Safety and Care Advice

Important – Please read these instructions fully before starting assembly

Check you have all the components and tools listed on the front cover and page 3.

Remove all fittings from the plastic bags and separate them into their groups.

Keep children and animals away from the work area, small parts could choke if swallowed.

Make sure you have enough space to layout the parts before starting.

Do not stand or put weight on the product, this could cause damage.

Assemble the item as close to its final position (in the same room) as possible.

Do not place furniture directly in front of radiators, fires or any other source of heat.

Parts of the assembly will be easier with 2 people.

Assemble on a soft level surface to avoid damaging the unit or your floor.

We do not recommend the use of power drill/ drivers for inserting screws, as this could damage the unit.

Only use hand screwdrivers.

Dispose of all packaging carefully and responsibly.

General care and maintenance

Each table top is made by hand and is slightly different and unique.

This table can be used outside all year around but should be covered or moved to a sheltered area during the winter months to protect its good looks.

If covering please ensure that table is

fully dry first, and that cover is ventilated.

Do not leave this table standing in water.

From time to time check that there are no loose screws on this unit.

Tighten as necessary.

Due to the handmade nature of this table top and the construction techniques involved, some cracking may develop on the underside of the top. This cracking will not affect the function or serviceability of the table.

Cleaning and care

Dust regularly with a clean dry cloth.

Wipe up any spills immediately with a damp cloth and then dry the surface with a clean dry duster.

Repeat this procedure for periodic cleaning.

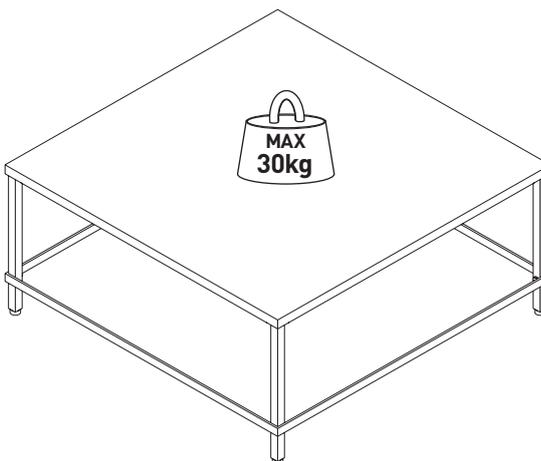

Remove stubborn stains with a weak washing up liquid solution and a damp cloth and dry after with a clean cloth.

The use of furniture polish or spray is not necessary or recommended.

Never use abrasive or corrosive cleaning agents.

If paint finish becomes chipped or damaged treat exposed area with rust

inhibitor immediately and then touch up with a suitably colour matching paint for use on metalwork.

Maximum recommended loading. Do not stand on the table!

General information
