THANK YOU FOR BUYING A HOTPOINT PRODUCT In order to receive a more complete assistance, please register your product on www.hotpoint.eu/register

Before using the appliance carefully read the Safety Instruction.

PRODUCT DESCRIPTION

PLEASE SCAN THE OR CODE ON

YOUR APPLIANCE IN ORDER TO REACH MORE INFORMATION

ΕN

- 1. Control panel
- **2.** Fan
- **3.** Circular heating element (non-visible)
- **4.** Shelf guides (the level is indicated on the front of the oven)
- 5. Door
- 6. Upper heating element/grill
- 7. Lamp
- 8. Identification plate (do not remove)
- **9.** Lower heating element (non-visible)

CONTROL PANEL

1. LEFT HAND DISPLAY

2. LIGHT

For switching the lamp on/off.

3. BACK

For returning to the previous screen. During cooking, allows settings to be changed.

4. ON/OFF

For switching the oven on and off and for stopping an active function at any time.

5. ROTARY KNOB

Turn this to navigate through the functions and adjust all of the cooking parameters. Press to select, set, access or confirm functions or parameters and eventually start the cooking program.

6. START

For starting functions and confirming settings.or a set value. **7. TIME**

For setting the time as well as setting or adjusting the cooking time.

8. TEMPERATURE

For setting the temperature.

9. RIGHT-HAND DISPLAY

ACCESSORIES

WIRE SHELF	DRIP TRAY	BAKING TRAY *	SLIDING RUNNERS *		
Use to cook food or as a support for pans, cake tins and other ovenproof items of cookware.	Use as an oven tray for cooking meat, fish, vegetables, focaccia, etc. or position underneath the wire shelf to collect cooking juices.	Use for cooking all bread and pastry products, but also for roasts, fish en papillotte, etc.	To facilitate inserting or removing accessories.		
AIR FRY TRAY *	The number and the type of accessories may vary depending on which model is				
	purchased. Other accessories can be purchased separately; for orders and information contact the after sales service. * Available only in certain models				
To be used when cooking foods with Air Fry function, with a baking tray positioned at a lower level to collect possible crumbs and drip. It can be cleaned in the dishwasher.					

INSERTING THE WIRE SHELF AND OTHER ACCESSORIES

Insert the wire shelf horizontally by sliding it across the shelf guides, making sure that the side with the raised edge is facing upwards.

Other accessories, such as the drip tray and the baking tray, are inserted horizontally in the same way as the wire shelf.

REMOVING AND REFITTING THE SHELF GUIDES

• To remove the shelf guides, lift them up and pull the lower parts out of their lodgings: The shelf guides can now be removed.

• To refit the shelf guides, first fit them back into their upper seating. Keeping them held up, slide them into the cooking compartment, then lower them into position in the lower seating.

FITTING THE SLIDING RUNNERS (IF PRESENT)

Remove the shelf guides from the oven and remove the protective plastic from the sliding runners.

Fasten the upper clip of the runner to the shelf guide and slide it along as far as it will go. Lower the other clip into position.

To secure the guide, press the lower portion of the clip firmly against the shelf guide. Make sure that the runners can move freely. Repeat these steps on the other shelf guide on the same level.

Please note: The sliding runners can be fitted on any level.

FUNCTIONS

These allow a fully automatic cooking for all types of food (Lasagna, Meat, Fish, Vegetables, Cakes & Pastries, Salt cakes, Bread, Pizza). To get the best from this function, follow the indications on the relative cooking table.

. steam Bread/Meat/FISH

The Steam Meat/Fish/Bread function allows to obtain excellent performances thanks to the presence of steam in the cooking cycle. The cooking times and the water quantity (100 / 200 ml) of the main dishes are shown in the relative cooking table that you can find online. Always activate this function when the oven is cold, and after pouring drinking water into the bottom of the cavity.

CASSEROLE

This function suggests the best temperature and cooking method for pasta dishes.

PIZZA

This function allows you to cook great homemade pizza, in less than 10 minutes like in a restaurant. The dedicated cooking cycle works at temperature level above 300 degree Celsius, delivering pizza soft inside, crunchy on the edges and with a perfectly even browning.

Combining this function with the Pizza Stone WPro accessory and preheating for 30 minutes can bake a pizza in 5-8 min. (For orders and information contact the after sales service or www.hotpoint.eu.)

PASTRY

This function suggests the best temperature and cooking method for all types of cake.

CONVENTIONAL

For cooking any kind of dish on one shelf only.

GRILL

For grilling steaks, kebabs and sausages, cooking vegetables au gratin or toasting bread. When grilling meat, we recommend using a drip tray to collect the cooking juices: Position the tray on any of the levels below the wire shelf and add 500 ml of drinking water.

🛞 FORCED AIR

For cooking different foods that require the same cooking temperature on several shelves (maximum three) at the same time. This function can be used to cook different foods without odours being transferred from one food to another.

*

CONVECTION BAKE

For cooking meat, baking cakes with fillings on one shelf only.

