for wear.
- (4) The doors and windows may require periodical adjustment.
- (5) Ensure your building is well ventilated especially during hot weather.
- (6) During extremely hot periods humidify your building to prevent the timber from drying out.

Recycling and disposal:

packaging

- 1. Pallet and timber widely recycled
- 2. Cardboard widely recycled
- 3. Plastic strapping subject to local regulations
- 4. Plastic sheeting subject to local regulations.

Building

- 1. Timber widely recycled
- 2. Metal fixings widely recycled
- 3. Glass widely recycled
- 4. Roofing felt not currently recycled.

Before you start

Things to check before you start:

 \checkmark

Ensure your base is ready- See page 3

 \checkmark

Check all parts as listed in the parts lists

 \checkmark

Read the instructions fully before starting work

 \checkmark

Follow all the health and safety guidelines

When you see the drill icon

Only ever drill through the first piece of framework which will be a pilot hole for the screw to attach the second piece of framework

The required drill hit size is

The required drill bit size is shown with the icon.

You will need:

Hammer

Spirit level

Ladder

• 1mm,3mm 6mm & 8mm drill bit

Drill

Tape measure & Ruler

Sand paper

• Gloves

Saw

Pencil

Goggles

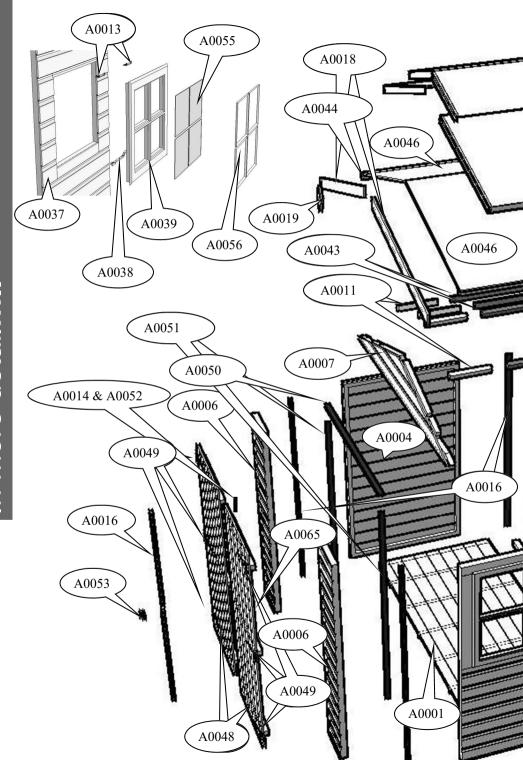

A helper for some tasks

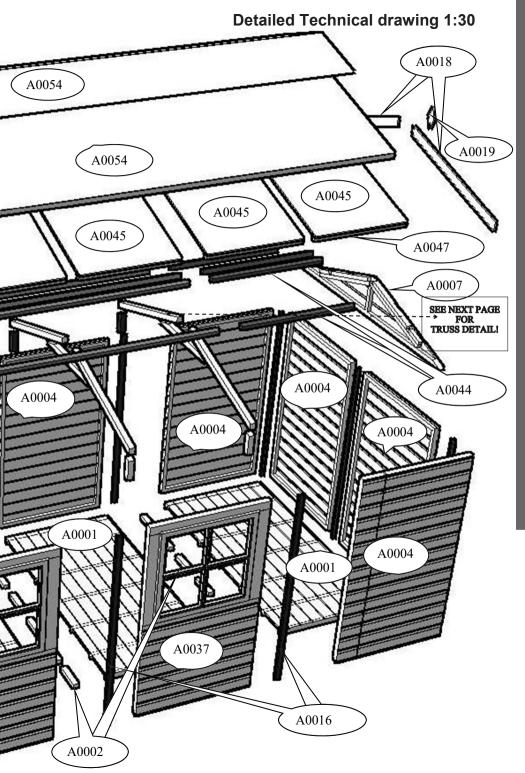

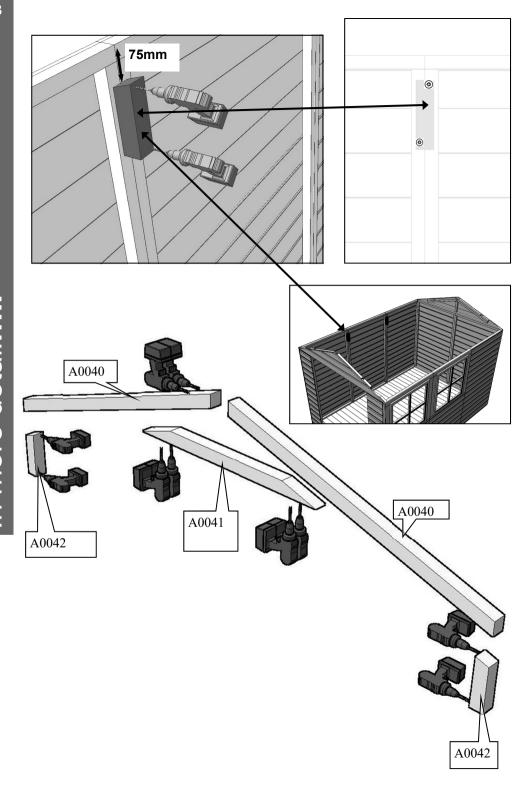

Screwdriver

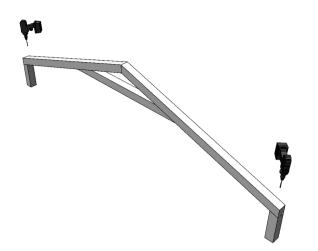

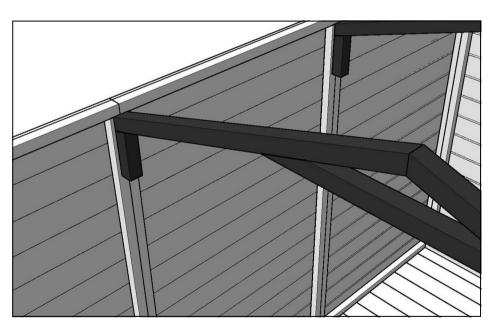

Sharp knife

Ongoing Photographic Opportunity:

We are always looking for additions to our library of photographs.

Please send us (preferably by e-mail, or in any way that suits) an image of your completed building.

If we use your image we will pay you a one off payment of £100.00 for the right to do so.

E-mail your pictures to: sales@shiregb.co.uk Mail: Building photographs, Shire Brigstock Road Wisbech Cambridgeshire PE13 3JJ

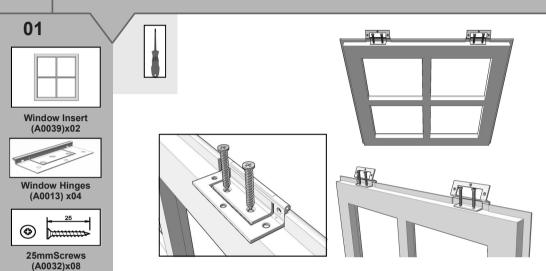

Assembly instructions:

These instructions are for your safety. Please read through them thoroughly before use.

Treat all the parts before assembly – see page 5!

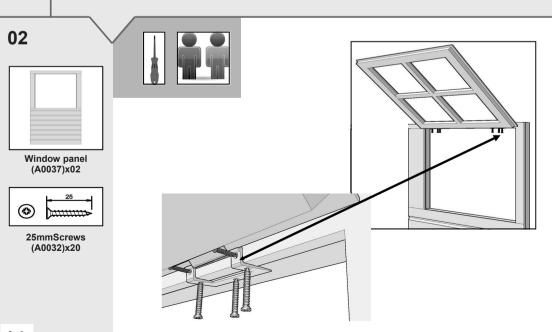

The hinges fit the top of the window. Try the window in position to check that you have it the correct way around.

