BRAND WORLDWIDE

REPUBLIC OF GAMERS

For those who dare

Welcome to Republic of Gamers. It's a proving ground for the elite — a place where players and teams gather to celebrate camaraderie and gaming excellence. There's no room for mediocrity or weakness here.

This is a call for those who dare venture, defy convention, and rebel against conformity. You rise up to challenges, and are not afraid to stare failure in the face, time and time again. You stand by your instincts, as well as alongside comrades in need. Republic of Gamers is for those who dare seek the impossible because 'hard' isn't enough.

ROG is the Choice of Champions. If you dare, put on your game face and Join the Republic.

THE ROG LEGACY CONTINUES

NO. 1 GAMING LAPTOP BRAND WORLDWIDE

ROG R&D engineers are hardcore gamers, too. We know gaming, and we are constantly striving to develop products that gamers need. Our goal: give gamers the ultimate gaming hardware.

Pokdeward – Gold
Pokde.net

If you ever wanted a secondary display that stows away neatly, while holding plenty of raw power, and still look extremely sleek, the ROG Zephyrus Duo might just be the one you're looking for.

ROG Zephyrus Duo (RTX 2080S) – July 2020

Nextrift

NEXTRIFT

Asus officially launched the high-end, unique ROG Zephyrus Duo 15 in Malaysia. Sporting two screens, a fast Nvidia RTX 2080 Super Max-Q GPU, as well as a sleek design, it is the Taiwanese company's most ambitious gaming laptop yet.

ROG Zephyrus Duo (RTX 2080S) – August 2020

Pokdeward – Gold
Pokde.net

You get solid performance, good build quality, a good array of ports, good thermals, vibrant display with 300Hz refresh rate, per-key RGB, and surprisingly great speakers in a very portable package.

ROG Zephyrus S17 (RTX 2080S) – July 2020

Tech Critter

I can safely say that ROG has done a great job. The performance is exceptional and most importantly its remarkable thermal capabilities, thanks to the liquid metal thermal compound.

ROG Zephyrus S15 (RTX 2080S) – July 2020

KL GadgetGuy

The ASUS ROG Strix SCAR 15 is one of the best midrange laptops you can buy right now with reliable performance and a solid, sleek design.

ROG STRIX SCAR 15 (RTX 2070) – August 2020

Gamer Santai

Panel 300Hz / 3ms membolehkan permainan FPS yang tinggi sebenar untuk permainan kompetitif pada tahap tertinggi.

ROG STRIX SCAR 15 (RTX 2070) – August 2020

Product Nation

This is an 8-core powerhouse made suitable for competitive gaming as well as handling heavy-duty applications, say video editing or graphic works.

ROG STRIX SCAR 15 (RTX 2070) – August 2020

Gamer Braves

The display is really one of the best things for this laptop, with the colors, brightness all popping out be it film or games with perfect color balance, without tiring out the eyes.

ROG STRIX SCAR 15 (RTX 2070) – August 2020

Wanuxi

ASUS ROG Strix SCAR 15电竞笔电有个值得一提的特点，就是这电竞笔电搭配了Keystone II来客制化这电竞笔电以及保护资料隐私。

ROG STRIX SCAR 15 (RTX 2070) – August 2020

Gold Award
TechCritic

In terms of the design, it is classy and minimalist. It doesn't weight a tonne yet packs a lot of performance under its hood.

ROG Zephyrus G14 (RTX 2060) – March 2020

TechNave

Overall, I've enjoyed using the ASUS ROG Zephyrus a lot during this period. The AMD Ryzen 9 4900HS CPU certainly proved that it's more than capable of handling graphic intense Triple-A titles.

ROG Zephyrus G14 (RTX 2060) – June 2020

Vesper

ASUS beefed up the TUF Gaming A15 with some great specification for both Gamers and Content Creators and with features that was once only available to niche consumer like the 2x M.2 SSD slots.

ASUS TUF Gaming A15 (RTX2060) – May 2020

AMD Series

Lowyat.net

Everything about the Zephyrus G14 just continues to surprise me even till today. The Ryzen 9 4900HS powering it is in a class of its own, while the legs on its battery is something you would rarely associate with an AMD Ryzen CPU.

ROG Zephyrus G14 (RTX 2060) – May 2020

IGN SEA

Pronounced Ani - Me, the ROG Zephyrus G14 is one of the most compact and COOLEST gaming laptops around.

ROG Zephyrus G14 (RTX 2060) – July 2020

HiTechCentury

The ASUS TUF Gaming A15 represents a superbly tuned combination of performance and rugged good looks that lets you tackle the latest games and heavy duty content creation at a reasonable price point.

ASUS TUF Gaming A15 (RTX2060) – May 2020

Salty News Network

Its diminutive form factor, great battery life, and support for Power Delivery are also huge pluses, allowing you to bring it anywhere with ease of mind.

ROG Zephyrus G14 (RTX 2060) – June 2020

Gold Award
NasilemakTech

This laptop is an attention-grabber. Whenever I take out this laptop, the first question I get is – what are those holes? When I boot it up, everyone goes wow.

ROG Zephyrus G14 (RTX 2060) – July 2020

The AXO

Overall, I had a great time using the ASUS TUF Gaming A15 as my daily laptop. It performs really well in day to day writing and web browsing tasks. Gaming is smooth with the 144Hz refresh rate display.

ASUS TUF Gaming A15 (RTX2060) – May 2020

PRAISED BY MEDIA WORLDWIDE

techradar

Asus has revealed the ROG Zephyrus Duo 15, the world's first gaming laptop with two screens, and packed with some of the latest gaming tech to boot.

Asus has literally gone ahead to make the most powerful, compact gaming laptop without compromising on style and substance.

AMD's new Ryzen 4000-series heavy-duty processor, RTX 2060, fast storage, excellent display, and that design makes it one of the most anticipated gaming laptops for this year.

techradar

tom's HARDWARE

tom's
HARDWARE
Editor's
Choice

It's been a long time since I've been this impressed with a laptop's design. [...] the ROG Zephyrus Duo 15 takes things to another level —literally—and delivers some serious cooling innovation in the process. It's one of the best gaming laptops you can buy, particularly if you value the utility of a second screen more than comfortable input devices.

tom's
HARDWARE
Editor's
Choice

Asus' design is the nicest I've seen for a laptop with an AMD mobile CPU. For once, we have a system that doesn't feel like it skimped on anything to cut costs. The screen is good, the battery life is strong and the keyboard is clicky. [...] If you're looking for a gaming laptop that looks great, lasts a long time on a charge and can blast through your favorite games at a reasonable price, the Asus ROG Zephyrus G14 could be your best choice.

tom's HARDWARE

gamesradar+

The Zephyrus Duo 15 is a premium-gaming machine and desktop-replacement whichever way you cut it. That said, it will be ideal for streamers who can utilise the second screen for a stream deck or comment run downs. It's great for creatives who value a single do-it-all machine for work and play too, to say nothing of high-performance gaming fanatics who want the best that one gaming-focused laptop can offer.

For those looking to wield genuine power - of the ray-tracing kind - with genuine portability, with a splash of style then the Asus Zephyrus G14 is for you.

gamesradar+

The Asus ROG Zephyrus G14 is not your average gaming laptop. It's something quite special. I'm not just talking about the machined magnesium-aluminum 14-inch chassis either, although that really is beautiful, it's more to do with the fact that this represents a fundamental shift away from the norm that sees Intel as the chip of choice for serious laptop performance.

