Safety information

1

Safety information

Important-Please read these instructions fully before installing or operating

Before use

The installation of this appliance is best carried out by 2 people.

- Dispose of all packaging carefully and responsibly.
- The appliance is designed for **indoor use only** and must be protected from rain, moisture and extreme temperature variations.
- This appliance is designed for house hold use. **Do not** use the appliance for industrial and commercial use, or any other purpose.
- The appliance **MUST** be positioned on a firm level base.
- **Do not** splash water on the appliance. It may cause electrical parts to fail and result in an electric shock.
- Leave the appliance in

its intended place of installation and in its correct orientation for at least 4 hours before switching on to allow the cooling system to settle before first use or after any transportation.

- Your appliance is an environmental friendly product and it contains non CFC/HFC gas substances in the cooling system (Called R600a) and in the insulation (Called cyclopentane) which are potentially flammable if exposed to fire. Therefore, take care not to damage, the cooling circuit/pipes of the appliance in transportation and in use. In case of damage do not expose the appliance to fire,

Safety information

Important-Please read these instructions fully before installing or operating

potential ignition source and immediately ventilate the room where the appliance is situated.

- **Do not** sit, stand or place any other heavy objects on top of the appliance. This could result in injury or damage to the appliance.
- **Do not** allow children to play with the appliance to avoid the risk of entrapment and suffocation.
- Keep ventilation opening, in the appliance enclosure or in the built-in structure, clear of obstruction.

During use

- This appliance is not intended for use by persons (including

children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

- This appliance is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely. Young children should be supervised to ensure that they do not play with the appliance.
- **Do not** use mechanical,

Safety information

Important-Please read these instructions fully before installing or operating

electrical or chemical way to speed up the defrost process not recommended by the manufacturer.

- **Do not** use or place other electrical products inside the appliance not recommended by the manufacturer.
- **Do not** store liquids in glass containers in the freezer compartment as these may shatter.
- **Do not** store flammable materials such as alcohol, gasoline, LP gas or glue etc in the appliance.
- In case there is an inflammable gas leaking, open the window for air circulation and do not pull out the plug or turn the temperature knob. **Do not** touch the appliance until the valve of gas is turned off. Otherwise, sparks may happen.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- **Do not** attempt to repair the appliance yourself. Contact the Customer Helpline:0345 257 7271.

Safety information

Important-Please read these instructions fully before installing or operating

- Children aged from 3 to 8 years are allowed to load and unload this appliance.
 - **⚠ WARNING!** When positioning the appliance, ensure the supply cord is not trapped or damaged.
 - **⚠ WARNING!** Do not locate multiple portable socket-outlets or portable power suppliers at the rear of the appliance.
- To avoid contamination of food, please respect the following instructions
- Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
 - Clean regularly surfaces that can come in contact with food and accessible drainage systems.
 - Clean water tanks if they have not been used for 48h; flush the water system connected to a water supply if water has not been drawn for 5 days.
 - Store raw meat and fish in suitable containers in the refrigerator, so that it is not in contact with or drip onto other food.
 - Two-star frozen-food compartments(if they are presented in the appliance) are suitable for storing pre-frozen food, storing or making ice-cream and making ice cubes.

Safety information

Important-Please read these instructions fully before installing or operating

One-, two- and three-star compartments (if they are presented in the appliance) are not suitable for the freezing of fresh food.

- If the appliance is left empty for long periods, switch off, defrost, clean, dry and leave the door open to prevent mould developing within the appliance.
- The refrigerating appliance is not intended to be used as a built-in appliance, unless specifically shown as such in its instruction manual.
- The drawers, baskets and shelves should be kept in their current position unless otherwise specified in this document.

-   **WARNING!**
During using, service and disposal the appliance, please pay attention to symbol similar as left side, which is located on rear of appliance (rear panel or compressor) and with yellow or orange color.

It's risk of fire warning symbol. There are flammable materials in refrigerant pipes and compressor. Please be far away fire source during using, service and disposal.

Transportation

Caution: 2 people are required to unpack and handle the appliance, it is recommended that gloves are worn.

- The appliance should be transported only in an upright position. Do not tilt the appliance greater than 45 degrees. The packaging as supplied must be intact during transportation.
- After transporting the appliance, leave it for at least 4 hours before switching on to allow the cooling system to settle. Failure to comply could result in damage to the appliance.
- Do not move the appliance by pulling the door or handle as it may damage your flooring and wall coverings etc.
- Empty any water in the drain tray before moving.
- Make sure that the defrost water pipe at the back of the product is fixed to the plastic evaporating pan on the top of the compressor to avoid defrost water spillage on the floor.
- Ensure the supply cable is not caught under the appliance during and after moving.
- Carefully remove all packaging materials including the foam base, dispose of correctly

Installation

- Ensure sufficient spacing is provided for the appliance to be installed. Leave space on both sides (5cm), back (5cm) and above the appliance (5cm) to ensure proper ventilation.