S SPECIAL FUNCTIONS

FAST PREHEAT For preheating the oven quickly.

TURBO GRILL

For roasting large joints of meat (legs, roast beef, chicken). We recommend using a drip tray to collect the cooking juices: Position the pan on any of the levels below the wire shelf and add 500 ml of drinking water.

ECO CYCLE

For cooking stuffed roasting joints and fillets of meat on a single shelf. When this Eco Cycle is in use, the light will remain switched off during cooking. To use the Eco Cycle and therefore optimise power consumption, the oven door should not be opened until the food is completely cooked.

AIR FRY / CONVECT ROAST

Using dedicated air fry tray (provided with some models) allows you to cook French fries, chicken nuggets and more using less oil, resulting pleasantly crispy. Heating elements cycle to properly heat the cavity, while the fan circulates hot air. Position the food on the Air Fry tray in a single layer and follow Air Fry Cooking Table instructions for best performances. Alternatively, this function can be used to get great roasting results on meat and poultry, potatoes and vegetables, according to the cooking table recommendation. These recipes can be prepared using standard baking tray.

RISING

For optimal proving of sweet or savoury dough. To maintain the quality of proving, do not activate the function if the oven is still hot following a cooking cycle.

DIAMOND CLEAN

The action of the steam released during this special low-temperature cleaning cycle allows dirt and food residues to be removed with ease. Pour 200 ml of drinking water on the bottom of the oven and only activate the function when the oven is cold.

FIRST TIME USE

1. SET THE TIME

You will need to set the time when you switch on the oven for the first time.

The two digits for the hour will start flashing: Turn the knob to set the hour and press $\$ to confirm.

Please note: To change the time at a later point, press and hold O for at least one second while the oven is off and repeat the steps above.

You may need to set the time again following lengthy power outages.

2. HEAT THE OVEN

A new oven may release odours that have been left behind during manufacturing: This is completely normal.

Before starting to cook food, we therefore recommend heating the oven with it empty in order to remove any possible odours. Remove any protective cardboard or transparent film from the oven and remove any accessories from inside it. Heat the oven to 200 °C for around one hour, ideally using a function with air circulation (e.g. "Forced Air" or "Convection Bake").

Follow the instructions for setting the function correctly.

Please note: It is advisable to air the room after using the appliance for the first time.

DAILY USE

1. SELECT A FUNCTION

When the oven is off, only the time is shown on the display. Press and hold O to switch the oven on. Turn the rotary knob to view the main functions available on the left-hand display. Select one and press O.

To select a sub-function (where available), select the main function and then press \odot to confirm and go to the function menu.

Turn the rotary knob to select from amongst the subfunctions available on the right-hand display and then press \bigcirc to confirm.

2. SET THE FUNCTION

After having selected the function you require, you can change its settings. The display will show the settings that can be changed in sequence.

TEMPERATURE / GRILL LEVEL

When the °C icon flashes on the display, turn the knob to change the value, then press \bigcirc to confirm and continue to alter the settings that follow (if possible).

You can also set the grill level (3 = high, 2 = medium, 1 = low) at the same time.

Please note: Once the function has started, you can change the temperature or the grill level by pressing so by turning the knob directly.

DURATION

When the \bigcirc icon flashes on the display, use the adjustment knob to set the cooking time you require and then press \bigcirc to confirm.

You do not have to set the cooking time if you want to manage cooking manually: Press \bigcirc to confirm and start the function. In this case, you cannot set the end cooking time by programming a delayed start. Please note: You can adjust the cooking time that has been set during cooking by pressing \odot : Turn the knob to change the hour and press \bigcirc to confirm.

SETTING THE END COOKING TIME/DELAYED START

In many functions, once you have set a cooking time you can delay starting the function by programming its end time. Where you can change the end time, the display will show the time the function is expected to finish while the \widehat{m} icon flashes.

If necessary, turn the knob to set the time you want cooking to end, then press \triangleright to confirm and start the function.

Place the food in the oven and close the door: The function will start automatically after the period of time that has been calculated in order for cooking to finish at the time you have set.

Please note: Programming a delayed cooking start time will disable the oven preheating phase: The oven will reach the temperature your require gradually, meaning that cooking times will be slightly longer than those listed in the cooking table.

During the waiting time, you can use the knob to change the programmed end time.

Press 4 or (1) to change the temperature and cooking time settings. Press (2) to confirm when finished.

3. ACTIVATE THE FUNCTION

Once you have applied the settings you require, press ▷ to activate the function.

You can press and hold (b) at any time to pause the function that is currently active.

4. PREHEATING

Some functions have an oven preheating phase: Once the function has started, the display indicates that the preheating phase has been activated.

Once this phase has finished, an audible signal will sound and the display will indicate that the oven has reached the set temperature.

At this point, open the door, place the food in the oven, close the door and start cooking by pressing \square .

Please note: Placing the food in the oven before preheating has finished may have an adverse effect on the final cooking result.

Opening the door during the preheating phase will stop pause it.