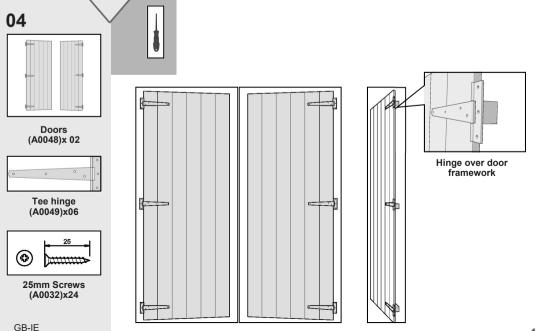

gB-IE

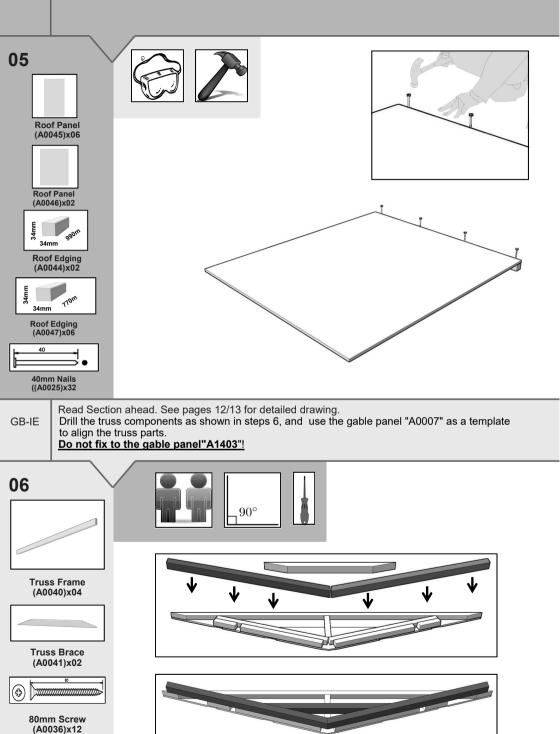

Get a helper to hold the window in the open position. Put one screw in each hinge first and check the window closes correctly before adding the remaining screws.

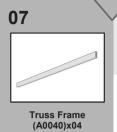

Casement stay and pins "A0038" must fit together loosely. Position as shown. GB-IE Fix the casement stay to the window insert first. Then mark and fix the pins as shown. 03 .1. .1. Casement set (A0038) x02 25mmScrew (A0032)x12 Fix the hinges as shown so the screws go into the horizontal framework on the back of the door. GB-IE 04

2 truss assemblies required. Drill positions for step 6.

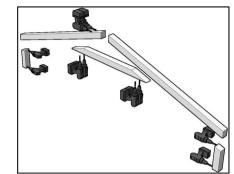

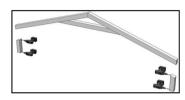

X2

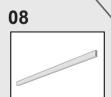

Truss Brace (A0041)x02

80mm Screw (A0036)x12

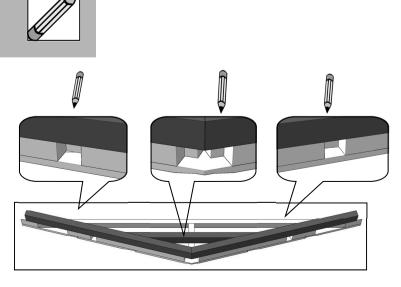

GB-IE

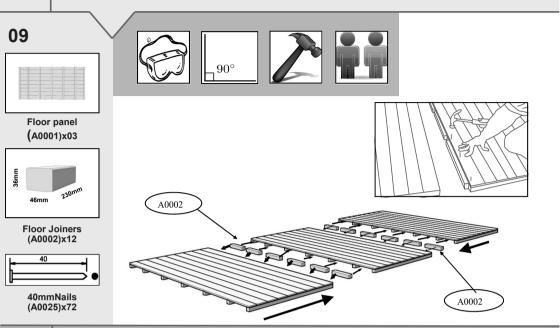

Truss Frame (A0040)x04

Truss Brace (A0041)x02

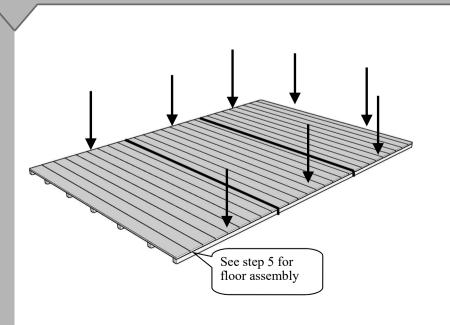

Position the floor joiners "A0002" widest side down so they protrude half out from 1 floor, and fix with 3x40mm nails. Push the next floor over the joiners and flush with the first floor then attach as before. Repeat with the last floor.

