

VARIABLE POWER RECHARGEABLE VAPOURISER

Thank you for purchasing the Cirro Evolve Temperature Controlled (TC) Module.

We are sure that you will enjoy the vaping experience and the taste of our new premium range of eLiquids Cirro Blends.

This information leaflet contains important safety and usage information, so please ensure you read through it carefully.

Please make sure the following contents are included in the package before using.

Pack Content:

1. 2ml glass tank
2. 0.2Ω coil
3. USB charger
4. 1100 mAh battery

Features:

- Temperature control
- Easy to use temperature adjuster
- Adjustable airflow
- Top filling tank
- Vape while charging

Specification:

- Tank volume: 2.0ml
- Coil resistance: 0.2Ω
- Coil material: Nickel200
- Temperature and power: Low, Medium, High
- Battery capacity: 1100 mAh

Recommended for use with Cirro Blends 6mg Liquids

Getting Started:

1. Fully charge the device (as per the instructions in the "Charging the Battery" section).
2. Fill the tank (as per the instructions in the "Filling the Tank" section).
3. Turn on the device by pressing the power button 5 times within 2 seconds.
4. To vape, press and hold the power button as required.
Note: if the button is pressed for longer than 10 seconds, the unit will automatically shut down.
5. To reactivate, release the power button and turn on the device by pressing the power button 5 times within 2 seconds.
6. Turn off the device by pressing the power button 5 times within 2 seconds.

Charging the Battery:

- When the battery voltage drops below 3.4V, the LED light will flash 10 times and the device will turn off.
- The battery will require charging, which takes approximately 2 hours.
- Connect the battery to a computer or compatible 5V/1A mains adapter via the supplied USB charger. Once connected, the LED light will flash 5 times.
- When fully charged the LED will flash three times and go out.
- The Evolve can be vaped while it is charging.
- Do not leave the battery unattended whilst charging and never charge it overnight.

If the product is not used for 10 mins, it will automatically lock down. Alternatively, press and hold the activation button for more than 10 seconds to lock manually.

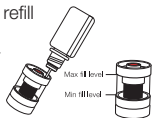

To reactivate the product, press the activation button 5 times within 2 seconds.

Filling the Tank:

1. With the tank attached to the battery, firmly grip the tank section and unscrew the mouthpiece anti-clockwise.
2. Tilt the tank to 45 degrees and pour the eLiquid down the

sides of the tank. Ensure that no eLiquid flows into the central air hole.

3. To avoid any leakage, ensure that your tank is not overfilled – only fill to the maximum tank volume of 2ml (marked on tank window).
4. Replace the mouthpiece onto the tank.
5. Allow the tank and coil to prime for 5 minutes before use.
6. You should refill your tank before your eLiquid drops below the minimum fill point.

Replacing the Coil:

1. Depending on your personal usage, the coils should be replaced approximately every 7-10 days or if you notice a change in vape or taste.
2. Firmly grip the knurled part of the airflow valve of the tank to remove the tank from the battery section. Do not detach the battery by holding glass tank section as this may cause eLiquid to leak from the tank.
3. Turn the tank upside down and unscrew the base of the tank (airflow valve) from the main tank.
4. Unscrew the old coil from the tank and replace with a new coil.
5. Securely reattach the base of the tank (airflow valve) to the tank, avoiding overtightening.
6. Allow the tank and coil to prime for 5 minutes before use.