PC GAMER

The most striking gaming laptop you'll see in 2020 [...] Once more ASUS has gone wild with its hero gaming laptop and it looks like a remarkable spectacle. I can't wait to spend actual, proper time with it in the future.

ASUS ROG Zephyrus G14 with AMD 8-core Ryzen 9 4900HS is a gamechanger [...] I've been quite surprised by this laptop even if it has no webcam (yeah, that's right). I really like the size and feel of it.

"At OFFSET ESPORTS we believe that good results are the result not only of the commitment and dedication of the players, but also of computers and peripherals with excellent performance and that's why ASUS ROG is our choice from the beginning."

RRQ

FORTNITE

"TEAM RRQ is a leading esports organization in South East Asia. Together with ROG, the leading brand for gaming in the world, we know that we can dominate the gaming stage."

STRINGENT QUALITY CONTROL

All ROG notebooks go through a series of durability tests to ensure toughness and reliability. They're tested under extreme conditions and situations to ensure they're always up to the high standards expected of ROG gear.

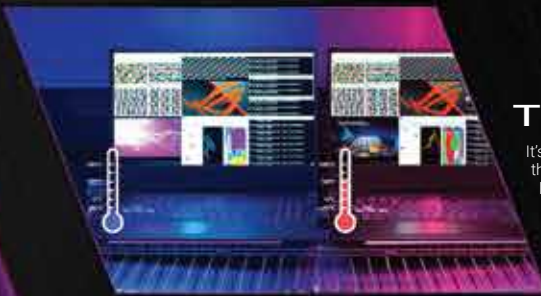

VIBRATION TEST

We rattle our systems with vibrations across all axes and check for any damage with a microscope. It's not hard to understand why this is necessary; any time a system is in transit, it's experiencing vibrations, and most of us take our laptops with us everywhere.

TEMPERATURE TEST

We toss ROG systems into humidity chamber and freeze them for up to 24 hours. Then we perform dozens of startup cycles. Next, we crank up the thermostat to 50°C/122°F for up to another 24 hours, and do even more startup cycles.

TWIST TEST

It's hard on your laptop when you carry it around with the lid open, but of course, we all do it. To be sure our laptops are tough enough to endure, we put them in a pair of clamps and twist the base of the laptops and the lids 50,000 times.

NOISE TEST

We want to keep our laptops and desktops humming along as quietly as possible even under a full load, so we use a sensitive microphone to make sure they test under certain noise thresholds. We even check to make sure the touchpads on laptops don't click too loudly.

PANEL PRESSURE TEST

We test the durability of the lid and underside of the laptop. Both need to be able to absorb pressure without cracking or damaging any of the components inside. This is a simple test whereby a machine applies 25kg of force to the top and bottom of our laptops.

KEYBOARD TEST

To ensure that our laptop keyboards will hold up, we test them to be sure most models can withstand at least 20 million key presses. We speed up the process by using numerous probes that stand in for your fingers. Then we mash the keys millions of times in rapid succession.

SHOCK TEST

Our shock tests are meant to reproduce the miscellaneous bumps that all systems are subjected to at one point or another. We strap ROG systems onto a "shock table," shock them with g forces, and then check to be sure that each part has held together and no microscopic cracks anywhere.

HINGE ROTATION TEST

Tougher still, that hinge has to stay perfect even after years of abuse, which is why we use a machine to open and close laptop lids 20,000 times before they leave the test bench.

PORT TEST

We do port plugging tests by using a machine to insert and remove a connector into and from our systems' ports 5,000 times. Another test checks the endurance of plug mis-insertion.

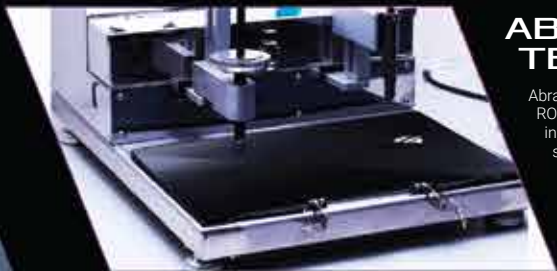

DROP TEST

To make sure that daily jostles don't add up to long-term damage, we drop each product from a height of 30cm and repeat the test from multiple angles, letting each side and every corner of the product hits the ground.

ACCELERATION TEST

HALT test stands for Highly Accelerated Life Test, and express moves notebooks through their typical life cycle to ferret out problems, with extensive analysis conducted by engineers.

ABRASIVE TEST

Abrasive resistance test subjects ASUS ROG Notebook exteriors to friction, indicating colors and surface materials stay at prime condition even after extensive and demanding usage.

CARRYING GAMING TECHNOLOGY INTO THE FUTURE

ROG innovation leader

Active Aerodynamic System plus lifts your airflow

In order to increase airflow through the ultra-slim chassis of our highest end Zephyrus laptops, our original Active Aerodynamic System (AAS) lifted to expose a small vent beneath the chassis. AAS Plus pushes that concept further, opening up a 28.5mm high air intake behind the tilted secondary display that increases airflow by 30%. Instead of drawing in air from below where warmer components have a greater effect on intake flow, allowing our fans to draw cooler air from above. The larger space also helps keep noise levels below 43dB on performance mode, giving you a quieter gaming experience.

The ROG Liquid Metal Project Revolutionizes Cooling

The ongoing ROG liquid metal project is dedicated to developing better cooling for gaming laptops. The ROG Mothership was the first system to take advantage of this technology, paving the way for a much wider rollout across the full family of ROG gaming laptops with 10th Gen Intel Core processors. Patents for the liquid metal process and anti-seepage barrier formally recognize the innovation ROG brings to gaming laptops. The superior thermal compound enhances cooling, improving performance, temperatures and acoustics. While liquid metal was once restricted to the realm of hardcore overclocking, ROG is bringing it to gamers everywhere.

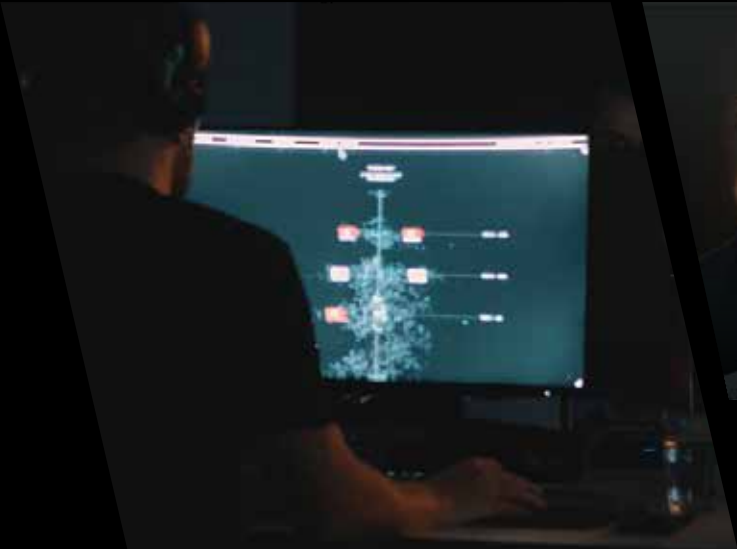

ROG MASTERS IN ACTION

Featuring a collection of leading lights in their respective industries, our ROG Masters are discerning users who have decided to use an ROG laptop as their device of choice for their everyday work and play. Read how using an ROG laptop has elevated their capabilities, allowing them to reach the pinnacle of their industry.

