# Safety information 1

## Safety information

**Important** - Please read these instructions fully before installing or operating

### Power source

- This symbol means that this unit is double insulated. An earth connection is not required.
- The appliance must be connected to a 220-240 volt 50/60Hz AC supply by means of a three pin socket.
- Unplug this apparatus during lightning storms or when unused for long periods of time - to prevent damage to this product.

- Opening or removing covers may expose you to dangerous voltages or other hazards.

- To prevent risk of fire or electric shock, avoid overloading wall outlets, extension cords, or integral convenience receptacles.
- Use suitable power sources - Plug the product into a suitable power source, as described in the operating instructions or as marked on the product.
- The supply voltage should be the same as that indicated in the technical specifications and the appliance rating plate.
- If the socket outlets in your home are not suitable for the plug supplied with this unit check with a qualified electrician for replacement.
- In order to disconnect the apparatus from the mains completely, switch off the outlet and remove the mains plug completely.

- Do not bend, stretch or pull the supply cable in order to avoid electric shock.
- When installed, the power socket must be within easy reach.

### Moisture and water

- Do not use this apparatus near water or moisture.
- Do not use this product near a bathtub, washbowl, kitchen sink, and laundry tub, in a wet basement, near a swimming pool, or anywhere else that water or moisture is present.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting**

## Safety information

**Important** - Please read these instructions fully before installing or operating

### Heat sources and flames

- Batteries shall not be exposed to excessive heat such as sun, fire or the like
- To prevent risk of fire or electric shock, avoid overloading wall outlets, extension cords, or integral convenience receptacles.

### Servicing and repairs

- Refer all servicing to qualified service personnel
- Servicing is required when the apparatus has been damaged in any way: such as liquid has been spilled or objects have fallen into the apparatus; the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped

# Getting to know your Bluetooth Speaker

You'll be up and running in no time

## Connecting the mains power cable

1. Insert the mains socket jack into the DC power input (11) on the rear of the unit.
2. Connect the mains plug to a wall outlet and switch on.

3. The initial mode when powered on is STANDBY. Press the  button (2) to wake from standby.

---

The last mode used is memorised when the power is turned off and on.

---

## Standby mode

---

This unit is designed to enter STANDBY mode automatically after 20 MINUTES (approximately) of inactivity. Press the  button (2) to wake the unit.

---

1. Press the  button (2) to put the system into standby mode. The red LED indicator will flash for 5 minutes and then enter power saving mode. Press the  button (2) to wake.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting**

# Getting to know your Bluetooth Speaker

You'll be up and running in no time

## Switching input modes

Follow the below instructions to switch between Bluetooth and LINE in input modes.

1. Press the and hold the MODE button (2) to switch modes. Line-in mode is indicated with a solid red LED and Bluetooth is a blue LED (either flashing or solid depending on the connection status).

## Volume function

1. Press and hold the VOL+ button (5) to increase the volume output.
1. Press and hold the VOL- button (6) to decrease the volume output.

## EQ sound effects

Select from five sound EQ modes of: FLAT, ROCK, JAZZ, POP & CLASSIC.

1. Press the EQ button (1) to cycle between them. Each press is indicated by a sequence of three flashes on the LED indicator (8).

---

NOTE: There is no indication which EQ is active, so select the mode that best suits your sound preference for the tracks that you are playing.

# Using your Bluetooth Speaker

3

# Using your Bluetooth Speaker

Let's get started

## Line/AUX-in input connection

Follow the steps below to connect an external audio source (such as a smartphone) for playback through the Bluetooth Speaker..

---

You will need a 3.5mm audio cable (not supplied) to connect a device to the AUX input socket (9).

---

1. Connect one end of the 3.5mm audio cable to the AUX IN input socket (9) on back of the unit. Connect the other end to an earphone socket on the audio device (such as a smartphone).

2. Switch to AUX imode by pressing and holding the MODE button until you see the red LED indicator.
3. Press PLAY on the audio device.
4. Adjust the volume to your desired level.

---

When connecting via the headphone output the volume of the bluetooth speaker is affected by the volume control on the player. Ensure that the audio source (e.g. smartphone) is set to about 70-80% to avoid distortion.

---

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting**

# Using your Bluetooth Speaker

Let's get started

## Connecting a Bluetooth device

When using the Bluetooth connection, you can listen to audio wirelessly from a Bluetooth audio device (e.g. smartphone) within 10 metres of the Bluetooth Speaker unit.

1. When in Bluetooth pairing mode you will see a flashing blue LED while the unit searches for previously paired devices or makes itself available for new connections.
2. Enable Bluetooth on your audio device (e.g. smartphone) and search for available bluetooth connections. Select the 'BUSH WOOD SPEAKER' from the list. If you are asked for a pass code enter '0000'. The blue LED will stop flashing once connected.

---

If you turn off either device before pairing is complete the process will need to be repeated when powered ON again.

---

---

Each time you switch the Bluetooth Speaker on and select BLUETOOTH mode the device will automatically connect, unless you have un-paired the device on your bluetooth audio device.

---

3. You can now begin playback from the audio device and the output will playback through the Bluetooth Speaker.
4. When using a mobile phone as an audio source and you receive a phone call the audio playback stops while you receive the call. When you hang up the audio is restored.

---

The volume output is effected by the volume level on the audio source e.g. smartphone, so make sure that is set to about 70-80% (not too loud to avoid distortion).

---

5. To un-pair (disconnect) a bluetooth device, press and hold the UNPAIR button (1). The Bluetooth Speaker will now revert to search mode, and be available for new connections.

# Using your Bluetooth Speaker

Let's get started

## Controlling a connected device

Once connected you can either use the controls on the audio device to begin playback, skip tracks etc. Or you can use the control buttons on the unit/remote control.

1. The ►|| button (4) when pressed will begin playback of the selected track on the audio device. Press again to pause playback.
2. To skip to the next track press the VOL+/ ►► button (5).
3. To skip to the previous track press the VOL-/ ◀◀ button (6).

---

All other general audio functions such as EQ & VOLUME work as described in this manual.

---

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting**

Helpful technical information

## Care & maintenance

### After using the Bluetooth Speaker

- Set to Standby.
- Switch the unit off at the mains and unplug it if you are leaving it unattended for a long period (holidays etc).

### Care & cleaning

- All care and cleaning operations should be carried out with the unit unplugged from the mains power.
- Occasionally wipe the cabinet with a lint free duster. Never clean the unit with liquids or solvents.

## Technical specification

| Specification            | Rating  |