GB-IE

Before you start decide where you want the two window panels "A0037" (8 choices). You can swap them around with any plain panel "A0004"!

GB-IE

Note: the end panels to be fix inside the side panel!

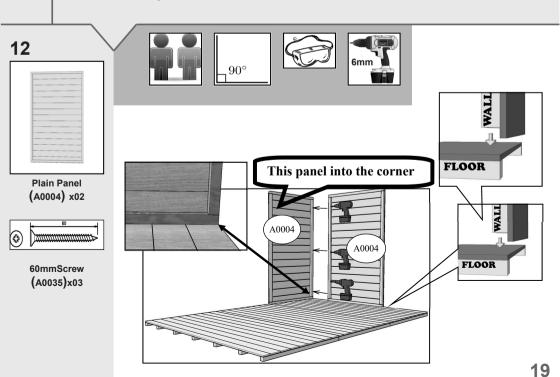

Doors go at the open end of the floor .

The door end panels and the opposite end panels FIT INSIDE THE SIDE PANELS!

11

A0004/A0037	A0004/A0037	A0004/A0037

A0006	layout	A0004/A0037
A0004/A0037	A0004/A0037	A0004/A0037

GB-IE A panel "A0004" for the side goes into the corner, the cladding overlaps the floor, push another panel "A0004" for the end up to it.

A panel "A0004" for the side goes into the corner, the cladding overlaps the floor, push another panel"A0004" for the end up to it. Drill 3 places and fix with 60mm screws. Fix the walls to the floor with 1x60mm screw x panel.

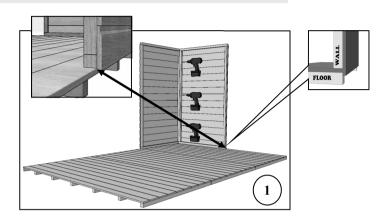

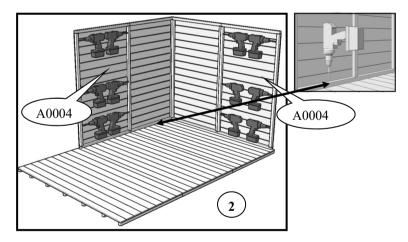

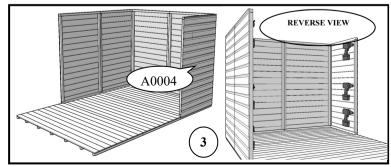

Plain panels (A0004) x05

60mm Screws (A0035)x24??

Plain panels (A0004) x01

Window panel (A0037)x02

60mm Screws (A0035)x24????