Jesse Lee Stout
Creative Director at Metaform.Studio

Drake. Rihanna. Muse. Imagine Dragons. When A-list artists need inspired design, they turn to the same person: ROG Master Jesse Lee Stout. As a creative director, Jesse uses the ROG Zephyrus G14 to work on some of music's biggest productions, designing next-level shows to deliver incredible live experiences for fans across the world.

10 Chambers Collective
Indie Game Development Studio

Discerning gamers today would all have heard of 10 Chambers Collective, a self-funded indie gaming studio and their hit game, GTFO. GTFO is a terrifyingly beautiful 4-player FPS which has wowed audiences with its tactical and team-oriented gameplay. As a small team, 10 Chambers Collective have maximized ROG Laptops like the ROG Zephyrus S15 to create their games that have defied all expectations and won over a new set of gaming fans.

Wang Xin Xiang
CG Supervisor of MoonShine VFX

Award-winning VFX Company MoonShine helps breathe life into the neon-lit world of Republic of Gamers. The ROG universe goes from creative concept to three-dimensional reality thanks to a highly talented team of artists, animators, and designers—and a little help from high-end gear, like the Zephyrus Duo 15.

POWERFUL MEMORY

The latest dual-channel DDR4-3200 memory lets you multitask like a pro. This high-performance RAM stands up to any challenge thrown its way. Gamers can play the latest AAA titles, stream, and chat with teammates without missing a beat, while serious power users and creators can run every program they need at once for peak productivity.

CPU Performance Benchmark

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

WORLD'S FIRST 300Hz GAMING DISPLAY

ROG is one of the first to push gaming display refresh rates to 300Hz/3ms across a range of top tier gaming laptops. High refresh rates enable superior visual smoothness, giving gamers a competitive advantage for fast-paced, high-FPS experiences. The 3ms grey-to-grey response time minimizes blur, making target tracking clearer and more accurate for high-level play. Raising the refresh rate to 300Hz represents a 25% increase over the current standard for high-level esports tournaments. At that speed, the screen can draw 5X more frames than the 60Hz panels found on conventional laptops.

PROART™ TRUECOLOR TECHNOLOGY FOR SPECTACULAR VISUALS

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

Inside the slender frame sits one of two gorgeous IPS-level panels. HDR powers premium AAA titles with richer colors, brilliant whites, and deeper blacks via local dimming. The SDR alternative gives content creators accurate, Pantone Validated colors with factory calibration and ROG-exclusive ProArt™ TruColor Technology. Both boast silky smooth 240Hz refresh rates with blur-free 3ms response times.

*Users may choose between HDR or Pantone® Validated display according to different countries

ROG INTELLIGENT COOLING MEANS MORE FPS

ROG uses a strategic mix of hardware and features to achieve ideal cooling for each combination of components and chassis, combined with smart software that optimizes your experience for work and play.

LIQUID METAL X THERMAL GRIZZLY

NO. 1 GAMING LAPTOP BRAND WORLDWIDE

Maximum cooling performance

Maximum cooling performance is one of the greatest challenges facing gaming laptops, and ROG is constantly looking for ways to improve. This drive led to liquid metals, which are extremely effective at transferring thermal energy between surfaces like a processor die and heatsink. Over a year of testing liquid metal with various processors, ROG engineers observed a 10-20°C reduction in temperatures depending on the CPU. Lower temperatures help processors sustain higher clock speeds for longer and prevent fans from ramping up to louder RPMs. The additional thermal headroom can also be used to reach even faster frequencies and higher performance.

UP TO
14°C COOLER
CPU TEMPERATURE

Patented mechanical precision

A mechanized arm wets its silicon brush in a container of liquid metal and then glides back and forth across the CPU. It performs exactly 17 passes, which internal testing determined is the ideal number for complete coverage. To minimize accumulation on the edges of the processor, the initial brushing pass makes contact at a different point on the surface than subsequent strokes. The die also is set inside a stainless-steel shim that prevents excess compound from spreading to the surrounding area. The shim is small enough to sit directly on the CPU package, so it can be used for different laptops from the same generation. Too little metal reduces the efficiency of thermal transfer, but too much increases the likelihood of leakage and waste. While the first pass sets the stage, a second machine injects more compound at two points on the die. To keep it from seeping out and shorting adjacent circuitry, ROG engineers created a special barrier that fits into an incredibly slim space between the heatsink and CPU package that's only 0.1 mm tall — nearly the height of the die itself.

Active Aerodynamic System

Lift your Active Aerodynamic System

Lift your Active Aerodynamic System Active Aerodynamic System (AAS) helps reduce the temperature of air flowing into the fans by about 10°C compared to typical laptops. Cool air is drawn in through the opening and pumped out of exhausts in the edges of the chassis. Slight ramps in the outlets help direct warm air upward, separating it from the cooler layer of intake air below.

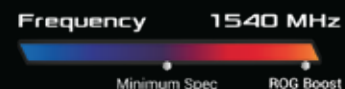

Stand Tall to Breathe Deeper

Typical clamshell laptops force fans to draw air through a narrow space under the chassis. The innovative design of the ROG Mothership lets fans breathe freely from the back to improve cooling.

Boost Past the Competition

Maximize GPU performance

ROG Boost takes graphics to the next level by pushing GPUs to their maximum clock speeds, wattages, and beyond. Faster frequencies mean more frames per second and smoother, more engaging gameplay. ROG's suite of Intelligent Cooling techniques push GPUs to the top of the clock speeds & wattages range and in some cases into factory overclocked territory. Elevating the frequency and power envelope with ROG Boost gives gamers higher frame rates and an edge over the competition.

Tailor-Made Heat Spreaders

Tailored to the cooling for each device. The heat spreaders are specially shaped for each machine and placed to optimally collect heat from multiple components. The attached heatpipe network varies by model, with higher-end machines featuring additional pipes to ensure effective cooling for the processors and power circuitry.

ACTIVE AERODYNAMIC SYSTEM PLUS

NO. 1 GAMING LAPTOP BRAND WORLDWIDE

Airflow on a new dimension

AAS Plus opens up a 28.5mm high air intake behind the tilted secondary display that increases airflow by 30%. Instead of drawing in air from below where warmer components have a greater effect on intake flow, AAS Plus is designed to draw in cooler air from above. The larger space also helps keep noise levels below 43dB on performance mode, giving you a quieter gaming experience.

Self-Cleaning Anti-Dust Tunnels

Self-cleaning cooling
sustains performance

Anti-dust tunnels channel debris out of the chassis, preventing build-up to preserve performance. Active cooling invariably pulls tiny fibers of dust and debris into the system, where they become trapped and accumulate on key components over time. This buildup can compromise long-term performance and stability; heatsinks dissipate less heat, vents become blocked, and fans generate less airflow.

