-Quick Start Guide-

IET2

Inner Ear Thermometer

1

Unpack thermometer
and
insert batteries.

Condition the thermometer at room temperature for 30 minutes before using device for the first time.

3

Remove protective cap
covering probe lens.

4

Use a new probe cover with each and every measurement – ensure probe cover is fitted on firmly before use.

5

Press the 'on/recall' button to turn on the thermometer.

6/A

Straighten the ear canal by pulling the outer ear up and back to give a clear view of the eardrum.

For ages:
Newborn to 1 year.

Straighten the ear canal by pulling the outer ear up and back to give a clear view of the eardrum.

For ages:
1 year to adult.

While pulling the outer ear,
insert the probe into the
ear canal – insert as deep as
is comfortable.

8

Press and immediately release the 'SCAN' button.

Do not remove the thermometer from the ear until you hear the beep sound - this beep means that the measurement is complete.

Remove the thermometer
from the ear.
The display shows the
measured temperature.