- Do not place the appliance near a heat source or in direct sunlight.
- Do not put any heavy objects on top of the appliance. It will damage the appliance.

- Do not install the appliance in a moist and wet place.

- Adjust the feet at front to level the appliance. It should be installed on a smooth surface to avoid excessive vibration and noise.
- Each appliance has a climate class (shown on the rating plate) where it indicates the temperature range of the appliance operation in place. The appliance may not work properly if it is left for a long period at a temperature outside the specified range:

extended temperate: 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 10 °C to 32 °C (from 50°F to 90°F)';

temperate: 'this refrigerating appliance is intended to be used at ambient temperatures ranging from

16 °C to 32 °C (from 61°F to 90°F)';

subtropical: 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 38 °C (from 61°F to 100°F)';

tropical: 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 43 °C (from 61°F to 110°F)'

- Refer to section Care and Maintenance to prepare your appliance for use.

Installing your refrigerator

Bringing it all together

Door Reverse

Warning: Remove the main plug before reversing the door. 2 people may be required to reverse the door .

- 1.Remove the screws ① from the hinge cover ② put the hinge cover on the soft pad for future use
- 2.Open the door and remove the screw ⑤ on the top hinge plate ③ from the front side . Then remove the hinge plate carefully . Take out the door from the cabinet and place it on the ground protected with soft pad to avoid any damage .
- 3.Remove the plastic cover ⑦ and screws at the top left side ⑥ and fix it to the right side .
- 4.Put the plastic soft pad on the floor and Lie down the whole product to the rear side to the pad carefully . Remove the two front adjustable feet ⑫⑭. Take out the bottom hinge ⑪ from the bottom of right side. Record down all the position of the screws ⑩ on the bottom hinge . Then remove all the screws from the bottom hinge. Turn the hinge over to ensure the protruded area is pointing to the right side . Put the bottom hinge to the bottom of left side and fix all the screws back to the hinge according to the previous record . Then add the two adjustable level feet back to the bottom side .
- 5.Remove the screw from the right side of top hinge plate to left side . Move the unit stand upright . Put the door to the left side . Ensure the hole on the lower side has fully entered to the pin on the bottom hinge plate . Put the top hinge plate ③. Use the alternative cover (with hole) provided and fit to the side . And fix to the door . Fix the screw to the top hinge plate to the cabinet Turn the door to ensure the door can be open and closed without any problem .
6. Refit the top hinge cover by fixing the screw .

Figure.1

Door opening from left side

Figure.2

Door opening from right side

Warning: Please make sure the unit to be tilted more than 45 degree to access the bottom hinge. It is advised to leave the unit for 4 hours to allow the cooling to settle before switch on.

Levelling the appliance

- 1.Rotate feet clockwise to heighten.
- 2.Rotate feet anti clock wise to lower.

Installing your refrigerator

Bringing it all together

Electrical connection

Any electrical work that is required to install this appliance **MUST be carried out by a qualified electrician.**

Warning: THIS APPLIANCE MUST BE EARTHED

Before making any electrical connections, ensure that:

- Electrical safety is only guaranteed when the earth system of your house is in accordance with the related local regulations.
- Do not damage the refrigerant circuit.
- Do not bend, stretch or pull the supply cable to avoid electric shock.
- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- Ensure the power socket is suitable for the maximum power of the machine (fuses in the power circuit must be 13 amp).
- The supply voltage should be the same as that indicated in the technical specifications and the appliance rating plate.
- The appliance should be earthed and in compliance with the applicable law.
- When installed, the power socket must be within easy reach.
- If the socket outlets in your home are not suitable for the plug supplied with this unit check with a qualified electrician for replacement.
- The use of adapters, multiple connectors or extension cables are not recommended.
- The appliance must be connected to a 220-240 volt 50Hz AC supply by means of a three pin socket, suitably earthed and protected by a 13 amp fuse.
- Should the fuse need to be replaced, a 13 amp fuse approved to BS1362 must be used.
- The plug contains a removable fuse cover that must be refitted when the fuse is replaced. If the fuse cover is lost or damaged, the plug must not be used until a replacement cover has been fitted or the plug is replaced.
- A damaged plug should be cut off as close to the plug body as possible, the fuse should be removed and the plug disposed of safely.