Coolzone Keyboard

CoolZone keeps
keyboards comfortable

Laptop keyboards can become uncomfortably hot during marathon gaming sessions. Venting by the WASD keys allows the fan beneath to generate airflow through the board, keeping your crucial inputs cool.

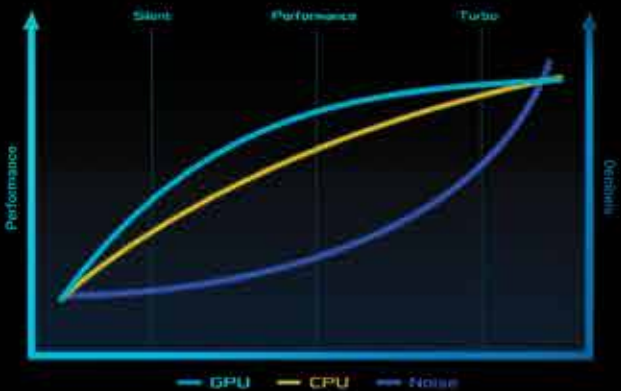

NO.1 GAMING LAPTOP
BRAND WORLDWIDE

Ultra-Thin Fins/ Heatpipes/Spreaders

Dissipate the heat

Sintered heatpipes are carefully arranged to draw heat away from the CPU, GPU, and VRM supplying power. Heat is piped to slim 0.1mm fins that make up the heatsinks. With half the thickness of regular fins, we can fit more per heatsink to make the most of limited space. Extra fins mean more surface area for heat dissipation. Their ultra-thin profile lowers air resistance despite the higher density, allowing fans to more effectively transfer heat out of the system.

Operating Modes

Strike a balance
between speed and noise

Cooling requirements vary based on the task. Turbo, Performance, and Silent operating modes optimize performance and acoustics for different scenarios, providing more power or greater stealth on demand.

N-Blade Fans

More blades amplify airflow

Higher densities allow n-Blade fans to draw more air with each rotation. The blades must be incredibly thin, so they're made from a special liquid-crystal polymer strong enough to withstand high RPMs. The latest version has 83 blades that enable 20% more airflow than conventional designs at the same noise level—or equivalent airflow with 5dB less noise.

Scenario Profiles

Scenario Profiles enhance your experience

Automatic switching between Scenario Profiles puts you in the right mode for the moment. Define your preferred operating mode and other system settings for individual applications and games.

PATENTED ROG RANGEBOOST STRENGTHENS YOUR SIGNAL

Patented ROG RangeBoost technology combines four antennas located at the back and front of the machine with a unique algorithm that constantly scans and selects the best pair of antennas able to cover each other's dead spots, resulting in the strongest possible signal. The latest 802.11ac Gigabit Wi-Fi standard delivers speeds of up to 1.7Gbps — twice that of 802.11ac 2x2 and 12x that of 802.11b/g/n!

Wi-Fi Connectivity Benchmark

| | | |
|----------------------|----------|------------|
| 802.11ac 2x2 Gigabit | 1733Mbps | 12x faster |
| 802.11ac 2x2 | 867Mbps | 6x faster |
| 802.11b/g/n | 150Mbps | |

RELIABLE WI-FI 6 NETWORKING

Ultrafast Intel® Wi-Fi 6 with Gig+ (802.11ax) lets you game reliably at LAN speeds wherever compatible connections are available. Wi-Fi 6 (Gig+) enables a peak interface bandwidth up to 2.4Gbps*, with boosted network speed, efficiency, and reliability in crowded spaces. It also reduces latency, meaning less lag for network-sensitive activities like quick play matches on the go. ROG RangeBoost technology complements your Wi-Fi 6 by maximizing coverage. The unique RangeBoost algorithm evaluates the signal strength of four internal antennas and picks the best pair to use for your location, minimizing dead spots and increasing range by up to 30%.

* Unless otherwise stated, Wi-Fi speeds are based on theoretical performance. Actual performance may vary.

Keystone II THE KEY TO DEEP PC PERSONALIZATION

NO. 1 GAMING LAPTOP BRAND WORLDWIDE

Inspired by our collaboration with BMW Designworks Group to reimagine the future of gaming laptops, Keystones are physical NFC keys that were created to evoke a physical connection between a user and their machine. These keys can be paired with different functions that transform your gaming machine to your preferred settings when docked into compatible devices.

Quick Command

Keystones quickly perform a wide range of function and apps based on preferences saved to your ROG ID. Dock a keystone to launch your favorite apps, switch operating modes, log out of Windows, or even activate Stealth Mode on your PC to work and play with greater privacy.

Shadow Drive

Keep private files in a secret storage space linked to your Keystone. When docked, keystones can be used to reveal a Shadow Drive within your computer. For Windows 10 Pro users, this hidden partition can be encrypted to offer additional security for personal data, programs, and files you don't want to fall into the wrong hands. Link the drive to multiple Keystones to share access or create backup keys of your own.

AURA CREATOR UNLEASHES UNLIMITED RGB CREATIVITY

Take the exclusive Aura RGB lighting technology to the next level with this powerful tool that lets you easily customize the lighting of all your Aura devices down to the last LED. Create richly detailed, multi-layered effects that make your system come alive with your personality. If you're ready to make your system shine, check the list below to see if Aura Creator works with your device and then click Download to get started now.

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

AURA SYNC COORDINATES COLORS ACROSS YOUR ECOSYSTEM

Aura Sync technology gives you the freedom to customize and sync up light effects with Aura Sync-supported gaming mice, headsets, and other peripherals to give your entire gaming setup a consistent look and feel. With a full spectrum of colors to choose from, as well as eight different lighting modes that can be accessed via Armoury Crate, Aura Sync technology lets you express your gaming persona, or the feel of the game you're currently playing.

*Effects may vary by models

ROG SCREENPAD PLUS

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

Stream

Streaming and gaming simultaneously is simpler with two screens. Keep your broadcast controls, video feed, and other commands on deck to produce a high-quality stream on the go. Stay engaged with your audience by keeping all your chat channels in view as you play. Optimized apps like Xsplit Gamecaster make it easily easy to take your stream to the next level.

Create

More screen space for multimedia editing makes it easier to create original content anywhere. Give yourself a broader workspace for writing, drawing, and more, while keeping critical tools like timelines, layers, histories, and reference materials within easy reach. Stylus support lets you use the touchscreen like a drawing tablet for quick sketches, note-taking, and more.

Game

Streaming and gaming simultaneously is simpler with two screens. Keep your broadcast controls, video feed, and other commands on deck to produce a high-quality stream on the go. Stay engaged with your audience by keeping all your chat channels in view as you play. Optimized apps like Xsplit Gamecaster make it easily easy to take your stream to the next level.

Immerse

Immerse yourself more deeply in games with unobstructed views. ROG is working with game developers to enhance your experience with optimized screen space and minimal distractions. AAA games like Dying Light 2 from Techland moves your co-op chats, inventory, and mission log to the secondary screen, letting you stay locked in the action.

Multitask

Intuitive touchscreen controls and optimized apps make interactions between your displays seamless. Move browsers, videos, and chats to the ScreenPad Plus to keep them on deck while you work and play. Shift between functions easily with simple touch commands. More screen space makes multitasking easier than ever, letting you keep an eye on all the tools you need at the same time.

