

Assembly & Operation Instructions

HOME

HOME 5 LINE RETRACTABLE AIRER (LYQ125-5X7 - 9563304)

Parts Included:

Installation

1. Mark, drill (bit 10mm diameter) and plug (A) 4 holes at desired location and height
2. Screw in one of the long screws (B) into each hole leaving proud by just enough to slide the outer case (E) securely into position
3. Mark, drill (bit 8mm diameter) and plug (C) 4 holes for the fixing bar (F) in an opposite location. Attach the bar by using the short screws (D)

Directions For Use

1. You can either use each line independently or all five at once. If independent use is required, pull each line individually and hook onto corresponding hook on the fixing bar. If you would like to use all five lines at once, pull the front bar from the case and all lines will come with this. Hook the front bar over the fixing bar to hold in position.
2. To tension the lines, release the built-in crank that you will find on the left hand side of the main body outer case, turn anti clockwise and lock.
3. To support the already hung clothesline please use line props (not included) if necessary.

Storage

It is recommended that the lines are retracted after use. Take care when re-winding back into the main case – it is recommended that you hold either the front bar and allow all five lines to retract slowly and evenly, or hold the end of each individual line by the hook and allow to retract slowly.

Keep these instructions for future reference. At regular intervals check that screws are secure.

Care and use

Don't load any more than 28kg max at any one time.

Always Load evenly spaced out.

To clean, simply wipe with damp cloth.

Warning

Caution: Long cords present risk of strangulation to children, ensure that the line is always kept out of the reach of children.

- Do not exceed maximum load (28kg).

- Do not use on stud walls.
