G005C LIGHTING SET

⚠ **THIS MANUAL FORMS PART OF THE PRODUCT AND SHOULD BE RETAINED FOR FUTURE REFERENCE.**
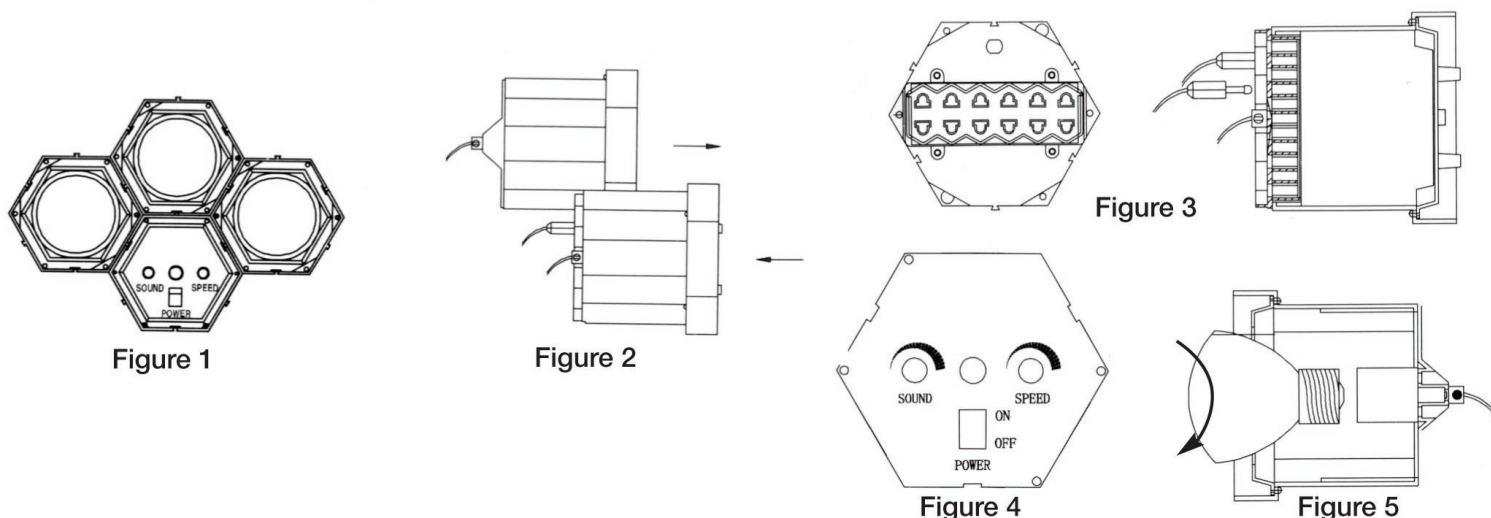

SAFETY

1. To avoid electric shock do not touch any live parts when the unit is activated.
2. Disconnect from mains supply and wait to cool down before changing lamps or fuse.
3. Only qualified personnel should service or repair the unit.
4. Ambient temperature should not exceed 35ºC.
5. Do not block fans or exhaust vents.
6. Indoor Use only
7. Do not stare into beams
8. Not for use by or in the presence of people with photo sensitive epilepsy.

USE

The G005C is a self contained lighting display consisting of 7 modules, 6 that contain 60w coloured lamps and the 7th houses a 6 channel controller. The lamps can be assembled in various combinations, the most popular combination being a hexagonal design (see Figures 1 and 2).
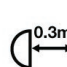

Before use please read the instructions below:

1. Before plugging the unit into a wall socket, check the mains switch is in the OFF position then insert the pod leads into the back of the controller (Figure 3).

2. Plug the mains lead into a wall socket and click the power switch to ON.

3. Adjusting the speed control will make the light chase faster (Figure 4).

4. Adjust the sound sensitivity control until the lights flash to the beat of the music, when using this function adjust the speed control to minimum.

5 When replacing the lamps unplug the unit from the mains socket, unscrew the lamp and replace with the correct type (see technical information and Figure 5).