Multitask more efficiently with the expansive ROG ScreenPad™ Plus secondary touchscreen. Intuitive touchscreen controls work seamlessly with the main display, letting you optimize your space for gaming, content creation, and more. Move in-game action bars and inventory to the second screen for more immersive views of gorgeously rendered worlds. Stream your gameplay on the main display and keep broadcast controls and chats within reach. The ScreenPad Plus lets you keep critical commands in sight while turning your primary screen into a broader canvas for creativity.

AniMe Matrix Display

ILLUMINATING NEW PLATFORMS FOR CREATIVITY

ROG consistently pushes the boundaries of personalization to help users express themselves and make each machine their own. The groundbreaking AniMe Matrix Display turns the top of your gaming notebook into an illuminated canvas that offers you a wholly new platform for creativity. Made up of over a thousand individual mini-LEDs, these displays can be used to show custom animations of your own creation, scrolling text to convey quick messages, equalizer visualizations to enhance your music playback, and status updates that keep you in the loop on new messages, and more.

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

Animation

Show off creative animations in clean white LED lighting with the AniMe Matrix Display. You can create your own animations by inserting individual images frame by frame, and watch them play out in illuminated animated sequences.

Scrolling Text

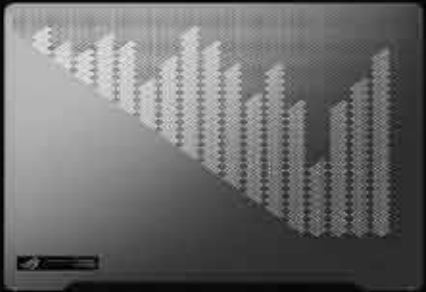

Make your status and thoughts known with a scrolling text display. Type in any text and have it scroll by in LED lights, perfect for sending a message from across a room or letting people know to "Do Not Disturb" while you're at work.

Audio Equalizer

A selection of equalizer visualizations synchronize to your music and amplify your audio experience. Play the DJ at parties and events with visualizations that lighten up the mood.

System Notifications

Even when the laptop is closed, the AniMe Matrix Display can keep you updated on the time, date, battery life, incoming messages, and more.

UNIFIED SYSTEM CONTROL WITH ARMOURY CRATE

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

The brand-new ROG Armoury Crate software unifies system and lighting control and puts them at your fingertips. Its user-friendly interface lets you manage up to four gaming profiles that automatically load your preferred settings when you launch your favorite titles. These options are the beginning for what will become an even more versatile tool.

Intelligent Cooling enables ROG Boost, a term we use to describe reaching a GPU higher clock speed and wattage than the baseline requirement. GeForce GPUs can be configured with a range of clock speeds and power envelopes from the mildest Max-Q spec to full-throttle implementations that don't hold anything back. ROG Boost keeps us at the upper end of that range and some cases even pushes the GPU beyond stock speed.

ACCIDENTAL DAMAGE PROTECTION

ASUS covers 80% of total repair on 1st year of manufacturer warranty for any ASUS consumer & gaming laptops purchased from 1st January 2020 onwards*. All you have to pay is 20% of total repair cost and full labour fee only. Now you can enjoy greater peace of mind and worry no more!

Spill Damage

Electrical Surge Damage

Drop & Accidental Breakage

Perfect Warranty Service

- Perfect Warranty Program is created to help protect device against damages such as: liquid spills, electrical surges, drops, and accidental breakages.
- This is only applicable for Malaysia & Brunei. Device purchased outside of the Malaysia and Brunei are not eligible.
- Any purchase of ASUS Consumer Notebook & Gaming Series from 1st January 2020 (Only applicable for ASUS Consumer Notebook & Gaming Series launched from 1st January 2019 and 2020 onwards)
- Consumer is eligible for (1) time Repair Service on the (1st) year of manufacturer warranty. Perfect Warranty is not applicable on the (2nd) year of manufacturer warranty.
- Consumer is required to pay at 20% of Total Key Parts Fee under this Perfect Warranty. Key Parts include LCD, Main Board, Processor, Hard Disk Drive, SSD, memory or parts is identified by ASUS under Key Parts category (Labor fee shall be fully paid by the consumer).
- All components repaired or replaced by an ASUS Service Center shall be covered under warranty for (1) months or for the remainder of the manufacturer warranty period, whichever is applicable.
- Perfect Warranty only applies to ASUS original hardware built into the ASUS Products, excluding any parts not installed by ASUS, non-ASUS parts replaced by ASUS Service Center, any software, external devices, accessories, peripherals and bundled consumables (including but not limited to the battery of the product, carry bags, support discs, cables and wires or mouse).
- Perfect Warranty does NOT apply to the following: scratches and dents, incorrect or inadequate customer installation, lost or stolen products, intentional damage, recovery or transfer or stored data to the product, requests for miscellaneous cables or accessories, and damages caused by acts of God, nature, or war.
- ASUS is not responsible for the restoration or reinstallation of any data or programs other than software installed by ASUS when the ASUS Product was manufactured.
- ASUS reserves the right to amend perfect warranty details without prior notice.

MULTI-CHAMBERED CHASSIS BOOSTS COOLING

Comprehensive cooling enables the high-level processor performance required for serious gaming and work. The multi-zone chassis keeps the CPU, graphics card, and power supply in separate chambers to minimize thermal interference and lower ambient temperatures. CPU performance is further enhanced by a liquid cooling system that enables higher sustained clock speeds for speedier system performance. Dedicated heatsinks across the PCIe 4.0 SSD slots speed up workflows even more with superfast sustained speeds and reliable data access.

*Vertical graphics card mount is only available with RTX 2080 Ti configuration.

Fast-paced esports games and gorgeous AAA titles run smoothly with the reliably high frame rates pumped out by up to an NVIDIA® GeForce® RTX 2060 SUPER™ graphics card
- Power Up for Gaming and More**
Up to an AMD® Ryzen™ R7-3800X CPU with 8 cores accelerates everyday gaming, multitasking, and multimedia work.
- Breath From Every Side**
Widened vents around the top, front, and bottom of the case improve airflow into the chassis, elevating internal cooling to maximize system performance
- Game on the Go**
A lightweight and compact chassis design with a built-in carrying handle makes your desktop more portable for tournaments and LAN parties
- Aura Sync Shines Bright**
A glass side panel shows off Aura Sync chassis lighting that can be coordinated with compatible peripherals to create a cohesive system glow.

ROG HURACAN G21

Uncover gaming supremacy

PLAY IT COOL

Huracan features air intakes at the front, top and underside of the chassis. Opening the cover adds to that, allowing the maximum amount of cooling air into the chassis. It increases airflow by 16% and reduces internal temperatures by 15% to help cool critical components. Huracan gives you exactly what you want for gaming – a compact desktop that runs cool and quiet without compromising performance.

EXTRAORDINARY GAMING EXPERIENCES

To make sure Huracan gives you the very best gaming experience, ROG engineers play-tested the latest AAA games and the results are stellar: With 'Ultra' graphics settings, Huracan ran Destiny 2 in QHD at up to 100fps, and in 4K UHD at an astounding 60 fps.

100 FPS
IN QHD, ULTRA GRAPHICS

60 FPS
IN 5K UHD, ULTRA GRAPHICS

* Tested on Huracan with an 8th Gen Intel Core i7-8700 CPU, GeForce GTX 1080 GPU, and 32GB DDR4 RAM.