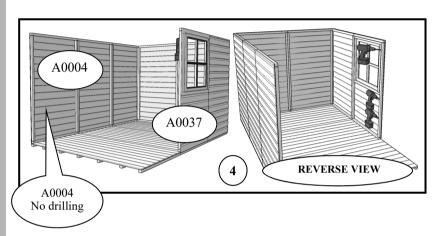

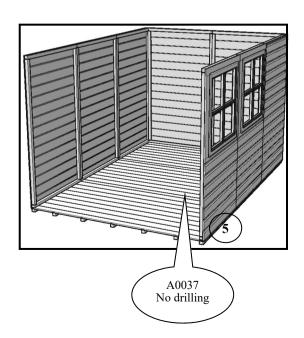

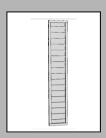

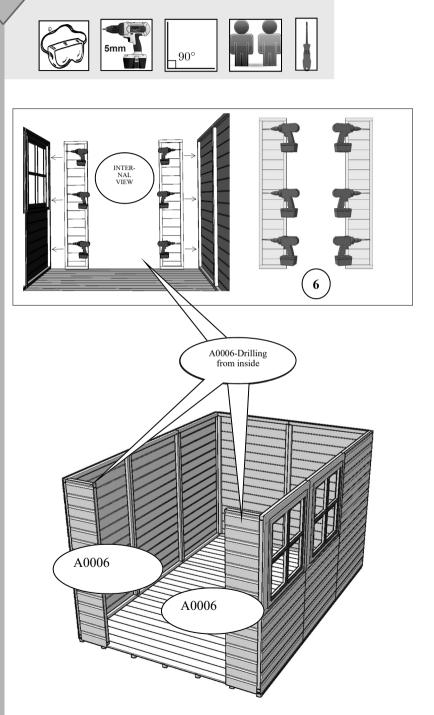

Plain Panel (A0006)x02

GB-IE

Gable panels (A0007) x02

60mm Screws (A0035)x08

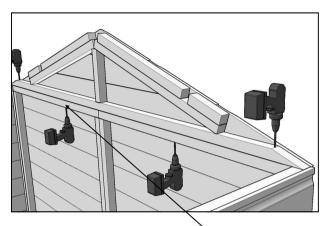

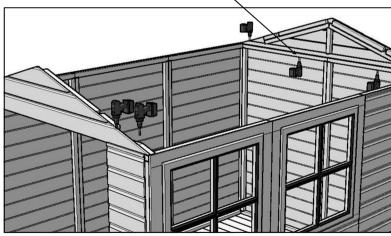

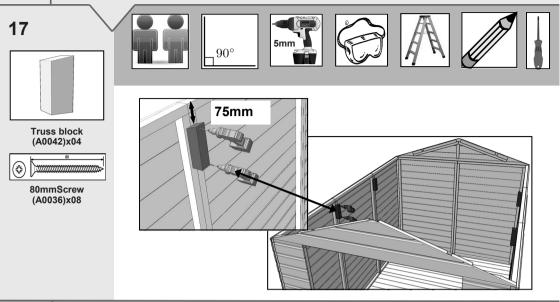

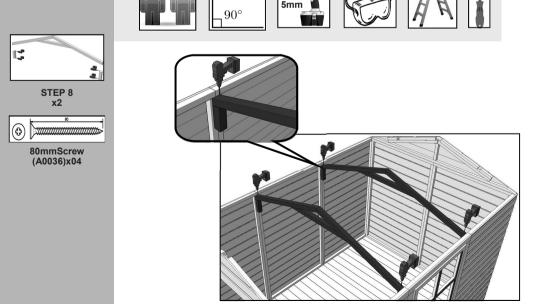

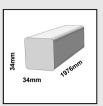

Mark 75mm down from the top, fix the truss block"A0042" central to the 2 panels ensuring the fixing screws go diagonally with one in each panel framework (four places).

GB-IE Drill 2 holes in each truss and fix into the truss blocks "A0042" with 80mm screws.

Roof bearers (A0043)x04

Roof edging (A0044)x04

60mm Screws (A0035)22????

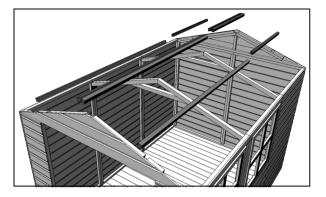

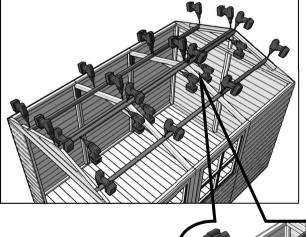

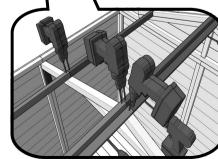

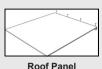

Fix the first pair of roof panels "A0045" flush with the back With 3 nails per roof bearer/ wall. The "A0046" roof panels must be at the front.

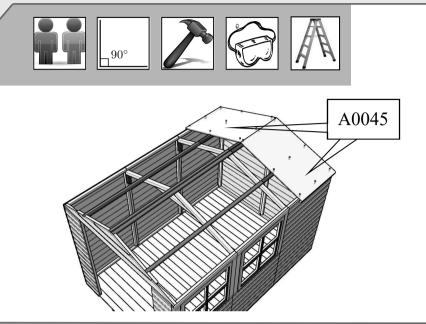

Roof Panel Step 5: (A0045) x 02

40mm Nail (A0025)x18

GB-IE

Continue fitting the remaining roof sheets as before working forwards.

