VPRO

GAMING MOUSE MAT

V1000

The perfect foundation for your skills: The V1000 is the ideal multi-genre mouse mat – developed for the best performance, no matter what game, sensor or sensitivity. The heat-treated poly-fibre surface is optimized for pixel-precise aiming, while the rubberized “V” backing guarantees maximum grip – even in

the heat of battle. Combined with the accurate tracking offered by the consistent surface texture, your path to total scoreboard domination is clear. And to make sure your reign continues, the no-fray border with over 50 stitches per centimeter offers exceptional durability even with heavy use.

► HEAT-TREATED POLY-FIBRE SURFACE

The stuff legends are made of: The heat-treated poly-fibre surface guarantees a soft, comfortable feel and absolutely pixel-precise aiming with every gaming mouse and setting. Welcome to Headshot-City – population: You.

► ANTI-SLIP „V“ BACKING

Precision needs stability: No matter how rough the action is, the rubberized backing with its v-shaped 3D texture won't budge a single millimeter.

► STITCHED NO-FRAY BORDER

Stays in shape: The carefully stitched border is ultra-durable and won't fray. With a stitch density of 50+ stitches per centimeter, your V1000 will never fail you – even in the messiest of battles.
