# Safety and Care Advice

## Important – Please read these instructions fully before starting assembly

- Check you have all the components and tools listed on the following pages.
- Remove all fittings from the plastic bags and separate them into their groups.
- Keep children and animals away from the work area, small parts could choke if swallowed.
- Make sure you have enough space to layout the parts before starting.

- During assembly do not stand or put weight on the product, this could cause damage.
- Assemble the item as close to its final position (in the same room) as possible.
- Assemble on a soft level surface to avoid damaging the unit or your floor.
- Parts of the assembly will be easier with 2 people.

- To reduce the likelihood of damaging your product please ensure that your power drill is set on a low torque setting.

## Care and maintenance

- Only clean using a damp cloth and mild detergent, do not use bleach or abrasive cleaners.
- From time to time check that there are no loose screws on this unit.
- This product should not be discarded with household waste. Take to your local authority waste disposal centre.

## Handy Hints

- Regularly check and ensure that all bolts and fittings are tightened properly.

**Note:** if required the next page can be cut out and used as reference throughout the assembly. Keep this page with these instructions for future reference.

## Step 8

### Finishing the unit

**Note:** It would be useful to ask someone to help you at this stage.

With help, place the unit in the intended position.

# Fittings-Hinges

**a:** You will need to support the weight of the door during this process. If the door is close to the ground this can be achieved by using blocks or similar. Otherwise a second person may be required to assist.

Loosen, but do not remove the top and bottom screws on all hinge mounting plates.

**a:**

**b:** Try to work on the hinges one at a time. This will prevent the weight of the door pulling it out of position.

**b:**

**c:** This method can also be used to straighten-up tilting or twisting doors.

Try to work on the hinges one at a time. Gradually adjusting and checking to see what changes each adjustment makes.

If you are finding the screw difficult to turn it may help to slightly loosen the rear screw, retightening after.

**c:**