NO.1 GAMING LAPTOP
BRAND WORLDWIDE

SYNCHRONIZED AURA SYNC LIGHTING

Customizable Aura light effects gives you a palette of 16 million colors so you can match the look and feel of Huracan to the game you're currently playing. Aura Sync technology gives you the freedom to mix and match light effects with Aura Sync-supported gaming mice, headsets, keyboards, monitors, and other peripherals to create a coordinated gaming setup.

KEY FEATURES

- **Unleash its true potential**
Open the cover to increase airflow and enable a CPU and GPU performance boost, and activate special Aura lighting effects
- **Easy-upgrade design**
Slide-open chassis design makes it easy to maintain and upgrade key components; also includes a hot-swap 2.5-inch SSD bay
- **Small but powerful**
Compact chassis houses an 9th Gen Intel® Core™ i9 processor and GeForce® RTX 20 series graphics for extraordinary gaming experiences
- **Synchronized light effects with Aura Sync**
Show your gaming colors with synchronized light effects with other Aura Sync-compatible products
- **Magnificent-sounding audio**

ROG STRIX GL12CX

Rebirth of a gaming beast

REBIRTH OF A GAMING BEAST

The newly re-engineered ROG Strix GL12CX further pushes the limits of extreme gaming performance and features a striking, unconventional design. This Windows 10 gaming desktop now boasts the latest 9th Generation Intel® Core™ i7-9700K factory-overclocked processor and NVIDIA® GeForce® RTX 2080 graphics for unrivalled gaming experiences. It features the ROG-exclusive DIMM.2 module with support for dual SSDs that can be configured in RAID, along with tool-free expansion bays and an esports-ready hot-swap SSD tray for easy upgrades. A transparent side panel and Aura Sync lighting effects let you customize the colors of Strix GL12CX, inside and out.

KEEP IT COOL UNDER PRESSURE

ROG Strix GL12CX provides robust cooling for epic gaming marathons. Its intelligent cooling system features two dedicated isolated air chambers to improve heat dissipation. Strix GL12CX includes the innovative interwoven HyperStream design that allows for maximum heat removal and airflow into the chassis. In addition, the three fans on the top and bottom of the chassis ensure constant airflow through the system to keep the power supply and storage drives cool in the heat of battle.

NO.1 GAMING LAPTOP
BRAND WORLDWIDE

UNIFIED SYSTEM TUNING AND PERSONALIZATION

ROG Armoury Crate puts all essential system and lighting control at your fingertips in a single utility. You can easily change settings for both and define up to four game profiles that automatically make adjustments when you launch your favorite titles. Armoury Crate even lets you manually overclock ROG Strix GL12CX beyond the processor's factory-overclocked speeds. These options are just the beginning for what will become an even more versatile tool.

KEY FEATURES

- **Formidable Firepower**
Up to a 9th Gen Intel® Core™ i7-9700K CPU with upgraded CPU liquid cooler
- **Unrivaled Gaming Experience with NVIDIA® GeForce® RTX Graphics**
Up to a GeForce RTX 2080 GPU offers supersmooth 4K UHD and VR gaming even with maxed-out graphics settings, and uses real-time ray tracing to achieve unmatched realism
- **Innovative DIMM.2 Module for SSDs**
Motherboard features the latest Z390 chipset, plus a vertical expansion slot for two M.2 SSDs that are cooled by a dedicated heatsink, and ready for ultrafast RAID arrays
- **Upgrade Made Easy**
Win the arms race with an esports-ready hot-swap 2.5" SSD tray and quick access to internal components and storage bays
- **Aura Sync: Your Machine, Your Colors**
Customize and synchronize the case and component lighting to suit your personal style, and watch the internal LEDs glow through the transparent side panel

ROG STRIX GL10CS

Always game

TESTED FOR QUALITY AND PROVEN FOR RELIABILITY

Each ROG GL10CS is subjected to a series of rigorous quality tests, including drop and vibration, thermal, noise, and voltage testing to ensure it meets our exacting standards, and surpasses those of the competition. From the internal structure to the individual components and from mechanical design to electrical safety is tested to make sure the device you receive serves you reliably for years to come. The user comfort tests such as noise tests are carried out to isolate and optimize sound pressure and tones in different performance modes and scenarios to provide you with a comfortable experience even in the most demanding applications.

UNIFIED SYSTEM TUNING AND PERSONALIZATION

ROG Armoury Crate puts all essential system and lighting control at your fingertips in a single utility. You can easily change settings for both and define up to four game profiles that automatically make adjustments when you launch your favorite titles. These options are just the beginning for what will become an even more versatile tool.

NO.1 GAMING LAPTOP BRAND WORLDWIDE

DUAL-CHAMBER S-SHAPE DESIGN

The chassis adopts a dual-chamber S-Shape design meaning that the main components, including the CPU, the motherboard, and the graphics card are isolated from where the HDD and power supply unit are stored so that the internal thermal channels will not warm up one another resulting in improved thermal performance.

KEY FEATURES

- **More bang for your buck**
Powered by up to an 9th Gen Intel® Core™ i7 CPU with GeForce® GTX 16 series graphics and ultrafast Intel® Gigabit Wi-Fi
- **Customizable Aura Sync lighting**
Choose your own lighting from a full spectrum of colors and effects, and easily match with compatible Aura Sync peripherals
- **Immersive DTS sound experience**
DTS Headphone:X simulates 7.1 channel surround sound at theater-quality experience over stereo headphones
- **Load games faster with a high-speed SSD**
Equipped with up to a 256GB M.2 PCIe SSD for a perfect balance of speed and storage capacity
- **Unified system control with Armoury Crate**
Adjust lighting effects, system performance, and up to four custom gaming profiles via a user-friendly interface

DOUBLE YOUR POSSIBILITIES

Boost your productivity with the first gaming laptop to feature a built-in ROG ScreenPad Plus display. Tilted 13° for comfortable viewing, the innovative secondary display makes multitasking easy, and features optimized apps that enhance your workflow. Keep chats and stream controls on deck while gaming on the main screen, and enjoy a larger working area for your creative projects with screen space to spare for critical tools.

NO. 1 GAMING LAPTOP
BRAND WORLDWIDE

GAME

Game and stay engaged with team chats, streams, browsers, and more on the second screen. Enhance your play with Overwatch apps that show you real-time stats, build recommendations, and more.

IMMERSE

Deepen your immersion with games optimized for the multi-screen experience. AAA games like Dying Light 2* by Techland enhance your view by moving missions, inventory, and more to the second screen.

STREAM

Keep broadcast controls, video feed, and stream chats on deck as you game. Optimized apps like Xsplit Gamecaster make it easy to produce a high-quality stream on the go.

ANIMATE

Give yourself more working space to create your next masterpiece by moving your timeline, layers, and other contextual menus to your second screen.

DESIGN

Streamline your content creation, from photo editing to 3D modeling, by keeping crucial commands within easy reach while you work

MULTITASK

More screen space means more efficient multitasking. Stream video, browse the web, and keep incoming messages, chats, and more in view simultaneously.