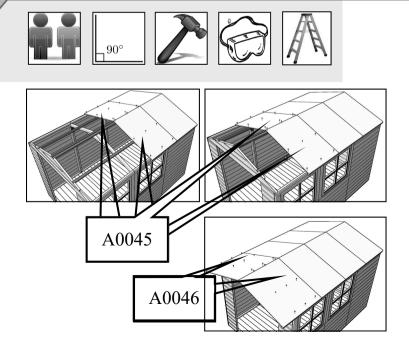

21

Roof Panel Step 5: (A0045) x 04 (A0046) x 02

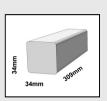

40mm Nail (A0025)x54

Screw the two short roof bearers in position from above. Make sure that the gap for the door is: 1360mm!

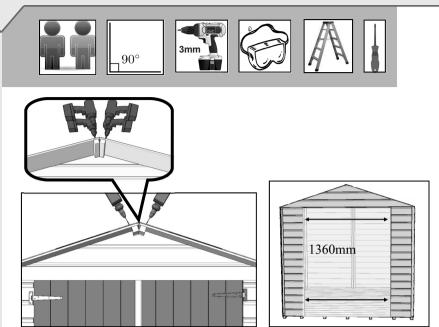

Roof support (A0011) x02

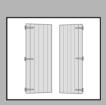

25mmScrews (A0032)x04

GB-IE

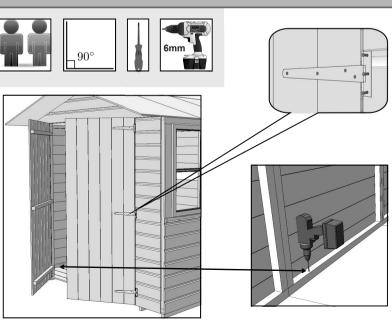

Carefully hang the doors using 1 screw per hinge to ensure they are square first. Fix the panels to the floor with 1x60 mm screw x panel.

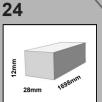

Door (A0048) x02

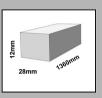

25mm Screws (A0032)x18

GB-IE

(A0051)x 02

Door stop (A0050)x01

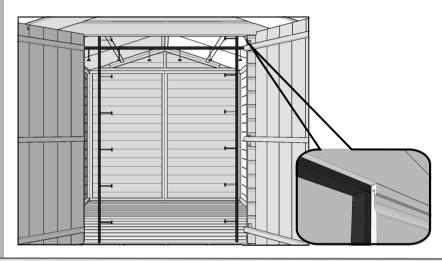

Fit a bolt to the top and bottom of the secondary door with a bolt shim between the bolt and the door GB-IE and then drill a hole for the bolt shaft.

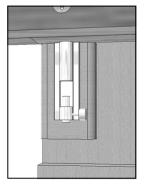

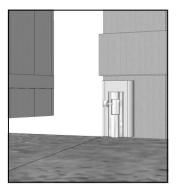

Bolt shim (A0052)x 02

25mmScrew (A0032)x08

To hold the pad bolt, fix a door block "A0065" to the end of the middle framework piece of each door where it meets the other door. Fix the pad bolt so the screws go into both the horizontal framework and door blocks on the back of the doors.

Door block (A0065)x02

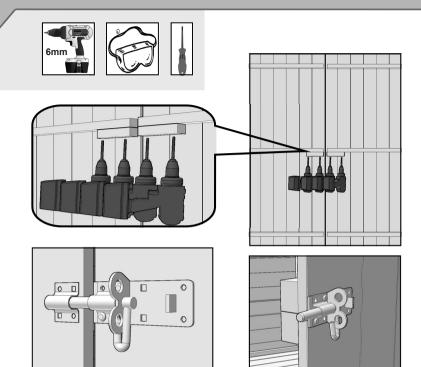

Pad bolt (A0053) x01

60mm Screws (A0035)x04

25mm Screw (A0032)x06

GB-IE

Mark a cover strip either side of the pad bolt, cut, over lap the other door and only screw it to the door that opens first (primary door).