The cooking time does not include a preheating phase. You can always change the temperature you want the oven to reach using the knob.

5. END OF COOKING

An audible signal will sound and the display will indicate that cooking is complete.

To extend the cooking time without changing the settings, turn the knob to set a new cooking time and press D.

6. SPECIAL FUNCTIONS

DIAMOND CLEAN

To activate the "Diamond Clean" function, with the oven cold, distribute 200 ml of water on the bottom of the oven cavity, then close the oven door.

Access special functions $\[s]\]$ and turn the knob to select $\[c]\]$ from menu. then press $\[c]\]$ to confirm. Press $\[c]\]$ to start immediately the cleaning cycle, or press $\[c]\]$ to set the end time/start delayed.

At the end of the cycle, let the oven colling down and remove any residual water in the oven and start cleaning using a sponge moistened with hot water

(cleaning could be compromised if delayed by more than 15 minutes).

Please note: The duration and temperature of cleaning cycle cannot be set.

. KEYLOCK

To lock the keypad, press and hold ${\triangleleft\!\triangleleft}$ for at least five seconds.

Do this again to unlock the keypad.

Please note: This function can also be activated during cooking. For safety reasons, the oven can be switched off at any time by pressing O.

. NOTES

- Do not cover the inside of the oven with aluminium foil.
- Never drag pots or pans across the bottom of the oven as this could damage the enamel coating.
- Do not place heavy weights on the door and do not hold on to the door.
- Due to the higher temperature of the Pizza cycle it is expected to experience slightly higher cooling fan noise.

	Hotpoint					

MAINTENANCE AND CLEANING

Make sure that the oven has cooled down before carrying out any maintenance or cleaning.

Do not use wire wool, abrasive scourers or abrasive/corrosive cleaning agents, as these could damage the surfaces of the appliance. Wear protective gloves.

The oven must be disconnected from the mains before carrying out any kind of maintenance work.

Do not use steam cleaners.

EXTERIOR SURFACES

• Clean the surfaces with a damp microfibre cloth. If they are very dirty, add a few drops of pH-neutral detergent. Finish off with a dry cloth.

• Do not use corrosive or abrasive detergents. If any of these products inadvertently comes into contact with the surfaces of the appliance, clean immediately with a damp microfibre cloth.

INTERIOR SURFACES

• After every use, leave the oven to cool and then clean it, preferably while it is still warm, to remove any deposits or stains caused by food residues. To dry any condensation that has formed as a result of cooking foods with a high water content, leave the oven to cool completely and then wipe it with a cloth or sponge.

CLEANING THE CATALYTIC PANELS

(ONLY IN SOME MODELS)

This oven is equipped with special catalytic panels that facilitate cleaning of the cooking compartment thanks to their special self-cleaning coating, which is highly porous and able to absorb grease and grime. These panels are fitted to the shelf guides: When repositioning and then refitting the shelf guides, make sure that the hooks at the top are slotted into the appropriate holes in the panels.

REPLACING THE LAMP

For the replacement of the lamp, contact the after sales service.

• Activate the "Diamond Clean" function for optimum cleaning of the internal surfaces. (Only in some models).

• Clean the glass in the door with a suitable liquid detergent.

• The oven door can be removed to facilitate cleaning.

ACCESSORIES

Soak the accessories in a washing-up liquid solution after use, handling them with oven gloves if they are still hot. Food residues can be removed using a washing-up brush or a sponge. Do not clean Food Probe and Meat Probe (if present) in the dishwasher. Air Fry tray (if present) can be cleaned in the dishwasher.

To make best use of the catalytic panels' self-cleaning properties, we recommend heating the oven to 200 °C for around one hour using the "Convection Bake" function. The oven must be empty during this time. Then leave the appliance to cool down before removing any remaining food residues using a nonabrasive sponge.

Please note: Using corrosive or abrasive cleaning agents, stiff brushes, pan scourers or oven sprays could damage the catalytic surface and compromise its self-cleaning properties.

Please contact our After-sales Service if you require replacement panels.

REMOVING AND REFITTING THE DOOR

1. To remove the door, open it fully and lower the catches until they are in the unlock position.

2. Close the door as much as you can.

Take a firm hold of the door with both hands – do not hold it by the handle.

Simply remove the door by continuing to close it while pulling it upwards at the same time until it is released from its seating. Put the door to one side, resting it on a soft surface.

3. Refit the door by moving it towards the oven, aligning the hooks of the hinges with their seating and securing the upper part onto its seating.

LOWER THE TOP HEATING ELEMENT

(ONLY IN SOME MODELS) **1.** Remove the lateral shelf guides.

2. Pull the heating element out a little and lower it.

4. Lower the door and then open it fully. Lower the catches into their original position: Make sure that you lower them down completely.

Apply gentle pressure to check that the catches are in the correct position.

5. Try closing the door and check to make sure that it lines up with the control panel. If it does not, repeat the steps above: The door could become damaged if it does not work properly.

3. To reposition the heating element, lift it up, pulling it slightly towards you, making sure it comes to rest on the lateral supports.