Powered by
Intel® Core™ i9 Processor

GO HIGH-RES OR HIGH REFRESH

Tailor the primary display to suit your needs. Content creators will relish the high-resolution detail and wide color gamut of the 4K UHD display, factory calibrated for accuracy across 100% of the Adobe RGB color space. Gamers can take advantage of the 300Hz FHD gaming panel for pro-level gaming graphics. Its 3ms grey-to-grey response time minimizes ghosting for greater precision while tracking fast-moving targets. G-SYNC® mode takes visual immersion to the next level, offering you the silkiest gameplay graphics possible. The secondary ScreenPad Plus display adds touchscreen utility, stylus support, and vital space to your creative toolkit.

RISE TO ANY CHALLENGE

Maximizing performance for a powerfully equipped ultra-slim gaming laptop with two integrated screens necessitates innovation. Our new AAS Plus system draws our classic Active Aerodynamic System, but opens up a larger 28.5mm air intake behind the second screen that draws in cooler air and reduces noise. When combined with innovative measures like liquid metal thermal compound on the CPU, this dynamic machine sustains incredible performance. ROG Armoury Crate software optimizes cooling performance and acoustics further by seamlessly switching between operating modes based on the task at hand.

PORTABLE AND POWERFUL

At just 20.9mm thin, 2.4kg, and wrapped in a resilient magnesium-aluminide chassis that's as strong as it is sleek, the Zephyrus Duo 15 lets you game, create, stream, and stay productive anywhere. Its high-capacity 90Wh battery lets you unplug and take work and entertainment wherever you go. Type-C charging with Thunderbolt™ 3 lets you recharge from portable power packs, so you can stop scrambling for a socket when your battery gets low. For everyday activities like web browsing and streaming video, you can work off a smaller 65W adapter and travel even lighter.

ROG ZEPHYRUS G14

World's Most Powerful 14-inch Gaming Laptop

- 7nm X86 Mobile CPU
- AniMe Matrix LED
- 76Whr Battery
- WQHD 2560 x 1440 High Resolution Display
- PANTONE ProArt™ Trucolor Technology
- 65w Type-C Charging

LIGHT IT UP

Featuring a first-of-its-kind LED matrix display, the G14 offers deep personalization in a truly unique way. The groundbreaking display is made up of over a thousand individual mini-LEDs that can be used to display custom images and animations that express your creativity, audio visualizations that match music playback, and status updates that keep you in the loop on new messages, battery life, the weather, and more.

- ANIMATION
- AUDIO EQUALIZER
- SCROLLING TEXT
- SYSTEM NOTIFICATION

POWER UP

The Zephyrus G14 changes the game for portability by packing unprecedented power into a 14-inch body weighing just 1.6kg. We collaborated with AMD to create special versions of its Ryzen™ 9 4900HS CPUs with lower power consumption and thermals that enable superior performance for ultra-slim laptops. Cutting-edge 7nm process technology puts up to 8 cores and 15 threads on a single chip, allowing the G14 to muscle through heavy workloads. Add up to GeForce RTX™ 2060 GPU that colocks up to 1285MHz at 65W with ROG Boost, and the G14 moves from fast-paced gaming to content creation in a flash.

- 8-CORE RYZEN™ 9 4900HS CPU
- NVIDIA® GEFORCE RTX 2060 GPU
- 7 NM CPU PROCESS
- UP TO 32GB DDR4-3200
- UP TO 1TB SSD RAID 0

SPEED UP

Choose a display that best fits your lifestyle. Avid creators will relish the high-resolution detail visible in the WQHD panel, while esports enthusiasts will see smoother gameplay on the superfast 120Hz option. Adaptive sync synchronizes the display's refresh rate with the GPU's frame rate to eliminate tearing and make gameplay more fluid. Pantone validation ensures that colors are accurate across 100% of the sRGB spectrum for pro-level portfolio projects. Super-narrow bezels around the display practically fade into the background, keeping you fully engrossed in what's on screen.

- WQHD DISPLAY
- UP TO 120Hz REFRESH RATE
- ADAPTIVE SYNC TECHNOLOGY

LIVE IT UP

Gaming laptops typically struggle to stay alive without a massive power brick, but the Zephyrus G14's energy-efficient AMD® Ryzen™ 4000 Series APU lets you finish up work, watch videos, and stay productive without the weight. USB Power Delivery gives you the flexibility to charge the battery with portable Type-C power packs and adapters, or quickly rejuvenate compatible smartphones and other devices. Say goodbye to fighting over sockets in crowded cafes, and live life untethered. *Performance may vary based on system configuration.

TYPE-C CHARGING SUPPORT

KEYBOARD MASH UP

The Zephyrus G14 comes with an uncompromised keyboard that fits full-size functionality into a much smaller machine. It's the first ROG laptop to feature fingerprint login on the power button, making waking up the laptop as simple as unlocking your phone. The desktop-inspired layout makes you feel right at home with dedicated hotkeys that put volume, microphone mute, and ROG Armoury Crate software within easy reach. Overstroke technology triggers higher in each keystroke for faster responsiveness, and the ErgoLift design raises the keyboard at an angle to make typing more comfortable than ever.

KEEP UP

Equipped with the latest Intel Wi-Fi 6 with Gig+ (802.11ax), you can game reliably at LAN speeds wherever compatible connections are available. Wi-Fi 6 (Gig+) boosts network speed and efficiency, providing a better connection for crowded spaces like coffee shops and libraries. It also reduces latency, meaning less lag for network-sensitive activities like online gaming.

*unless otherwise stated, claimed Wi-Fi speeds base on theoretical performance. Actual performance may vary in real-world situations.

KEY FEATURES

- **A Portable 14-Inch Powerhouse**
Up to a GeForce RTX 2060 GPU and 8-core, 16 thread Ryzen™ 9 4900HS 7nm CPU accelerate gaming.
 - **Lighten Up and Show Off**
A precision AniMe Matrix LED display shows off custom animations, system notifications, equalizer visualizations, and more
 - **Stay active anywhere**
Do more anywhere with over 10 hours of battery life, while Type-C charging lets you recharge with power packs.
- **Visible Superiority**
Choose between a high-res WQHD display or super-fast 120Hz gaming panel. Both are Pantone® Validated for superb color accuracy.
 - **Submerge Yourself in Sound**
Dolby Atmos technology and quad speakers redefine your audio experience with multidimensional sound.
 - **Fast, reliable wireless**
Intel® Wi-Fi 6 (Gig+) offers lower latency for reduced lag and improved network efficiency for better connectivity in a crowd

KEY FEATURES

- **Big Power in a Slim, Sleek Body**
10th Gen Intel® Core™ i7 processors and up to NVIDIA® GeForce® RTX 2080 SUPER™ in the slimmest 17" gaming laptop.
- **Lifelike Visuals with Thin Bezels**
Experience stunning graphics with a choice of a blazing fast 300Hz/ 3ms display and Pantone® Validation for color accuracy and uniformity.
- **Switchable graphics for work and play**
Discrete mode enables ultra-smooth gaming with NVIDIA G-SYNC™, while Optimus mode offers better battery life.