Cover strip (A0016) x01

25mm Screw (A0032)x10???

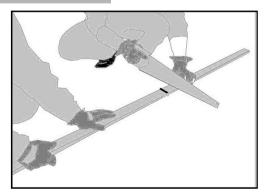

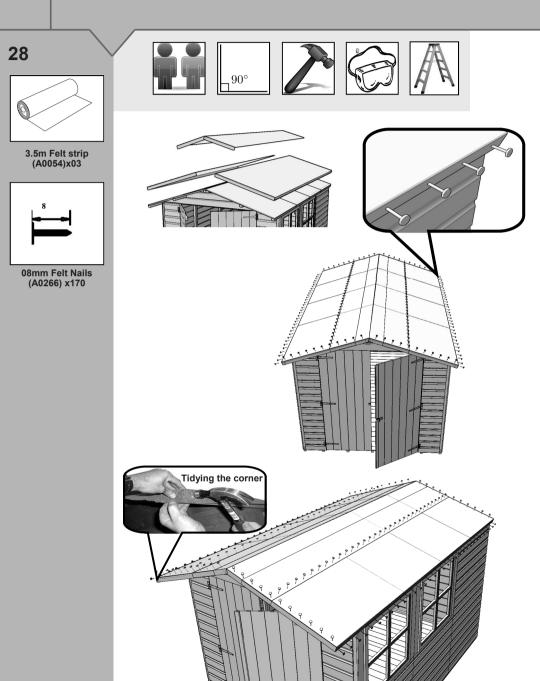

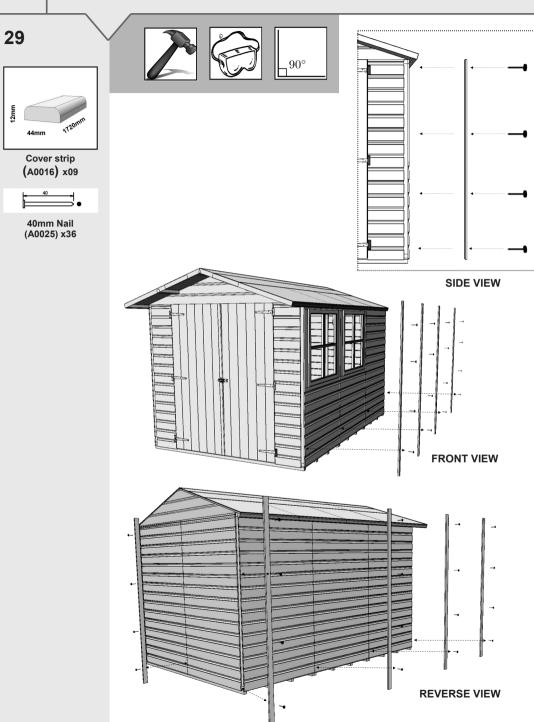

3 Strips of felt have been supplied. Fit the 2 lower strips first folding the felt over the roof edging, with an even overhang front and back then secure with a couple of nails at the top to hold the felt in position and at the bottom nail at approximately 100mm centres. The third piece overlaps the lower pair and goes over the ridge. Nail at approximately 100mm centres.

Fascia (A0018)x04

Diamond (A0019)x02

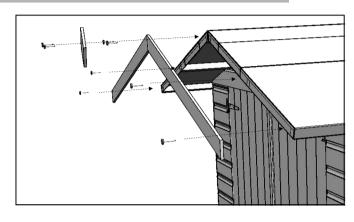

GB-IE

Swap the beading around to get the best fit. Fit with 2 panel pins each Get a helper to hold the glass whilst you fit the beading.

Glazing (A0055) x08

Beading (A0056) x32

16mm Panel pin (A0024) x64

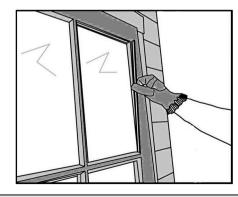

WEAR CORRECT SAFETY EQUIPMENT!