Plug replacement (UK & Ireland only)

Should you need to replace the plug; the wires in the power cable are coloured in the following way:

Blue Neutral 'N'

Brown Live 'L'

Green & Yellow Earth 'E'

As the colours of the wires in the power cable may not correspond with the coloured markings identifying the terminals in your plug, and proceed as follows:

The green & yellow wire must be connected to the terminal in the plug that is marked with the letter E or by the earth symbol.

The blue wire must be connected to the terminal that is marked with the letter N.

The brown wire must be connected to the terminal that is marked with the letter L.

If the power supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similar qualified person in order to avoid a hazard.

Using your refrigerator 4

Using your refrigerator

Getting the most from your appliance

Before first use

Final checks before operating the appliance

1. Good air circulation around the appliance positioned.
2. The feet have been adjusted for perfect levelling.
3. Clean the compartment per recommendation in section Care and Maintenance .
4. Plug in the appliance

The compressor starts up and in operation may produce some background noise and it is normal, this is not a defect.

Using your appliance

1. Temperature adjustment

- The compartment temperature can be set by the thermostat between "1" and "7" (coldest setting), while the "0" means turn off. We recommend setting the thermostat midway first.
- To ensure the compartment is maintained at the desired temperature, it is advised to monitor the temperature periodically by a thermometer and adjust the temperature knob accordingly.
- Load the appliance after switch on for a while to allow the temperature reach the desired setting.

2. Storing frozen food

- Use the fridge compartment to store fresh food and drinks .
- Do not exceed the food capacity that the appliance able to handle .
- Do not put warm food to the appliance immediately as it may cause excessive cooling of the compartment .
- Set the temperature knob at medium position for storing fresh food .
- Do not mix already frozen food and fresh food

Useful information

The following guidelines and recommendations are suggested to obtain the best results and storage hygiene.

- Frequent door openings can cause the internal temperature rise so the door shall be closed as soon as possible after use.
- For hygiene reasons, it is always a good practise to pack, wrap and cover the food before storing.
- Use a polythene bag to store raw meat and place on the lowest shelf. Avoid contact with cooked food to prevent contamination. For safety reason, store raw meat for two to three days only.
- Cooked dishes must be stored in airtight covered containers.
- Food and beverages shall cool to room temperature before freezing.
- Most vegetables should be blanched and chilled before freezing.
- Some fruits and vegetables like pineapples , melons, tomatoes, and cucumbers shall be wrapped in polythene bags .
- Do not leave frozen food at room temperature to thaw. You could defrost the food by putting it in the fridge to thaw slowly. Make sure you avoid defrosting food from dropping food juices on to other food.

Using your refrigerator

Getting the most from your appliance

Position different food in different compartments according to the below table

Refrigerator compartments	Type of food
Door or balconies of fridge compartment	<ul style="list-style-type: none">• Foods with natural preservatives, such as jams, juices, drinks, condiments.• Do not store perishable foods.
Crisper drawer (salad drawer)	<ul style="list-style-type: none">• Fruits, herbs and vegetables should be placed separately in the crisper bin.• Do not store bananas, onions, potatoes, garlic in the refrigerator.
Fridge shelf – bottom	<ul style="list-style-type: none">• Raw meat, poultry, fish (for short-term storage)
Chiller (box/drawer)	<ul style="list-style-type: none">• Raw meat, poultry, fish (for short-term storage)
Fridge shelf – middle	<ul style="list-style-type: none">• Dairy products, eggs
Fridge shelf – top	<ul style="list-style-type: none">• Foods that do not need cooking, such as ready-to-eat foods, deli meats, leftovers.

Energy saving tips

- Place your fridge away from direct sunlight, your oven or any other heat sources. Allow 20 cm clear space on both sides and above, and at least 5 cm behind.
- Cover all food stored, and arrange it so that cold air can circulate freely.
- Higher cold setting will use more energy. Do not set to maximum cold if it is not necessary.
- Cool the hot/warm food to room temperature before put them into your fridge.
- Frequently opening and closing the door will cause the internal temperature to rise and it will consume more energy.
- Close the door(s) properly, and make sure the seals and hinges are airtight. Check the seals by putting a sheet of paper between the door and the main body of the fridge. If the paper moves, your seals need replacing.
- Defrost regularly if your refrigerator is not a frost-free or cyclic defrost model. Accumulated ice layer should not be more than 5 mm thick.
- The pre-set combination of drawers, baskets and shelves have already been set in the most efficient way for the use of this product.

Using your refrigerator

Getting the most from your appliance

Temperature setting recommendation

Temperature Setting Recommendation		
Environment Temperature	Freezer compartment	Fridge compartment
Summer	/	
		Set on 3~4
Normal	/	
		Set on 3~4
Winter	/	
		Set on 2~3

Important notes

- Under Recommended setting, the best storage time of fridge is no more than 3 days.
- The best storage time may reduce under other settings.