G-SYNC™

- **High-speed productivity**
Get more done with superfast Intel® Wi-Fi 6 (Gig+) speeds and ultra-fast data transfers with Thunderbolt 3. Up to 48GB of high-performance DDR4-3200* RAM makes multitasking faster.
- **Intelligent Cooling with Liquid Metal**
AAS design, liquid metal thermal compound, self-cleaning cooling, and 83-Blade fans elevate performance.
- **Per-key RGB Lighting and Aura Sync**
Personalize the per-key RGB lighting for different games and modes; synchronize custom colors and effects with Aura Sync peripherals.

AMP UP YOUR AUDIO

The ROG Zephyrus G15's twin front-firing speakers put you directly in the heat of the action. Powered by Smart Amp technology, they stay within thermal and excursion limits no matter how much you crank up the volume. This mitigates distortion and prevents damage to the cones for audio that's louder, with more bass and dynamic range. Hi-Res Audio certification ensures headphone and headset users can hear more detail in high-quality content that offers deeper, richer immersion.

GAME AT 300HZ

Play at the speed of professional esports with the world's fastest gaming laptop display. The 300Hz/3ms panel enables true high-FPS gameplay for competitive gaming at the highest level. The ultrafast 300Hz refresh rate makes the flow of fast-paced action look impeccably smooth, while the 3ms grey-to-grey response time minimizes motion blur for precision target tracking. Get an edge in combat, where rapid response and environmental awareness are crucial to victory.

LIQUID METAL BOOSTS COOLING

ROG's Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for each situation. Performance is boosted with cutting-edge enhancements like liquid metal compound on the CPU and a well-ventilated exterior that keeps noise levels lower than the last generation. Special editions of the SCAR 17 add height to the chassis to facilitate superior performance from its uber powerful RTX 2080 SUPER GPU. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task. Together, these innovations enable ROG Boost to raise GPU clock speeds by 100MHz over stock speeds.

KEY FEATURES

- 
- **Game at 300Hz**
Lock in to incomparable smoothness and clarity for high-speed action on up to a 300Hz/3ms IPS-level panel.
 - **Unbridled Speed and Power**
Up to a GeForce RTX 2080 SUPER™ GPU and 10th Gen Intel® Core™ i7 processor speed through gaming and beyond.
 - **Expand Your Game**
Speed up your work with next-gen Wi-Fi 6 (Gig+) networking. Upgrade your storage with up to 3 SSD slots.
 - **Run Quick and Cool**
Liquid metal compound on the CPU raises clock speeds and lowers noise. RTX 2080 SUPER editions feature custom cooling solutions that enable peak performance.
 - **Transform Your Experience**
Dock your Keystone II to launch games and apps, back-up and restore personalized profiles, unlock your secret Shadow Drive, and more.

BE BOLD

Inspired by our collaboration with BMW Designworks Group, the Strix G slickly fuses effortless style with cutting-edge cooling you can see. The slick design comes in three distinct styles. Original Black wraps the Strix G in stealthy black, giving it a professional persona that blends in easily in any environment. Glacier Blue is effortlessly cool, bringing a light, sci-fi inspired energy to the lineup. The striking new Electro Punk option* adds a pop of bold color, and can be bundled with a matching set of gear that completes your whole look.

*Electro Punk color is only available for 15" configurations.

LIQUID METAL BOOSTS COOLING

ROG's Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for each situation. The Strix G elevates performance with a premium liquid metal compound on the CPU, and augments its well-ventilated exterior with a self-cleaning thermal module that ejects dust to improve longevity. Dual n-Blade fans spin 83 blades to increase airflow, and ultra-thin fins expand the surface area for heat dissipation. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task.

KEY FEATURES

- Get a Competitive Advantage at 144Hz**
Pro-level precision is in sight with an ultra-fast 144Hz display that makes fast-paced play silky smooth.
- Potent Processing Power**
10th Gen Intel® Core™ i7 Processor and GeForce RTX 2060 GPU power through work and play.
- Commanding Cool**
Intelligent cooling measures like liquid metal compound on the CPU, n-Blade fans, and self-cleaning cooling thermal module reduce noise and raise the bar on peak performance.

FIREPOWER FOR ANY TASK

Armed with the strength to tackle any situation, the TUF Gaming A15 delivers dependable performance for gaming, streaming, and everything in between. Up to a nimble 8-core AMD Ryzen™ 9 CPU can activate as many as 16 threads to power through serious multitasking. Paired with up to a GeForce RTX™ 2060 discrete GPU, it can pump out reliably high frame rates in a wide range of popular games. Accelerate load times across a massive collection with an up to 1TB NVMe PCIe® SSD and space for a second SSD.

AMD RYZEN™ 4000 SERIES CPU

NVIDIA GEFORCE RTX™ 2060 GPU

UP TO 1TB SSD NVME PCIe

MILITARY-GRADE TOUGHNESS

In order to earn the TUF Gaming name, these laptops designs must successfully survive a rigorous battery of MIL-STD-810H tests. Test devices are exposed to drops, vibration, humidity, and extreme temperatures to ensure reliability. Dependable even in the harshest conditions, the A17 is more than capable of withstanding the accidental bumps and knocks of everyday life.

KEY FEATURES

- Potent Performance for Gaming and Beyond**
Up to the new 4th Gen AMD Ryzen™ 9 processors and NVIDIA® GeForce® RTX 2060 graphics deliver immersive gaming experiences and ample power for everyday work
- Productivity Anywhere**
Stay productive on the go with a chassis that's 7% smaller than the previous generation with longer battery life
- US Military-Grade Toughness Inside and Out**
Modern aesthetics are engineered to meet stringent MIL-STD-810H standards, for a stylish machine with lasting durability

- Smart Cooling Sustains Long-Term Stability**
Self-cleaning cooling extends system longevity, while customizable Scenario Profiles optimize cooling, performance, and acoustics for any task
- More Realistic Audio with DTS:X Ultra**
Upgraded speakers let you turn up the volume 1.8x louder, with 2.7x deeper bass than previous generations, while DTS:X Ultra allows for immersive surround sound experiences.

Performance

Powered by the world's fastest¹ Qualcomm Snapdragon 865 Plus 5G Mobile Platform, the latest LPDDR5 RAM and UFS 3.1 ROM, and worldwide 5G connectivity², ROG Phone 3 delivers the ultimate in overall performance and gives you a super-smooth gaming experience.

Display

ROG Phone 3 is equipped with a stunning 144 Hz / 1 ms AMOLED display. Combined with an industry-leading 270 Hz touch-sampling rate, which dramatically decreases the touch latency to 25 ms³, this display takes the gaming experience to the next level. To ensure that visuals on ROG Phone 3 look just like the developer intended, each display is carefully color-calibrated color to ensure a Delta-E value of less than 1. The display is also TÜV Rheinland-certified, so it's easy on your eyes.

Battery

You can rely on the monster 6000 mAh⁶ battery in ROG Phone 3 to keep you going, even in the longest battles. There are also multiple system parameters for you to actively customize the battery charging behavior and optimize application usage to better fit your using scenario. There are also multiple passive power-saving mechanisms — including an exclusive hibernate function — that significantly prolong the time between charges and also increase battery lifespan.

144 Hz Refresh Rate

To achieve a smoother, more fluid viewing experience that makes gaming even more immersive, we've developed a screen for ROG Phone 3 that boasts an industry-leading 144 Hz refresh rate. Content is more vivid, clearer, and looks more lifelike. It's also much easier on the eyes, so you can game for longer without discomfort.
