McGregor Double Foot Pump

Instruction Manual

Dear Customer

Before operating the unit, please take a few minutes to read these instructions carefully. Keep this instruction manual for future reference and pass it on to any other user or subsequent owner. Thank you.

Safety instructions

- Observe the manufacturer's instructions for the item being inflated, particularly the maximum permitted pressure.
- For safety-critical items, such as car tyres, we recommend checking the pressure with a calibrated pressure gauge.
- Check the foot pump regularly for damage. Do not use the foot pump if it is damaged.
- Defective or damaged parts must be properly repaired or replaced by a qualified service workshop, unless otherwise stated in this manual.
- Keep children away while the product is in use.
- Lubricate all moving parts regularly.
- Store the foot pump in a dry place, away from direct sunlight, and protect it from impacts and shocks.
- Do not exceed the maximum pressure, as this may create a risk of explosion.
- During prolonged use, the pump may become very hot due to friction between the pump cylinder and piston. Allow it to cool before handling or storing it.

Operating instructions

1. Place the foot pump on a level, stable surface.
2. Select the appropriate connection adapter. Insert it into the hose connection and secure it by turning the locking lever until it is parallel to the air hose.
3. Make sure the hose is not kinked.
4. Press the pump pedal evenly and not too quickly.
5. Read the pressure on the pressure gauge.
6. Store the adapters safely after use to prevent loss or misuse.

Technical data / equipment

- Nominal maximum pressure: 4 bar
- Large, stable tread surface with a non-slip rubber coating
- Pressure gauge with two scales
- Connection adapters for bicycle and inflatable-boat valves
- Check that the selected adapter is suitable for the item being inflated. If you have any questions about the adapters, contact Customer Services.

Intended use

- For inflating car, motorcycle and bicycle tyres, inflatable boats, air mattresses, balloons and similar inflatable items. Any other use is prohibited.

Cleaning instructions

- Clean with a damp cloth. Do not use solvents or corrosive substances, and do not expose the product to gases that may damage it.