Tips for Storing Foodstuffs

- Load limits are determined by baskets, flaps, drawers, shelves etc. Make sure that these components can still close easily after loading.

Care and Maintenance

5

Care and maintenance

Looking after your appliance

General

Important: Always unplug the appliance from the power socket during cleaning and maintenance.

- Never use any sharp instruments or abrasive substances, soap, household cleaner, detergent or wax polish for cleaning.
- Use luke warm water to clean the cabinet of the appliance and wipe it dry.
- Never clean the appliance with flammable fluids. It could cause damage and a fire hazard.
- Clean the exterior of the appliance and door seal with a damp cloth and dry it through.
- Avoid water going into the temperature control box.. Clean with a dry cloth only.
- Clean the condenser (located at the back of the appliance) with a vacuum cleaner. It is suggested to remove the dust every year.
- Shelves are all removable for cleaning purpose.

Important: Care must be taken while cleaning/carrying the appliance not to touch the bottom of the condenser metal wires at the back of the appliance, as this could cause injury to fingers and hands.

Light bulb replacement

This appliance is equipped with LED light bulb. It can be used for long time. In case, the LED bulb is blown, it must be replaced by the qualified person to avoid any hazard. Contact the service agent at 0345 257 7271.

Vacation

Short vacation

There is no need to disconnect the appliance from the mains if you will be away for two to three weeks. Use up the perishable food.

Long vacation

Remove all the food if you are away for three weeks or more. Unplug the appliance and leave the doors open to provide air circulation to prevent odour and mould.

Moving your appliance

Moving

Refer to section “Transportation” under “Installation”

Technical Specifications

Model	ME60170TLW
Energy efficiency class	F
Energy consumption Kwh/year	143
Net storage volume fresh food (litres)	331
Net storage volume frozen food (litres)	/
Total net storage (litres)	331
Frozen food compartment rating	/
Climate class	N/ST
Operating noise level dB(A)	40
Minimum Operation Temperature	16°C
Product Dimension	600mmx600mmx1700mm

The model information can be retrieved using the QR-Code reported in the energy label.
The label also includes the model identifier that can be used to consult the portal of the registry at <https://eprel.ec.europa.eu>

This product contains a light source of energy efficiency class G (if present).

Disposal information

The symbol on the product or its packaging indicates that this product may not be treated as household waste . Instead it should be handed over to the applicable collection point for the recycling of electrical and electronic equipment , By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health , which could otherwise be caused by inappropriate waste handling of this product . For more detailed information about recycling this product , please contact your local council office , your household waste disposal service or the shop where the product was purchased .

Remember : Old fridges must be disposed of carefully - older models contain CFC gases that are harmful - if in doubt , contact your local council for details on how to dispose of an old fridge .

Doors and lids of the refrigeration appliance should be removed before disposal in the landfill, to avoid children or animals getting trapped inside.

Help is always at hand

Troubleshooting

If you have a problem with your product, these questions may be able to assist you?

Question- Appliance does not work.

Answer

Appliance is not switched on - Switch on the appliance.

Mains plug is not plugged in or is loose. -Insert mains plug.

Fuse has blown or is defective - Check fuse, replace if necessary.

Socket is defective - Mains malfunctions are to be corrected by an electrician.

Question - Appliance cools too much.

Answer

Temperature is too cold - Adjust the thermostat dial to a warmer setting.

Question - The food is too warm.

Answer

Temperature is not properly adjusted - Adjust the thermostat to a cooler setting.

Door was open for an extended period - Open the door only as long as necessary.

A large quantity of warm food was placed in the appliance - Adjust the thermostat to a cooler setting. Cool warm food before placing in the refrigerator.

The appliance is near a heat source - Position the refrigerator away from a heat source.

Question- Interior light does not work.

Answer

Led light is defective - Replace with equivalent Led light.

Question-Heavy build up of frost, possibly also on the door seal.

Answer

Door seal is not air tight - Carefully warm the leaking sections of the door seal with a

hair dryer(not hotter than approx 50 degree). At the same time shape the warmed door seal by hand such that it sits correctly.

Question - Water on the floor or on storage shelves.

Answer

Water drain hole is blocked - Remove food residue or ice from the entrance of the drain hole.

Question - Appliance is making unusual noises

Answers

Appliance is not level - Readjust the front levelling feet.

Appliance is in contact with wall or other objects. - Push appliance away a short distance

A part at the back of the appliance eg a tube, is in contact with another appliance part or wall - Gently bend this part away carefully if necessary
